## Carbon Footprint & Energy Audit

The REST Pvt Ltd acknowledges with thanks the cooperation extended to our team for completing the study at Vignan's Institute of Management and Technology for Women (VMTW)

The interactions and deliberations with VMTW team were exemplary and the whole exercise was thoroughly a rewarding experience for us. We deeply appreciate the interest, enthusiasm, and commitment of VMTW team towards environmental sustainability.

We are sure that the recommendations presented in this report will be implemented and the VMTW team will be further improve their environmental performance.

Kind regards

Your sincerely

# Executive Summary

The growth of countries across the world is leading to increased consumption of natural resources. There is an urgent need to establish environmental sustainability in every activity we do. In a modern economy, environmental sustainability will play a critical role in the very existence of an organization.

An educational institution is no different. Built environment, especially an educational institution, has a considerable footprint on the environment. Impact on the environment due to energy consumption, water usage and waste generation in an educational institute is prominent. Therefore, there is an imminent need to reduce the overall environmental footprint of the institution.

As an Institution of higher learning, West Godavari Institute of Science & Engineering (VMTW) firmly believes that there is an urgent need to address the environmental challenges and improve their environmental footprint.

True to its belief, VMTW has almost 70% transforming conventional bulbs & fixtures into non-conventional energy LEDs. REST Pvt Ltd team congratulates VMTW team for their efforts.

Keeping VMTW work in energy efficiency, we recommend the following to be taken by the competent team at VMTW:

**Work towards achieving carbon neutrality:** NDC emphasizes creating an additional carbon sink of 2.5 to 3 billion tonnes of CO<sup>2</sup> equivalent through additional forest and tree cover by 2030. VMTW's net carbon emission for the year 2020-21 is 107 MT CO<sup>2</sup>e. VMTW should focus on energy efficiency, renewable energy, and carbon sequestration as tools that will enable them to offset the present carbon emissions and achieve carbon neutrality.

**Installation of solar rooftop:** Renewable energy plays a very important role in improving the environmental footprint of an organization. By increasing the share of renewable energy in VMTW's energy portfolio, the overall carbon footprint of the college can be reduced. The roof area available at VMTW is around 83129.68 sq.ft. As an initial step, VMTW could look at installing 25kWp of solar PV which can generate 40,500 units per year. Still the renewable share will also reduce the 140 MT CO<sup>2</sup>e. For the current assessment year power consumption is 50454 units/year. Still another 100kWp of roof top can be utilized for solar power to expand in step VMTW.

**Increase the operating power factor:** Presently, based on the energy bills, it is understood that the institution maintains a power factor of 0.65. Since the institution pays electricity bills for the KVAH consumed, the lower the power factor, higher is the energy bill for the same KWH consumption. It is recommended to install capacitor banks to improve the power factor and save energy bill. VMTW can save up to Rs. 20,000 per month.

Improve energy efficiency of the college: It is recommended to adopt latest energy efficient technologies for reducing energy consumption in fans, lighting, and air conditioners. We recommend the following projects to be implemented at the earliest:

- Replace conventional 60W ceiling fans with energy efficient BLDC fans of 30W
- Install air conditioners energy savers to save energy in split air conditioners
- Replace all conventional tube lights with LED lamps

# Carbon Footprint and Energy Audit

Vignan's Institute of Management and Technology for Women (VMTW) and REST Pvt Ltd are working together to identify opportunities for improvement in energy efficiency and carbon reduction. This report highlights all the potential proposals for improvement through the audit and analysis of the data provided by VMTW for lighting, air conditioning, ceiling fans, and biogas potential.

The report also details the carbon emissions from college operations. For carbon emissions, scope 1 and scope 2 emissions are calculated from the data submitted by VMTW. The report emphasizes the GHG emission reduction potential possible through a reduction in power consumption.

Effect of pandemic and online classes on energy consumption and carbon footprint:

The year 2020-21 was affected by the pandemic and because of the pandemic, most of the classes were shifted online. There has been a steady in the consumption of energy in the year 2020-21 around 50454kWH.

Submission of Documents

"Carbon footprint and energy audit at VMTW was carried out with the help of data submitted by VMTW team. VMTW team was responsible for collecting all the necessary data and submitting the relevant documents to REST Pvt Ltd for the study.

Note

Carbon footprint and energy audit are based on the data provided by VMTW team and discussions the REST Pvt Ltd team had with VMTW team. The scope of the study does not include the exclusive verification of various regulatory requirements related to environmental sustainability.

REST Pvt Ltd has the right to recall the study if it finds (a) major violation in meeting the environmental regulatory requirements by the location and (b) occurrence of major accidents, leading to significant damage to ecology and environment.

# Opportunities for improvement

As a part of the overall environmental improvement study at VMTW, carbon footprint calculations were also carried out. The objective of calculating the carbon footprint of the campus is find the present level of emissions from campus operation and what initiatives that the VMTW can take to offset the emissions. By offsetting the emissions, the college can become carbon neutral in the future by adopting energy efficient processes, increase in renewable energy share and tree plantation.

Carbon footprint calculations:

To help delineate direct and indirect emission sources, improve transparency, and provide utility for different types of organizations and different types of climate policies and business goals, three "scopes" (scope 1, scope 2, and scope 3) are defined for GHG accounting and reporting purposes.

For calculating carbon footprint of the campus, Scope 1 & Scope 2 emissions are being considered. Since day scholars use college provided transportation and hostellers stay in campus, Scope 1 and Scope 2 are the highest contributor to overall emissions. For this reason, Scope 3 is not being calculated.

Scope 1: Direct GHG Emissions

Direct GHG emissions occur from sources that are owned or controlled by the company, for example, emissions from combustion in owned or controlled DG sets, canteen, vehicles, etc.; emissions from chemical production in owned or controlled process equipment. Direct CO2 emissions from the combustion of biomass shall not be included in scope 1 but reported separately.

VMTW Scope 1 emissions for 2020-21:

Sources of Scope 1 emissions in VMTW:

- 1) Diesel consumption for the generator for the assessment year 2020-21 is 22,627 litres/yr.
- 2) LPG used for canteen/Lab: 240 cylinders/year

Scope 2: Electricity Indirect GHG Emissions

Scope 2 accounts for GHG emissions from the generation of purchased electricity consumed by a college. Purchased electricity is defined as electricity that is purchased or other VMTW brought into the organizational boundary of the college. Scope 2 emissions physically occur at the facility where electricity is generated.

VMTW Scope 2 emissions for 2021: Electricity purchased from grid: 50454Units

### **Develop a roadmap to increase contribution of renewable energy in the overall energy consumption**

To have a continued focus on increasing renewable energy utilization to 100% which will also lead to reduction in GHG emissions, it is suggested to develop a detailed roadmap on RE utilization. The road map should broadly feature the following aspects -

- Renewable energy potential of VMTW and the maximum offset that can be achieved at VMTW
- Percentage substitution with renewable energy that VMTW wants to achieve in a specified time frame

### **Key tasks that need to be executed to achieve the renewable energy target**

- Specific financial break up for each of the projects highlighting the amount required, available and the utilization status as on date
- A regular review mechanism to ensure progress along the lines of the roadmap should be framed
- The roadmap should also highlight important milestones/key tasks, anticipated bottle VMTW & proposed

### **Renewable energy roadmap should be used as a base to frame GHG emissions reduction target**

It is suggested to use the developed renewable energy roadmap to correlate the GHG reduction that each of the renewable energy project will achieve. This approach will provide a base to set targets for reduction in GHG emissions. The action plan for renewable energy will shoulder the action plan for GHG emissions reduction and work towards achieving carbon neutrality.

### **Explore the option of other onsite and offsite renewable energy projects**

The renewable energy field has been witnessing many private investors due its increased market demand and attractive policies in many states. There are Renewable Energy Independent Power Producers (RE IPPs) who have installed RE based power plants like wind, small hydro and solar PV. GOC can consider having a long-term power purchase agreement with these RE IPPs in purchasing fixed quantity of power for a period of 5 to 10 years.

"Evolve a system to monitor the implementation of various GHG mitigation opportunities VMTW has an action plan to reduce its GHG emissions. VMTW should also evolve a system to monitor the implementation of various GHG mitigation opportunities. It is recommended to use a Gantt chart to mark out the action plan for the activities and track its implementation. Gantt chart will serve as an excellent way to instantly monitor and comprehend all different tasks in one place which would ease tracking of implementation.

### **Calculation for Installation of 25 kWp of Solar PV in VMTW campus**

Renewable energy is one of the important steps to be taken up by the college to reduce their overall carbon footprint. Based on the details provided by VMTW team, the roof area available at VMTW is around 83129.68 sq.ft. As an initial step, VMTW could look at installing 25kWp of solar PV which can generate 40,500 units per year. Still the renewable share will also reduce the 140 MT CO<sup>2</sup>e. For the current assessment year power consumption is 50454 units/year. Still another

100kWp of roof top can be utilized for solar power to expand in stepVMTW. However, for this report calculation, only 25 kWp capacity is considered.

