## Eminent Alumni Lecture (EAL):

ALUMNI ASSOCIATION OF VIGNANS INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN has initiated an Eminent Alumni TALK by distinguished alumni members from industry, R&D and academia. There are many alumni members who are doing exceptionally well in the fields of academia, research, industries, entrepreneurship and other areas. This alumni talk ensures mutual benefit of the students as well as the alumni members. Through this interaction, the alumni get a scope to share their practical experiences. Moreover, they get a glimpse of the future generation of our Institute. On the other hand, this lecture reconnects the alumni with their college and gives them a fantastic scope to give back to their alma mater. The students get an opportunity to clear their doubts regarding any of the topics from the alumni members during these lecture series. This makes their learning experience more comprehensive. Initially, the lecture is being organized in person. We are planning to make these lectures in series through video-conferencing; so that real-time communication between the alumni (especially from abroad) and students can be made possible. This video-conferencing will also save time and allow more and more number of students to communicate with our distinguished alumni.

## Ms. N. Roshini

Talent Acquisition Operational Excellence Consultant

**Alumnus of B. Tech Batch: 20010-2014**

### Profile by her.

After completing my intermediate education, I chose to join Vignan's College with immense hope and determination to build a strong foundation for my future. Vignan provided me with a platform to grow, learn, and refine my skills, shaping me into the professional I am today. The opportunities and guidance I received at Vignan allowed me to excel academically and personally, preparing me to confidently step into the corporate world. This institution not only equipped me with the knowledge but also recognised as talent speaker during my initial stages and made me the person I am today.

After graduating, I started my journey with Unisys, where I have been contributing for the past eight years. During this time, I've had the privilege of recruiting talented candidates across various platforms and participating in impactful events that support students' career aspirations. I have been recognized 15 times for attributes such as thinking out of the box, curiosity, and exceptional client management. Today, I proudly handle multiple regions, including Singapore, Malaysia, and other APAC regions. My journey from Vignan to my current role reflects the strong foundation my college gave me and how it set me on the path to achieving my dreams.

## Challenges in Enterprise AI Transformation

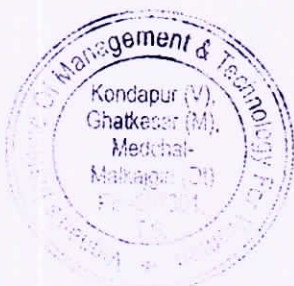

### Summary

On 22<sup>nd</sup> July, 2023, VMTW's notable alumni, Ms. Xyz graced everyone virtually with her brilliant talk on AI Transformation, The talk focuses on key challenges in the Enterprise world for AI adoption and possible approaches to dealing with them. Transforming Enterprise AI infrastructure for large scale Generate AI applications demands scale, security, reliability, and cost predictability, apart from seamless operation at the Edge, in data centres, or on public cloud services like AWS EKS, Azure AKS, and Google GKE. It is critical to enable optimized LLM model performance and flexibility to deploy AI models wherever needed, whether on-premises, at the edge, or across cloud platforms. Recognizing Kubernetes as essential for modern workloads and adoption of enterprise AI applications, it is critical to streamline its complexity. The seminar was really helpful and gave a new perspective to every student.