A renewable energy capacity of 25 kW of solar panel may be installed can generate 40,500 units of electricity per year. Additionally, 25 kWp of solar rooftop can offset 33 MT CO<sub>2</sub>e per annum. RESCO model for solar rooftop installation:

A Renewable Energy Service Company (RESCO) is an ESCO Energy service company which provides energy to the consumers from renewable energy sources. RESCO or BOOT model is about pay as Ju consume the electricity.

- Solar Power Plant is owned by the RESCO or Energy Company
- Customer must sign a Power purchase Agreement (PPA) with actual investor at mutually agreed tariff and tenure
- Customer only pays for electricity consumed
- RESCO developer is responsible for its annual operations & maintenance (O&M)
- The RESCO gets the benefit by selling the surplus power generated to the DISCOM

# Energy Efficiency

Annual energy consumption of VMTW campus is 50454 units. There are major blocks in the campus which consumes energy for their operation. Major energy consumers are:

1. Fans
2. Air conditioners

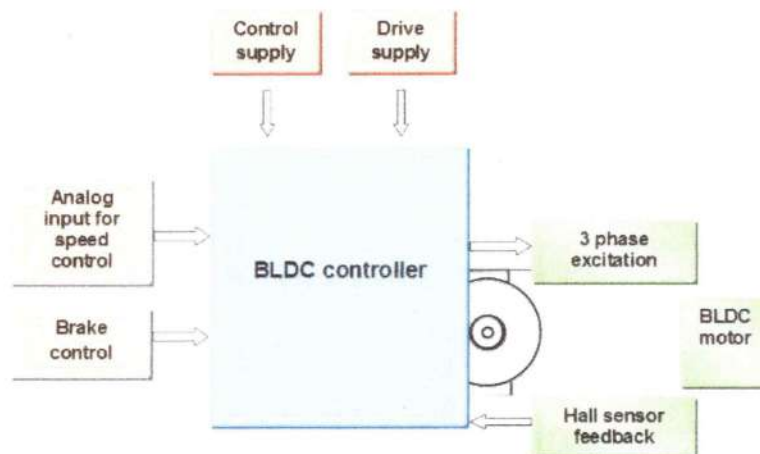

## Replace conventional tube lights with LED lamps

## Replace Conventional Ceiling Fans with Energy Efficient BLDC Fans

During the Energy Audit at VMTW, a detailed study was carried out to identify the potential for replacing the existing ceiling fans with BLDC super fans. There are 287 fans operating in VMTW campus.

Instead of conventional ceiling fans, latest technology BLDC fans which consume only 30W can be installed in the newly constructed building. A brushless DC (BLDC) motor is a synchronous electric motor powered by direct-current (DC) electricity and having an electronic commutation system, rather than a mechanical commutator and brushes. A BLDC motor has an external armature called the stator, and an internal armature called the rotor.

The rotor can usually be a permanent magnet. Typical BLDC motor-based ceiling fan has much better efficiency and excellent constant RPM control as it operates out of fixed DC voltage. The proposed BLDC motor and the control electronics operate out of 24V DC through an SMPS having input AC which can vary from 90V to 270V. The operational block diagram of a BLDC motor is as follows:

With the replacement of existing ceiling fans with Super Fans the energy consumption is likely to reduce by 55% per fan. Considering 100 fans being replaced with super-efficient BLDC fans, 3.50 kW can be saved. Considering the average operating hours to be 2000 and unit cost as Rs.

7.50, the calculations are as follows:

Total no. of fans in college	:	287
No. of fans considered for calculation	:	100 (First cycle of change)
Energy consumption per fan	:	60W
Total energy consumption of fans	:	60W X 100 fans
	:	6 kW
super-efficient BLDC fans energy consumption:	:	30 W
Savings from 60W to 30 W	:	50%
Total savings in fans energy consumption	:	50% of 6kW
	:	3 kW
Savings per year	:	3kW x 2000 hrs X Rs. 7.50/unit
	:	Rs. 0.45 Lakhs
Investment	:	Rs. 2, 50,000
	:	5.5 months
Annual emission reduction potential	:	6.00 T CO2

**Install Air conditioners energy saver for spilt air conditioners:**

Present status: As per the data obtained from VMTW team, the campus has majorly 1.5 TR units installed. There are 23 spilt air conditioners installed.

**Recommendation:**

We recommend installing "Airtron", an energy saver that can be installed at every individual unit of AC. The Airtron is the world's most advanced AC SAVER, with all the controls of a Precision AC. The Airtron's dual sensors reference the Room and Coil & Ambient Temp, and uses complex, multiple algorithms in a "closed-loop circuit" to reduce the Compressor Run-Time, to ensure the high savings while maintaining and displaying the Set temperature accurately. The Airtron is Programmable for geographical location and climate and adapts automatically to changes in season and ambient conditions.

This unique device has been developed on Patent-Published technology and approved by leading MNC'S, PSU'S and Govt. Departments. The Airtron is validated by EESL (Energy Efficiency Services Ltd.), Ministry of Power, Government of India, for 44% savings. The Airtron has been validated on all AC's- Inverters, 5 Star, Splits, Multi-Splits, Packages, ducts, Windows, Cassettes from 1.0 - 20.0 TR, LG Ltd, Videocon Ltd, Tata Communications, L&T, Nestle, Ashok Leyland etc. The AIRTRON comes with a Remote for setting the Room Temperature, and in a Non-Flammable Polycarbonate Enclosure, with SMPS Power Supply, to tolerate wide Voltage and Current fluctuations, Surges, Spikes and Sags.

In our case, Airtron installation can reduce the energy consumption of each fixture by 15% on a conservative basis. For a total energy consumption, for air conditioners, as 20 units per hour, 3 units per hour can be saved. It is recommended to install Airtron energy saver in a phase VMTW manner preferably in the batches of 10 units.

Saving Calculation: Considering the operating hours to be 2000 and unit cost as Rs 7.50/-.

- Monetary annual savings : Rs 45,000/-
- Total investment : Rs 80,000/-
- Payback period : 22 months (2 years)
- Annual emission reduction potential: 4.92 MT CO2

**Replace Conventional Lamps with LED Lamps**

As per the data submitted, the total number of all the lighting fixtures installed are

- 1. LED Tube Lights : 190x20watts = 3,800Watts
- 2. Normal tube lights : 73 x 36watts = 2,628 Watts
- 3. LED bulbs : 04x22Watts = 88Watts
- 4. Normal bulbs : 0

Under failure replacement policy, at least 130 lamps can be changed in the first year.

Types of fixtures	36W Tube
No of fixtures	130
No of hours in Operation	2000

The campus should be keen in harnessing the day lighting available thereby reducing the use of artificial lighting.

Based on the occupancy, monitoring should be ensured to reduce excessive consumption of energy.

Major savings in energy through lighting fixtures can be achieved by replacing all the above existing fixtures with LED's meeting the required LUX levels. The LED's being less energy consuming while maintaining the equivalent lux is the more sustainable option. The replacement of lighting fixtures should be done as per failure replacement policy i.e. change the old fixture with LED when it fails

#### Advantages of LED

- **Lower energy consumption:** The energy consumption of LEDs is low when compared to the other conventional sources for the same amount of Lumen output.

#### Performance comparison of different type lights

Type of Lamp	Lumen/Watt	CRI	Life hours
HPSV lamps	90-120	Bad (22-25)	15,000-20,000
Metal Halide lamps	65-100	Good (65-90)	18,000
LED lamps	100-150	Very Good (>80)	10,000-12,000

- **High S/P ratio:** LEDs have higher scotopic/photopic ratio (S/P ratio). The eye has two primary light sensing cells called rods and cones - cones function in day light and process visual information whereas rods function in night light. The cone dominated vision is called photopic and the rod dominated vision is called scotopic. The S/P ratio indicates the measure of light that excites rods compared to the light that excites cones. In office environments, illumination is more effective if the S/P ratio is high as it is under scotopic region. LEDs hence are ideally suited for these applications as they have a high S/P ratio.
- **Longer life-time:** LEDs have longer life time of around 1,00,000 hours. This is equivalent to 11years of continuous operation or 22 years of 50% operation.
- **Faster switching:** LED lights reach its brightness instantly upon switching and can frequently be switched on/off without reducing the operational life expectancy.

15 | Page

- **Greater durability and reliability:** As LEDs are solid-state devices and uses semi-conductor material; they are sturdier than conventional sources that use filaments or glass. LEDs can also withstand shock, extreme temperatures and vibration as they don't have fragile materials as components.
- **Good Colour Rendering Index (CRI):** The colour rendering index, i.e., measure of a light sources' ability to show objects as perceived under sunlight is high for LEDs. The CRI of natural sunlight is 100 and LEDs offer CRI of 80 and above.

LED offers more focused light and reduced glare. Moreover, it does not contain pollutants like mercury. LED technology is highly compatible for solar lighting as low-voltage power supply is enough for LED illumination.

Calculations are as follows:

Existing Lighting fixtures	36W
Existing power consumption(kW)	4.5kW (130lamps)
Proposed LED wattage (W)	15
LED power consumption (kW)	1.95kW
Energy saving (kW)	2.55kW
Operating hours	2000

Annual monetary savings : Rs 38,250/-  
 Investment needed : Rs 90,000/-  
 Payback period : 2.5 years  
 Annual Emission reduction potential : 4.18MT of CO2.

# Conclusion

VMTW has initiated few energy efficiency activities in their campus. While REST Pvt Ltd appreciates the VMTW team for their efforts, we would like to emphasize that opportunity exists further reduce the energy consumption. Installation of renewable energy is to be given major focus. RESCO model can be adopted to install renewable energy without upfront capital investment. We in REST Pvt Ltd are sure that all the recommendations mentioned in the report will be implemented by VMTW team and the overall environmental performance of the campus will be improved.

## Environmental Audit (Water & Waste Management)

The REST Pvt Ltd acknowledges with thanks the cooperation extended to our team for completing the study at Vignan's Institute of Management and Technology for Women (VMTW).

The interactions and deliberations with VMTW team were exemplary and the whole exercise was thoroughly a rewarding experience for us. We deeply appreciate the interest, enthusiasm, and commitment of VMTW team towards environmental sustainability.

We are sure that the recommendations presented in this report will be implemented and the VMTW team will be further improve their environmental performance.

# Executive Summary

The growth of countries across the world is leading to increased consumption of natural resources. There is an urgent need to establish environmental sustainability in every activity we do. In a modern economy, environmental sustainability will play a critical role in the very existence of an organization.

An educational institution is no different. Built environment, especially an educational institution, has a considerable footprint on the environment. Impact on the environment due to energy consumption, water usage and waste generation in an educational institute is prominent. Therefore, there is an imminent need to reduce the overall environmental footprint of the institution.

As an Institution of higher learning, Vignan's Institute of Management and Technology for Women (VMTW) firmly believes that there is an urgent need to address the environmental challenges and improve their environmental footprint.

True to its belief, VMTW has installed solar panel and implemented rainwater harvesting in the campus. Continuing with rainwater harvesting, the college can also investigate the following recommendations:

- **Attain water positive status:** VMTW should focus on capturing the harvested rainwater to substitute freshwater consumption, work on sustainable groundwater beyond the fence and create a framework towards attaining water positive status over a period. Presently, VMTW is consuming nearly 5000 lt of fresh water per day. Since metering is not available, the water consumption is calculated rather than measure value. The first step is to increase the water conservation activities in the campus to reduce water consumption at source. The next step is to increase the rainwater harvesting capacity to completely offset the freshwater requirements of the plant. VMTW can also explore adopting lakes, desilting of ponds and restoration of water bodies in localities surrounding the campus. Water getting harvested in those structures can offset the freshwater consumption of the college.
- **Install water efficient fixtures:** The best way to conserve water is at the source. Therefore, VMTW will have to install water efficient fixtures to reduce water consumption. Some of the water efficient fixtures are:
  - Waterless urinals
  - Electronic taps (e-taps)
  - Electronic flush urinals (e-flush)
  - Foam taps
  - Spring loaded push taps
  - Low flush cistern
- **Install sewage treatment plant / rootzone treatment:** VMTW uses more than 5000 lt of fresh water per day. Considering that 3000 lt (least value) of water is being let to drain without

treatment, good opportunity exists to reduce freshwater consumption by treating the sewage water and using the recycled water for gardening and flushing application. Install biogas plant and phytoremediation in series to recycle water and reduce freshwater consumption.

- **Install water flow meters:** Water flow meters are vital in understating the water consumption patterns of the campus. Presently, the water consumption is calculated rather than being measured. Water flow meters gives an accurate status if water consumption in the campus and from the water consumption values, the roadmap for water conservation activities can be prepared.

- **Segregate waste at source:** VMTW has provided bins for waste collection. VMTW must embark on awareness creation methods to increase the effectiveness of collection and provide more bins for proper waste segregation.

- **Maintenance of waste management yard:** The waste management yard is to be maintained just like raw materials storage room. Waste is nothing but a resource in wrong place. Therefore, by maintaining the waste management yard, quality of wastes can be maintained.

# Environmental Audit

VMTW and REST are working together to identify opportunities for improvement in water management, and waste management. This report highlights all the potential proposals for improvement through the audit and analysis of the data provided by VMTW for water consumption and waste management. The report details the process conducted for the analysis such as on ground surveys performed for listing the type of water consumers with consumption per year, types of waste generated and disposal mechanisms.

## Submission of Documents

Environmental audit at VMTW was carried out with the help data submitted by VMTW team. VMTW team was responsible for collecting all the necessary data and submitting the relevant documents to REST Pvt Ltd for the study.

## Preliminary Study

After the receipt of documents, a desktop review of the data for quality check, followed by preliminary study was carried out by REST Pvt Ltd. In case of discrepancy/inadequacy/non-clarity of data, REST Pvt Ltd team got in touch with the VMTW team for clarification/additional information.

## Environmental Audit

Data submitted and collected during the visit was used to assess the water and waste management practices of the campus and finally provide necessary recommendation for environmental improvement.

## Note

Environmental audit is based on the data provided by VMTW team. The scope of the study does not include the exclusive verification of various regulatory requirements related to environmental sustainability.

REST Pvt Ltd has the right to recall the study, if it finds (a) major violation in meeting the environmental regulatory requirements by the location and (b) occurrence of major accidents, leading to significant damage to ecology and environment.

# Water Conservation

To achieve a water positive status by continuous reduction of freshwater consumption should be the ultimate focus of VMTW. Increased and focused attention should be given to attain water sustainability in future by inculcating the discipline of water conservation.

Fresh water consumption of VMTW : 5000 lt per day

Rainwater harvesting : Carried out for roof area

According to the report, 'Water in India: Situation & Prospects', India is the largest consumer of groundwater in the world with an estimated usage of 230 km<sup>3</sup> per year. Approximately 60 per cent of the demand from agriculture and irrigation, and about 80 per cent of the domestic water demand, is met through groundwater. As per the Department of Drinking Water and Sanitation nearly 90 per cent of the rural water supply is from groundwater sources. This has led to an increased pressure on aquifers and the resulting hydrological imbalance.

## Recommendations for water conservation

**1) Waterless urinals:** Waterless urinals look like regular urinals without a pipe for water intake. Men use them normally, but the urinals don't flush. Instead, they drain by gravity. Their outflow pipes conduits to a building's conventional plumbing system. In other words, unlike a composting toilet, which leaves you to deal with your waste, these urinals send the urine to a water treatment plant.

- a. Urine flows into the drain insert of the EcoTrap.
- b. Inside of the EcoTrap the urine moves through a floating layer of proprietary immiscible Blue Seal liquid, which creates a barrier, preventing sewer gases and urine odours from entering the restroom area.
- c. The urine below the Blue Seal barrier overflows into the central tube and travels down into the drain line.

Waterless Urinal

- d. Approximately 1500 sanitary uses are possible with just 3 ounces of BlueSeal. When the BlueSeal liquid is gone, it is simply replenished. This only takes about 20 seconds to perform and the EcoTrap is not touched.
- e. Urine sediments are retained within the EcoTrap. Replacement is easy and need only be done 2 to 4 times per year depending on traffic to the urinal. As tool called the X-Traptor must be used to remove the EcoTrap. The use of the special tool helps to minimize vandalism. The entire process of replacement only takes 3 to 4 minutes.

Waterless urinals are available for women. Indian manufacturers are supplying waterless urinals technology. Ekameco is one such company providing solution for women waterless urinals. You may visit [www.ekameco.com](http://www.ekameco.com) and mail [info@ekameco.com](mailto:info@ekameco.com) for more details on waterless urinals for women.

2) Volume reduction in flush tanks: One simple method is to add a one-liter equivalent water bottle in the flush tank thereby reducing its consumption majorly. One-liter savings in the tank will help to save approximately by 20% and doesn't require any investment.

3) Rainwater harvesting: Water harvesting or more precisely rainwater harvesting is the technique of collection and storage of rainwater at surface or in subsurface aquifer, before it is lost as surface run off. In artificial recharge, the ground water reservoirs are recharged at a rate higher than natural conditions of replenishment. According to a report by the Central Groundwater Board published in 2007, the selection of a suitable technique for artificial recharge of ground water depends on various factors. They include:

- a) Quantum of non-committed surface runoff available
- b) Rainfall pattern
- c) Land use and vegetation
- c) Topography and terrain profile
- d) Soil type and soil depth
- e) Thickness of weathered / granular zones
- f) Hydrological and hydrogeological characteristics
- g) Socio-economic conditions and infrastructural facilities available
- h) Environmental and ecological impacts of artificial recharge scheme proposed

### Rainwater Harvesting Techniques in Urban Area

In urban areas rainwater is available from roof tops of buildings, paved and unpaved areas. This water could be stored and used to replace freshwater as well as used for recharging the aquifer.

4) Display water balance/conservation status at entrance of all blocks for overall involvement of all students & staff.

It is suggested to display specific water consumption numbers in terms of domestic use at the entrance of each blocks to create awareness among all students and stakeholders visiting the facility. This daily/continuous awareness creation will ultimately help in reduction of water consumption by students.

### Electronic Taps (e-taps)

The latest trend in industries is to install electronic taps (e-taps). The advantages of using e-taps are as mentioned below:

- Unlike conventional taps, there is no twisting or turning in e-taps. They have a sensor, which cuts off water supply completely when not in use. This helps in saving up to 70% water during hand wash.

E-taps enable hands free operation. No fear of cross contamination or contact with germs. E taps score very high on hygiene. It is the most ideal choice for multipurpose and multi-user washrooms.

- E-taps can work efficiently up to raw water TDS of 1,800 ppm.

The touch free electronic taps, available in AC and DC models consume minimal power only. The AC model has an efficient battery back-up, while the DC model runs on just 4 alkaline batteries.

### **Operation of Electronic Taps**

This has been successfully implemented in several hotels & restaurants. Of late, several industries have also started implementing this proposal. Thus, there is a good potential to optimize the Fresh water consumption by replacing the existing taps with e-taps.

### Electronic flush (e-flush) urinals

The latest trend in industries is to install e-flush urinals. The advantages of using e-flush urinals are as mentioned below:

- E-flush urinals are fitted with a sensor, which senses the usage and flush with water for few seconds after use. This helps in saving 70% water during urinal flush.
- E-flush urinals enable hands-free operation and score very high on hygiene. It is the most ideal choice for multipurpose and multi-user washrooms.
- E-flush urinals can work efficiently up to raw water TDS of 1,800 ppm.
- The touch free e-flush urinals available in AC and DC models consume minimal power only. The AC model has an efficient battery back-up, while the DC model runs on just 4 alkaline batteries.

### Hand wash

#### Foam taps

Conventional taps are used in the hand wash areas which results in wastage of large quantities of fresh water. Foam taps are a better fit in these high consumption areas. They consume 25-30% less water than conventional taps.

### Spring loaded Push taps

Spring loaded push type tap is an alternate device for minimizing hand wash water. The spring-loaded push taps operate with the simple mechanism of pressing the knob for water. The knob is automatically released back to close position in 5-7 seconds. This saves about 30-40% of water compared to the conventional taps.

### Low flush cistern

The latest model closets are water efficient and operate in dual mode, with a single flush releasing 2 litres of water and the dual flush releasing 4 litres per flush. This results in excellent water savings.

### Install sewage treatment plant - Rootzone treatment:

VMTW uses more than 200 KL of fresh water per day. Considering 150 KL of water is being let to drain without treatment, good opportunity exists to reduce freshwater consumption by treating the sewage water and using the recycled water for gardening and flushing application. Install biogas plant and phytoremediation in series to recycle water and reduce freshwater consumption.

  
PRINCIPAL  
Vignans Institute of Management & Technology For Women  
Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (Dt)-501301  
Telangana State

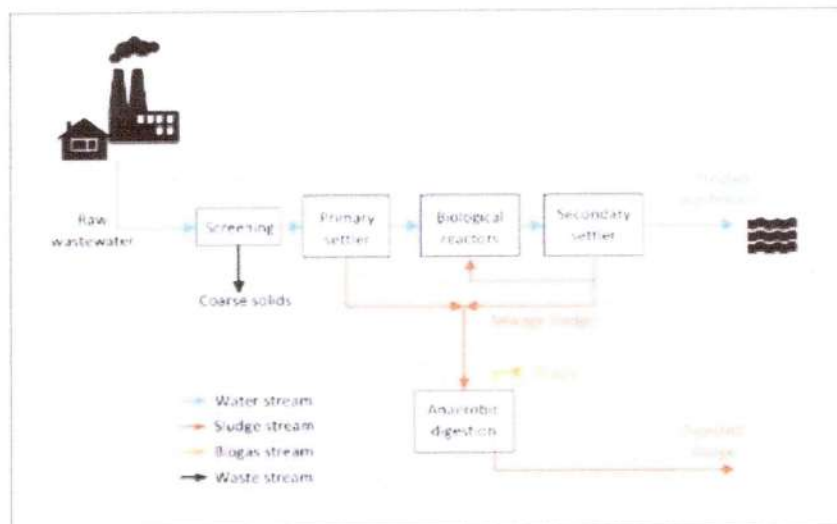

Presently, sewage water is being let out to the drain without treatment. An opportunity exists to generate biogas from the untreated sewage water and use the generated biogas to substitute LPG used (10cylinders/year) in the college.

### Biogas Production Potential of Wastewater

The sewage water is a useful waster as 1% of it in any quantity is a sludge which when subjected to anaerobic digestion will produce biogas. Wastewater is the effluent from household, commercial establishments and institutions, hospitals, industries and so on. Sewage water source contains large amount of organic material which can be efficiently recovered in as sludge which and when subjected to anaerobic digestion, the sludge produces methane gas (biogas).

Biogas is a mixture of gases containing 50-75% Methane, and 25-50% Carbon dioxide while 0-10% Nitrogen, 0-3% Hydrogen disulphide and 0-2% Hydrogen may be present as impurities which is produced by anaerobic digestion of organic material i.e. a sequential enzymatic breakdown of biodegradable organic

material (Biomass) in the absence of oxygen. The process is usually carried out in a digester tank known as biodigester. Biogas is an important energy source used as cooking gas, to generate electricity, etc. thus producing biogas from wastewater is an efficient and sustainable waste management and renewable energy technique. One of the major environmental problems of the world today is waste management and wastewater constitutes a huge environmental problem to the society thus the need for wastewater treatment to recover and also recycle the recovered water for usage.

**The physical process:** this is the mechanical treatment of the water that involves removal of debris from the raw wastewater right from the point it enters the plant. The screening and primary settling of debris. Wastewater enters the treatment plant through the inlet chamber from where it is channelled to the coarse screen that removes solid waste.

**The biological process:** this involve the biotreatment of the sewage in the bioreactors. It is the heart of the treatment plant where a biological process takes place. The bioreactors of a treatment plant are usually large tanks consisting of several mammoth rotors and submersible mixers. While the rotor introduces atmospheric oxygen into the sewage, the submersible mixers keep the biomass in suspension thus several reactions take place in the bioreactors.

*Principal*  
 PRINCIPAL  
 Vignan's Institute of Management & Technology For Women  
 Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (Dt)-501301  
 Telangana State

From the bioreactor, the sewage enters the sedimentation tank. Here the biological process ends and sludge is separated from water such that the clean water is passed to the disinfection tank for disinfection and onward discharge for use while the sludge is removed by the returned activation sludge (RAS) pump that removes and sends part to the anaerobic digestion chamber while some e return to the anaerobic bioreactor for reactivation.

Production of biogas is an anaerobic digestion whereby microorganisms break down biodegradable material in the absence of oxygen to produce methane/carbon dioxide used to generate electricity and heat. Sludge from the treatment plant (primary and activated sludge) is the main feedstock (biodegradable organic matter) in the biogas production plant of a wastewater treatment plant and the biogas production process involves series of steps. The combine sludge resulting from primary and secondary water treatment is gathered, sieved and thickened to a dry solids content of up to 7% before entering the digesters. Optionally, the sludge can be pre-treated by disintegration technologies with the aim to improve the gas yield. In the anaerobic digestion process, the sludge is pumped into the anaerobic continuously stirred tank reactors where digestion takes place. In the process, microorganisms break down part of the organic matter that is contained in the sludge and produce biogas, which is composed of methane, carbon dioxide and trace gases. The raw biogas produced is dried and hydrogen sulphide and other trace substances removed and burned in burners after treatment. The digested sludge is dewatered, and the water reintroduce into the treatment plant while the remaining undigested matter used for organic fertilizer.

#### Rootzone treatment:

Root Zone' is a scientific term used to cover all the biological activity among different types of microbes, the roots of plants, water soil and the sun. It consists planted filter-beds containing ravel, sand and soil. The RZWT system utilises nature's way of biologically processing domestic & industrial effluents. This effective technology called Decentralised Wastewater Systems (DEWATS) was developed in 1970s in Germany and has been successfully implemented in different countries mainly in Europe and America.

The root zone wastewater treatment system makes use of biological and physical-treatment processes to remove pollutants from wastewater. Due to its natural process, there is no need to add any input such as chemicals, mechanical pumps or external energy. This reduces both the maintenance and energy costs.

- To accomplish this, the root zone wastewater treatment undertakes the following steps:
- Pre-treatment done in a Settler - a device that separates the liquid from the solid First treatment takes place in an Anaerobic Baffled Reactor - a device with several identical chambers through which the effluent moves from top to bottom.
- Second treatment happens in an Anaerobic Filter - a device filled with a filter material (cinder), through which the effluent moves from top to bottom.

Third treatment takes place in a Planted Gravel Filter - a structure filled with gravel material and planted with water-resistant reed plants, which provide oxygen to the passing effluent.

The Root Zone Wastewater Treatment system takes into account the natural slope of the ground, so that water flows from one device to another without any ternal energy input such as motor pump. Once the reed plants create an established stand, usually after the first growing season, the reed bed requires little or no maintenance. The plant foliage will soon blend naturally into the landscape, ever changing with the seasons and creating a pleasing sight as well!

#### Install water flow meter:

Water flow meters are vital in understating the water consumption patterns of the campus. Presently, the water consumption is calculated rather than being measured. Water flow meters gives an accurate status if water consumption in the campus and from the water consumption values, the roadmap for water conservation activities can be prepared.

Water Meters would have many advantages:

- Encourage water conservation - important given strain on water resources
- Encourage allocatively efficient distribution. People would consume to where the marginal cost = marginal utility

## Waste Management

India has drawn world's attention with its high paced urbanization and industrialization. Over the last decade, India has emerged as the fastest growing country with rapid economic growth. A renewed focus on sustainable growth and development is imperative as India strives to maintain its high GDP growth rate in its pursuit of achieving developed country status by the year 2022. However, the flip side of higher economic growth has resulted in increased consumption of the natural resources, increased waste generation and hence ecological degradation.

**Present status:** VMTW has initiated waste management activities inside its facility. Separate bins have been provided (dry and wet waste) for different types of wastes. Waste bins are provided throughout the campus and students are being urged to use the bins effectively.

**Recommendation:** The waste management yard must be maintained in a similar fashion as that of a raw material storage room. Therefore, a total revamp of the waste storage yard is to be carried out. By doing so, the quality of the materials stored in the yard will not deteriorate and can be used as a raw material for a subsequent process.

Enhance awareness creation, training and capacity building.

VMTW should focus on implementing sustainable waste management practices. VMTW should regularly interact with Pollution Control Board and TSDF operators to enhance knowledge on waste management. The team should also take efforts to communicate the waste management and other policies and activities to all students in the college.

### **Achieve zero liquid discharge status:**

VMTW may install a STP to treat and recycle water. The treated water from STP can be used to substitute freshwater by utilizing the treated water in both high end and low-end applications.

# Conclusion

Environmental sustainability is a continuous process and there is always a scope for improvement. VMTW has displayed itself as an advocate of environmental sustainability by getting environmental audit carried out. The organization has implemented several initiatives and measures to enhance efficiency and to optimize resource intensity. The journey ahead in the path towards environmental excellence has immense scope for improvement as brought out by this report.

VMTW needs to focus and work on areas efficiency levels needs to be enhanced. For example: waste management. The observations and suggestions put forth by the report would help the facility in improving its environmental performance and pave way for ecologically sustainable growth.

This report may be taken as a guide and roadmap for achieving higher performance rating in environmental stewardship. As one of the pioneers and leaders VMTW shoulder the task of further 'learning-teaching-learning' to improve, excel, and continue the innovative efforts for success of their students and associates.

## Green Landscape Audit

The REST Pvt Ltd acknowledges with thanks the cooperation extended to our team for completing the study at Vignan's Institute of Management and Technology for Women (VMTW).

The interactions and deliberations with VMTW team were exemplary and the whole exercise was thoroughly a rewarding experience for us. We deeply appreciate the interest, enthusiasm, and commitment of VMTW team towards environmental sustainability.

We are sure that the recommendations presented in this report will be implemented and the VMTW team will be further improve their environmental performance.

Kind regards

Your sincerely

# Executive Summary

The growth of countries across the world is leading to increased consumption of natural resources. There is an urgent need to establish environmental sustainability in every activity we do. In a modern academy, environmental sustainability will play a critical role in the very existence of an organization.

An educational institution is no different. Built environment, especially an educational institution, has a considerable foot print on the environment. Impact on the environment due to energy consumption, water usage and waste generation in an educational institution is prominent. Therefore, there is an imminent need to reduce the overall environmental footprint of the institution.

As an institution of higher learning, Vignan's Institute of Management and Technology for Women (VMTW) firmly believes that there is an urgent need to address the environmental challenges and improve their environmental footprint.

True to its belief, VMTW maintain an excellent landscaping in its campus. The whole campus is lush green, and trees are seen everywhere around the campus. REST congratulates the VMTW for their efforts to create a truly green campus.

Based on the data submitted by VMTW team, following improvement opportunities have been identified in the campus in terms of landscaping.

- Implement ecosystem restoration by development of theme gardens in used areas of the campus
- Develop green corridors between existing areas in the campus
- Develop natural areas to encourage bird roosting and nesting in built-up areas
- Increase tree density and canopy cover in the built-up areas by planting more fruit yielding trees.
- Conduct regular flora surveys for improving the existing data
- Develop strategies for regular monitoring prevention of invasive plant species.

  
PRINCIPAL 5 | Page

By addressing the improvement opportunities, the campus would be able to achieve the following benefits:

- Identifying & implementation of proper measure for conservation of endangered floral species in the campus
- Reduce the microclimate temperature of the campus by 1-2° C which is significant
- As many of the species have the capability to absorb contaminants in the air and therefore this would lead to better air quality in the campus
- This can evolve as an excellent educational campus for spreading awareness on biodiversity and benefit the nation at large.

# Introduction

## **Urbanisation and its effect on loss of biodiversity**

Urbanization causes biodiversity to decline. As cities grow vital habitat is destroyed or fragmented into patches not big enough to support complex ecological communities. In the city, species may become endangered or even locally extinct as natural areas are swallowed up by the urban jungle.

Ironically, it is urban growth that is often responsible for the introduction of non-native species, either accidentally or deliberately, for food, pets or for aesthetic reasons.

## **Documentation of Flora**

Knowledge on biodiversity of any geographical region is a paramount importance for sustainable management and conservation plans. The foremost task in the conservation process is to prepare an inventory of species. It is necessary to have full knowledge regarding the habit, habitat, distribution and phenology of various plants for their proper conservation.

The documentation of flora will help in identifying, documenting and promoting the conservation of native flora in India. This in turn will help in promoting native species for landscapes as they suit one growing interest in "Low maintenance" gardening and landscaping.

Many species are vigorous & hard and can survive winter, cold, and summer heat. These species once established, can flourish without irrigation or fertilization and are resistant to most pests & diseases.

## **Need for documentation of Flora**

The knowledge building on significance and importance of various flora existing around us is the need of the hour. Loss of the biodiversity is likely to result in loss of various other taxonomic groups.

## **Serve as a ready reckoner:**

Most of the campuses have huge landscape with diverse floral species. Nevertheless, the availability of information on these species is minimal. Hence, the documentation of the species would serve as an educational material on the details of species existing within the campus.

**Public Visibility:**

Despite having various biodiversity initiatives in place within the campus most of the campuses lack the visibility of the measures taken in conservation. The study will create awareness & visibility of the campus on various conservation measures implemented to the occupants as well as to the visitors.

Also, the organization will gain globally amongst its shareholders for the positive steps taken towards protecting biodiversity.

**Conservation of Species:**

Due to Urbanization most of the floral species are under tremendous pressure. The need of the hour is to conserve and protect these species. The study would help in identifying such species in the campus which need to be conserved.

# VMTW carbon sequestration through plantation

Carbon sequestration through plantation is one of the important steps towards achieving carbon neutrality. In carbon footprint calculation of VMTW, carbon sequestration through plantation is considered and due credit has been given.

No. of trees considered for carbon footprint calculation	: 128trees
CO2 absorbed by a tree in one year	: 18 kg
Total CO2 sequestered	: 128trees x 18 kg of CO2/year
	: 2304 kgs of CO2
	: 2.3 tonnes of CO2

# Plantation & Maintenance techniques

## Selection of species

- Native species like Azadirachta indica (Neem), Pongamia pinnata (Pongam tree), Cassia fistula (Indian shower tree), Butea monosperma (Flame of the forest) and also fruit bearing species like Mangifera indica (Mango), Manilkara sapota (Chikoo), Syzygium cumini (Jamun Tree), Psidium guajva (Guava), Annona squamosa (Custard apple), Punica granatum (Pomegranate), Phyllanthus emblica (Indian Gooseberry), Citrus sinensis (Sweet lime) and Citrus limon (Lime) to be selected for plantation. Neem, Mango, Palm, Areka palm, Purple heart plant, Spanish cherry, Strelitzia Nicolai and Other Trees already planted in VMTW.
- Saplings of 2-3 ft height to be considered for plantation in public areas.
- Plantation can be taken up as avenues (roadside plantation) and green belts (thick plantation in one area).
- Fruit plantation can be taken up in protected areas, institutions with large areas. Special care to be taken in maintenance since these plants also generate revenue.

## Digging of pits

Pits to be dug about one month prior to the plantation date and it should be exposed to sunlight

This will help in killing of harmful disease-causing bacteria and virus.

1. In places of no availability of proper sunlight, dry trash to be filled in the pit and burnt.
2. Pit size should be normally 2ft or 3ft and in soils which are very hard 4ft<sup>3</sup> or above to be dug.
3. Further to the digging of pit, the bottom of the pit should be loosened up to 6-9 inches.
4. While digging, we can observe different soil profiles. Topsoil will be soft and contains enough nutrients for nourishing the plant. The topsoil should be deposited on one end and hard soil on the other end. While filling the pit with soil, the topsoil only should be used. The topsoil from the non-plantation area around the pit to be collected and mixed with manure and used for filling of the pit.

## Transportation

- Visit to the nurseries and enquire about plant species like availability, size, age and girth prior to the plantation. Also, the size of the packet in which the plant is existing to be enquired.
- Ensure that the material is available in the nursery and allotted to pick up
- The saplings to be watered one or two days prior to the movement of plants to plantation area
- The plants to be procured at least 15 days prior to plantation.
  - The saplings to be watered as soon as they reach the plantation area and regularly thereafter.
  - They should be kept in shade, non-windy & protected areas.

The above said steps to be followed for movement of plants near to the pits within the plantation area. Enough water to be stored for watering the plants after plantation. Also, tools and manpower to be kept in place to ensure proper plantation of saplings. If the sapling is bushy with many branches, then the branches are to be trimmed before plantation.

## Plantation

- The poly bag around the root ball to be carefully cut with a knife / sickle / scissors without disturbing the roots
- Rope and stakes are to be kept ready to support the plant after plantation.
- Regular watering to be done to the plants followed by mulching (loosening of top 3-4 inches of soil)
- Mulching will help in conservation of moisture, aeration of roots and control of weeds.
- Note: At least 5% of extra plants to be procured for timely gap filling and to ensure 100% survival. Care to be taken for these plants like other plants.

# Recommendations for Enhancing Flora in Campus

## 1. Implement Ecosystem Restoration

- Develop naturalised areas in the Open Area segments
  - Wastelands in the campus can be converted to a park
- 'Theme Gardens' can be developed in unused areas of the campus to increase proportion of natural area

## 2. Enhance Ecosystem Protection

- Protect and maintain the existing Open Area segments

## 3. Planting more fruit yielding trees

- Increase tree density and canopy cover in the built-up areas

## 4. Increase number of Native Plants in the Landscape area

- Increase native plants to boost native biodiversity
  - Bees, butterflies and other insects
- Healthy native plant growth will help in easy identification of invasive alien species

## 5. Introduce more native species in Open Areas

## 6. Preventing/ Decreasing Invasive Alien Species Spread

- Identify potential threatening species in advance and implement quarantine measures
- Mass Eradication techniques for larger spreads
- Commitment to complete eradication
- Manual Uprooting of small populations

## 7. Develop natural areas to encourage bird roosting and nesting in built-up areas

## 8. Introduce features to attract birds in the built-up areas

- Bird feeders
- Water troughs/ Bird baths
- Nesting material

## 9. Improve measures for rainwater harvesting in paved and un-paved areas

- Open fields, parks, pavement landscapes, etc.
- Develop outdoor parks in open areas

# Conclusion

As seen in the carbon sequestration calculation, tree plantations lead to a tremendous reduction in net emissions of the campus. Therefore, VMTW needs to develop a roadmap to include tree plantation as a strategy to reduce overall carbon emissions of the campus.

Two or three small ponds may be developed in the campus for aquatic plants and water source of campus birds.

More Biodiversity conservation and preservation methods are suggested and University may apply for a branding or ranking w.r.t. its biodiversity.

Water ponds in the form of Rain water cum Roof water harvesting ponds should be developed and it will improve aquatic biodiversity also.

Heritage trees identified must be well preserved and protected taking it as a pride and privilege. It develops a strong sense of love, respect and reverence to the visitors of the campus.

Shri A Rajarajan,  
Director of Satish Dawan Space Center (SDSC).  
SHAR, Sriharikota, Nellore Dist-524124

**Sub: Permission for Industrial visit—Reg.**

Dear Sir,

We are one of the 8 well reputed engineering Institutions under Vignans's Group of Institutions, situated in Kondapur about 15kms from city of Hyderabad. We are always ranked within first 10 ranks in JNTUH. We have B.Tech. Courses in many branches of engineering, including ECE and CSE. We would like our students to get exposed to industrial environment and more importantly industry practices, which would help them, upon their entry into any industry, to get set faster for the industry environment and deliver their jobs efficiently.

We wish to organize an industrial visit to SHAR, during the 2<sup>nd</sup> week of March, 2022. We understand that SHAR is on the forefront to nurture the students of nation and would play a vital role in contributing their knowledge. We wish to get an opportunity for our women engineers to visit your organization and understand real-time entrepreneurial activities. We wish to arrange this visit for III B. Tech. Students on 8<sup>th</sup> & 9<sup>th</sup> of March, 2022. Request you to let us know the feasibility of the dates mentioned. Kindly accord permission for 152 students for a visit to your campus.

Thanking you.

Yours sincerely

## Department of Computer Science and Technology

11-03-2022

### NOTE

Sub: Report of Industrial Visit to "Satish Dawan Space Center" conducted on 09 March, 22- reg.

#### **EVENT DESCRIPTION:**

An Industrial visit has been organized by Department of Computer Science Engineering for III year Students on 09<sup>th</sup> March, 2022. The Main objective of the visit was to provide a technical Exposure to the students about Space Technology.

Totally 150 students of III year CSE of Vignans Institute of Management and Technology for Women) Visited ISRO, SATHISH DHAWAN space center.

#### **SESSION ACTIVITIES:**

The students were accompanied by 4 faculty members. The buses with students have started from our college city office at 10:00 pm on 10/03/2022 and reached the ISRO campus at 10:30 am.

ISRO VISIT: Students visited ISRO and learnt about

- LCC (launching control centre)
- MCC (machine control centre)
- SLP(second launch pad )
- FLP(first launch pad )
- ISTRAC(ISRO telemetry tracking and network centre)

Forenoon session, we visited the space museum in the same campus the visit came to an end at 4:30 pm. It was informative, interesting and successful visit.

SATISH DHAWAN SPACE CENTRE (SDSC) or SRIHARI KOTA HIGH ALTITUDE RANGE (SHAR) is a rocket launch centre operated by Indian space research organization (ISRO). It is located in Sriharikota in Andhrapradesh. The Sriharikota range has been chosen for its proximity to the equator and to use the rotation of the earth. It is close to lake PULIKAT and it is about 100km north of Chennai and close to the BAY OF BENGAL.

We learnt about the computer system used in LCC for launch control. In MCC(machine control centre) is the focal point controlling vehicle. There are 8 hold buttons at different places around the range in case of abnormalities in sub-systems, the hold button is used to terminate the count down. In case the abnormality has been resolved the first row is used to supervise to control

the operations on the vehicle various chiefs of operations are seated in these rows is computers are connected by Ethernet and fiber optics.

FIRST LAUNCH PAD (FLP) is the polar

satellite launch vehicle (PSLV). it is one of the 2 orbit launch pads at the site the other been the second launch pad. Unlike the UMBILICAL type this is a PEDESTAL type the whole tower moves away from the rocket just before the blast off.

ISTRAC (ISRO TELEMETRY TRACKING AND COMMAND NETWORK) is about the ground stations which are located at Bangalore, Lucknow, Mauritius, Sriharikota, Portblair Thiruvananthapuram and the deep space network stations.

Many Students said "WANT TO WORK IN ISRO" due to the inspiration. We expressed our thanks to the management of kits, principal, head of the department of ECE/CSE who permitted us to go on the visit, the faculty members who accompanied us and the officials who explained about the various departments on behalf of the students we request you to arrange more industrial visit for students which can practically train the students.

#### Objective:

The workshop aimed to familiarize participants with the fundamental concepts of quantum computing, its potential applications, and the current state of the field. The event consisted of lectures, hands-on activities, and discussions, providing a comprehensive learning experience.

#### Outcomes:

The workshop successfully introduced participants to the exciting field of quantum computing, providing them with a strong foundation in quantum mechanics, algorithms, and technologies. The hands-on activities and group discussions enhanced their understanding and fostered collaborative learning.

The workshop served as a stepping stone for further exploration and engagement with quantum computing, inspiring participants to pursue further study and research in the field.

#### **Objective of the Event:**

The Main objective of implementing advanced machine learning algorithms using Python programming Improves Prediction Accuracy, Handle Large and Complex Data, Enhance Model Interpretability, Optimize Model Performance, Address Specific Challenges.

#### **Outcomes of the Event:**

The outcome of this online Workshop on "Advanced Machine learning algorithms using Python programming" is, implementing advanced machine learning algorithms using Python programming is to leverage the power of these techniques to achieve better performance, handle complex data, gain interpretability, optimize resource utilization, and solve specific challenges in various domains.

Report on "Advanced Frameworks in Java"

Date: 23-04-2021

Event Type : Online Workshop
Total No. of Participants : 35
Resource Person : Komal Srinivas.T
Technical Manager,
Aditi Software Pvt.Ltd.
Name of Coordinator : Mrs. K. Helini

The Online workshop on "Advanced Frameworks in Java" was held on 19-04-2021 through online. The workshop aimed to provide participants with an in-depth understanding of advanced frameworks used in Java development, their features, and how to effectively utilize them to build robust and scalable applications. The workshop was attended by 35 students in online.

Outcomes of the Event:

The workshop on "Advanced Frameworks in Java" provided participants with valuable insights into modern frameworks used in Java development. By focusing on the Spring Framework, Hibernate, and JSF, participants gained practical knowledge and hands-on experience in utilizing these frameworks effectively. The workshop aimed to empower participants to build robust and scalable Java applications, leveraging the power of advanced frameworks.

The feedback received from participants was overwhelmingly positive, highlighting the comprehensive content, interactive sessions, and practical exercises as major strengths of the workshop. Participants expressed their enthusiasm to apply the knowledge gained in their professional projects and further explore advanced frameworks in Java.

## ABOUT THE COURSE

This course is for anyone passionate in learning how a hardware component can be adapted at runtime to better respond to users/environment needs. This adaptation can be provided by the designers, or it can be an embedded characteristic of the system itself. These runtime adaptable systems will be implemented by using FPGA technologies. Within this course we are going to provide a basic understanding on how the FPGAs are working and of the rationale behind the choice of them to implement a desired system.

## COURSE OBJECTIVES

The objectives of the course are to: Learn Programmable Routing and Interconnect. Understand the the various features of PSoC Designer for configuring the digital and analog modules. Explain the the hardware and software components for mixed signal components. Learn the PSoC Hardware Components, PSoC Software Components.

## EXPECTED OUTCOMES

After studying this course, students will be able to:

- Explain the basic concepts and families of PSoC.
- Recognize the various features of PSoC architecture and programmable blocks.
- Analyze the various features of PSoC Designer for configuring the digital and analog modules
- Design the hardware and software components for mixed signal components.
- Develop the programming skills for interfacing various I/O modules to PSoC.

**Name of the Add on Course:** Challenges in Design of PSOCs

**Day/Duration:** 33 hours

**Time:** 4:00pm to 5:00pm

**Resource Person:** Mr. Ranveer Singh, True chip Pvt.Ltd. Hyderabad

**Name of the Coordinator:** Mr.J.SunilKumar, Assistant Professor, VMTW, Hyderabad.

**Number of the Participants:** 98

**Topics covered:** The following topics covered in this program

- SOC
- PSOC

**Course Outcomes:**

COs	At the end of the course, students will have the ability to:	POs Mapped	Strength of mapping
CO1	Learn the Basic concepts in Processor Architecture	PO2, PO5	3
CO2	Analyze the memory design for SOC	PO3 , PO4	2
CO3	Understand the memory design for SOC and overview of SOC external memory	PO2, PO3,PO6	1
CO4	Analyze the Interconnect Customization	PO5 , PO7	2

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

### CIRCULAR

This is to inform all the IV B.Tech ECE students that there will be an Add on course on " **Modern Chip Design and Its Applications** " in association with True chip Pvt Ltd. from **13-09-2021 to 30-10-2021** All students are invited to take part in this course. The participating students will be honored with certificates of participation. During the course you will be encouraged to interact with the speaker and the other participants through the case study discussions. Hence those who are interested can sign in registration form.

## ABOUT THE COURSE

Introduction to IC Technology – MOS, PMOS, NMOS, CMOS & BiCMOS Basic Electrical Properties: Basic Electrical Properties of MOS and BiCMOS Circuits VLSI Circuit Design Processes: VLSI Design Flow, MOS Layers, Stick Diagrams, Design Rules and Layout, Transistors Layout Diagrams for NMOS and CMOS Inverters and Gates, Scaling of MOS circuits Gate Level Design: Logic Gates and Other complex gates, Switch logic. Data Path Subsystems Programmable Logic Devices: Design Approach – PLA, PAL, Standard Cells FPGAs, CPLDs. CMOS.

## COURSE OBJECTIVES

The objectives of the course are to: Give exposure to different steps involved in the fabrication of ICs. Explain the electrical properties of MOS and BiCMOS devices to analyze the behavior of inverters designed with various loads. Give exposure to the design rules to be followed to draw the layout of any logic circuit. Provide design concepts to design building blocks of the data path of any system using gates. Understand basic programmable logic devices and testing of CMOS circuits.

## EXPECTED OUTCOMES

The student will be able to. Acquire qualitative knowledge about the fabrication process of integrated circuits using MOS transistors. 2. Draw the layout of any logic circuit which helps to understand and estimate the parasitic effect of any logic circuit. Design building blocks of data path systems, memories, and simple logic circuits using PLA, PAL, FPGA, and CPLD. Understand different types of faults that can occur in a system and learn the concept of testing and adding extra hardware to improve the testability of the system

### PROGRAM REPORT

**Name of the Add on Course:** Modern Chip Design and Its Applications

**Day/Duration:** 33 hours

**Time:** 100

**Resource Person:** Mr. Ranveer Singh, Truechip Pvt. Ltd. Hyderabad

**Name of the Coordinator:** Mr.T.Pullaiah, Associate Professor, VMTW, Hyderabad

**Number of the Participants:**100

**Topics covered:** The following topics covered in this program

- ❖ Fabrications of ICs
- ❖ MOS/CMOS/BiCMOS

#### **Course Outcomes:**

COs	At the end of the course, students will have the ability to:	Pos Mapped	Strength of mapping
CO1	To Learn basic programmable logic devices and testing of CMOS circuits	PO2,PO4	2
CO2	To Understand the electrical properties of MOS and BiCMOS devices	PO3,PO5	3
CO3	Give exposure to different steps involved in the fabrication of ICs	PO2,PO4,PO7	2
CO4	Understand basic programmable logic devices and testing of CMOS circuits	PO3,PO5	3

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

Respected sir,

I am Mr. Vijaykumar Rewnath Urkude, HOD, Dept of ECE, Vignan's Institute Of Management And Technology For Women, Ghatkesar, Hyderabad, Telangana. We are planning to conduct a two day workshop on "The Integrated Circuit Design - How do integrated circuit works and how it is made" on 14<sup>th</sup> and 15<sup>th</sup> September 2020 to enhance the knowledge of the students. I request to send approval for conducting workshop

Thanking you

## ABOUT THE INSTITUTION

Vignan's Institute of Management and Technology for Women (VMTW), is the brainchild of Dr. L. Rathalah, Chairman, Vignan Group of Institutions, which was founded in August 2008, with four branches of Engineering.

VMTW is an exemplary institution of higher learning with a mission of pursuing excellence in education and research. The institution, with its diverse and dynamic community of about 2000 students offers a distinctive combination of some of the finest facilities for 7 different graduate, and undergraduate programs, accomplished faculty, world-class facilities with a hostel set on a sprawling area of 22 acres with lush surroundings of mango groves and greenery.

While students at VMTW immerse themselves in academics, the college has a lot in store for them outside the classroom. Student life includes participation in sports, recreational & extra-curricular, and cultural activities. In short, at VMTW students will find an academic and social environment where everyone from faculty members to peers helps shape their future.

VMTW is a home to aesthetically designed buildings with state-of-the-art computer and internet facilities, modern laboratories, workshops, seminar halls, auditoriums, and well-stocked libraries, sports, and games fields.

The Institution boasts of a strong alumni network with alumni events held every year serving as a platform for past students to give back to VMTW and share their experiences with their present fellow students. With so much to offer, it is only natural that students of VMTW get a unique opportunity to carve a niche for themselves in their chosen field of study that enables them to become well-rounded and discerning professionals, fully qualified for their chosen professions in the workplace. Institute also brings out the creativity in students by imparting engineering knowledge imbuing interpersonal skills to promote innovation, research, and entrepreneurship.

## ABOUT THE DEPARTMENT

Department of Electronics and Communication Engineering was started since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. The strength was enhanced to 120 during 2010. The Department had added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 24x7, 30 MBPS internet facility.

## ABOUT THE COURSE

Integrated circuits revolutionized electronics and computing during the 1960s and 1970s. First, engineers were putting dozens of components on a chip in what was called Small-Scale Integration (SSI). Medium-Scale Integration (MSI) soon followed, with hundreds of components in an area of the same size. Predictably, around 1970, Large-Scale Integration (LSI) brought thousands of components, Very-Large-Scale Integration (VLSI) gave us tens of thousands, and Ultra Large Scale (ULSI) millions—and all on chips no bigger than they'd been before. In 1965, Gordon Moore of the Intel Company, a leading chipmaker, noticed that the number of components on a chip was doubling roughly every one to two years.

## COURSE OBJECTIVES

Moore's Law, as this is known, has continued to hold ever since. Interviewed by The New York Times 50 years later, in 2015, Moore revealed his astonishment that the law has continued to hold: "The original prediction was to look at 10 years, which I thought was a stretch. This was going from about 60 elements on an integrated circuit to 60,000—a thousandfold extrapolation over 10 years. I thought that was pretty wild. The fact that something similar is going on for 50 years is truly amazing."

## EXPECTED OUTCOMES

At the end of Workshop, participants will be able to

- How Integrated Circuit Components are Formed
- Design Process.
- Raw Materials information.
- The Manufacturing Process.

Conclusion report on "The Integrated Circuit Design - How do integrated circuit works and how it is made"

**Sub:** conclusion Report of "How do integrated circuit works and how it is made" conducted on 14<sup>th</sup> & 15<sup>th</sup> September, 2020—reg.

The workshop was aimed to provide knowledge about Integrated circuits Mr. S. Rajeev Patnaik, True Chip Solutions Pvt. Ltd, Lajpat Nagar ,New Delhi, executed 2-days Workshop on "The Integrated Circuit Design - How do integrated circuit works and how it is made". After attending this workshop students have expressed, IC Design process , Raw Materials information ,the Manufacturing Process and applications in any Electronics Project. This workshop will be helpful for students for circuit development of their final year project. Total 95 students have participated in this workshop. The workshop was an informative and interesting. All the students of ECE had a practical exposure about the Integrated Circuit Design.

On behalf of the students I request you to arrange more workshops for students to improve the knowledge of students and enhance the career opportunities.

## A TWO DAY WORKSHOP ON "UNDERSTANDING RECTANGULAR WAVEGUIDES" 5<sup>TH</sup> & 6<sup>TH</sup> NOVEMBER, 2021

VENUE:  
**'B'-BLOCK SEMINAR HALL, VMTW**

ORGANIZED BY:  
**DEPARTMENT OF ELECTRONICS AND  
COMMUNICATION ENGINEERING**

## ABOUT THE INSTITUTION

Vignan's Institute of Management and Technology for Women (VMTW), is the brainchild of Dr. L. Rathaiah, Chairman, Vignan Group of Institutions, which was founded in August 2008, with four branches of Engineering.

VMTW is an exemplary institution of higher learning with a mission of pursuing excellence in education and research. The institution, with its diverse and dynamic community of about 2000 students offers a distinctive combination of some of the finest facilities for 7 different graduate, and undergraduate programs, accomplished faculty, world-class facilities with a hostel set on a sprawling area of 22 acres sylvan surroundings of mango groves and greenery.

While students at VMTW immerse themselves in academics, the college has a lot in store for them outside the classroom. Student life includes participation in sports, recreational & co-curricular, and cultural activities. In short, at VMTW students will find an academic and social environment here everyone from faculty members to peers helps shape their future.

VMTW is a home to aesthetically designed buildings with state-of-the-art computer and internet facilities, modern laboratories, workshops, seminar halls, auditoriums, and well-stocked libraries, sports, and games fields.

The Institution boasts of a strong alumni network with alumni events held every year serving as a platform for past students to give back to VMTW and share their experiences with its present fellow students. With so much to offer, it is only natural that students of VMTW get a unique opportunity to carve a niche for themselves in their chosen field of study that enables them to become well-rounded and discerning professionals, fully qualified for their chosen professions in the workplace. Institute also brings out the creativity in students by imparting engineering knowledge imbining personal skills to promote innovation, research, and entrepreneurship.

## ABOUT THE DEPARTMENT

Department of Electronics and Communication Engineering was started since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. The strength was enhanced to 120 during 2010. The Department had added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 24x7, 30 MBPS internet facility.

## ABOUT THE COURSE

In electromagnetic, a waveguide confines electromagnetic signals within the structure, preventing spreading, losses, and signal transmission from one point to another. Usually, a basic waveguide can be constructed from a hollow conducting tube. If the conducting tube has a rectangular cross-section, then it forms the rectangular waveguide. In the section below, we will discuss various aspects of rectangular waveguide theory.

## COURSE OBJECTIVES

Rectangular waveguides are the most commonly used waveguides. They consist of a hollow metallic structure with a rectangular cross-section. A rectangular waveguide is usually constructed with a length of  $a > b$ , where  $b$  is the breadth of the rectangle. A common trend for the dimension of a rectangular waveguide is  $a = 2b$ .

## EXPECTED OUTCOMES

At the end of Workshop, participants will be able to

- Usually, a basic waveguide can be constructed from a hollow conducting tube. If the conducting tube is rectangular in shape, then it forms a rectangular waveguide.
- Rectangular waveguides are extensively used in radars, couplers, isolators, and attenuators to transmit signals.
- The electromagnetic fields corresponding to  $(m, n)$  are called  $TE_{mn}$  mode. The  $TE_{10}$  mode is the dominant waveguide in rectangular waveguides.

Sub: Request permission for our B. TECH Students to visit your Organization-Reg.

Dear Sir,

We are one of the 8 well-reputed engineering institutions under Vignans Group of Institution, situated in Kondapur, Ghatkesar about 15kms from the city of Hyderabad. We are always ranked within first 10 ranks in JNTUH (Hyderabad). We would like our student to get exposed to the industrial environment and more importantly industry practices, which would help them, upon their entry into any industry, to get in industry environment faster and deliver their jobs efficiently.

We are very much interested to bring our students to your esteemed Organization for an industrial visit. Two of our faculty will accompany the students for maintaining discipline and order during the visit. We assure you that we would not disturb your regular work/production and conduct our student with utmost discipline.

I request you to kindly grant permission for 100 students visiting on two Sessions in one day.

Thanking you,

Yours sincerely,

**Outcomes:** The workshop on Image Processing provided students with a comprehensive understanding of image processing techniques, their applications, and practical implementation. Participants gained hands-on experience through practical exercises and projects, enhancing their ability to analyze, enhance, restore, and segment images. The workshop successfully equipped participants with valuable skills in the field of image processing.

The workshop on Image Processing proved to be an enriching experience for students, enabling them to apply image processing techniques effectively in various domains and fostering their interest in further exploration of the field.

### Report on PATTERN RECOGNITION

**Type of Program:** Workshop

**Date:** 04-10-2019 to 06-10-2019

**No. of Students Participated:** 63

**Faculty Coordinator:** Mrs. D. Swaroopa

**Resource Person:** Mr. S. VamshiKrushna, Associate Professor, Department of CSE,  
Samskruti College of Engineering & Technology.

**Objective:** The workshop on Pattern Recognition was held 04-11-2019 to 06-11-2019 at VMTW. The event aimed to provide students with an in-depth understanding of pattern recognition techniques and their applications across various domains. The workshop commenced with an overview of pattern recognition, emphasizing its significance in computer science, artificial intelligence, and data analysis. The instructors highlighted the fundamental concepts, such as feature extraction, classification algorithms, and evaluation metrics used in pattern recognition systems.

**Outcomes:** The workshop on Pattern Recognition provided a comprehensive overview of key concepts, techniques, and applications in the field. Participants gained practical skills through hands-on exercises, enabling them to apply pattern recognition algorithms in real-world scenarios. The workshop successfully enhanced the students' knowledge and understanding of pattern recognition, promoting their ability to leverage these techniques in their respective domains.

Overall, the workshop on Pattern Recognition proved to be a valuable learning experience, equipping participants with the necessary knowledge and practical skills to excel in the field of pattern recognition and its application

**Name of Coordinator** : S.Dilli Babu  
**Date & Time** : 19-12-2019 to 21-12-2019  
10:00AM to 4:00PM

#### **Objective of the Event:**

The Main objective of Game Theory and Practices using Artificial Intelligence is to analyze strategic interactions, optimize resource allocation, design effective mechanisms, perform game-theoretic analysis, and develop intelligent agents for multi-agent systems.

#### **Outcomes of the Event:**

The outcome of combining game theory and AI is to leverage the insights and techniques from both fields to enhance decision-making, optimize resource allocation, design effective mechanisms, gain insights into complex systems, and develop intelligent agents for

multi-agent systems. These outcomes can have applications in various domains, including economics, social sciences, engineering, or computer science.

After completion of the workshop the students can develop intelligent agents that make better strategic decisions in competitive or cooperative scenarios. These agents can learn optimal strategies, adapt to changing

Environments, and exploit the weaknesses of opponents. The outcome is more effective decision-making in game-like situations, leading to improved performance, higher rewards, or increased chances of success.

Total 103 Number of members and 6 numbers of Staff had participated in the workshop.

This workshop session had provided an excellent opportunity to learn about **GAME THEORY AND PRACTICES USING AI** to all the participants.

## ABOUT THE INSTITUTION

Vignan's Institute of Management and Technology for Women (VMTW), is the brainchild of Dr. L. Rathalah, Chairman, Vignan Group of Institutions, which was founded in August 2008, with four branches of Engineering.

VMTW is an exemplary institution of higher learning with a mission of pursuing excellence in education and research. The institution, with its diverse and dynamic community of about 2000 students offers a distinctive combination of some of the finest facilities for 7 different graduate, and undergraduate programs, accomplished faculty, world-class facilities with a hostel set on a sprawling area of 22 acres sylvan surroundings of mango groves and greenery.

While students at VMTW immerse themselves in academics, the college has a lot in store for them outside the classroom. Student life includes participation in sports, recreational & co-curricular, and cultural activities. In short, at VMTW students will find an academic and social environment where everyone from faculty members to peers helps shape their future.

VMTW is a home to aesthetically designed buildings with state-of-the-art computer and internet facilities, modern laboratories, workshops, seminar halls, auditoriums, and well-stocked libraries, sports, and games fields.

The institution boasts of a strong alumni network with alumni events held every year serving as a platform for past students to give back to VMTW and share their experiences with its present fellow students. With so much to offer, it is only natural that students of VMTW get a unique opportunity to carve a niche for themselves in their chosen field of study. It enables them to become well-rounded and discerning citizens, fully qualified for their chosen professions in the workplace. Institute also brings out the creativity in students by imparting engineering knowledge imbuing interpersonal skills to promote innovation, research, and entrepreneurship.

## ABOUT THE DEPARTMENT

Department of Electronics and Communication Engineering was started since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. The strength was enhanced to 120 during 2010. The Department had added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 24x7, 30 MBPS internet facility.

## ABOUT THE COURSE

The goal of the workshop is to introduce the students to the main principles of the MOS transistor implementation, the basic VLSI analog design flow, and the Cadence analog design environment. The students will learn how to draw schematics, run different types of analog simulations and how to draw and verify layout.

## COURSE OBJECTIVES

Analog design in the context of integrated circuit (IC) design is a discipline that focuses on the creation of circuits that operate in and are optimized for continuous time-domain behavior. Typical objectives of analog design include:

## EXPECTED OUTCOMES

At the end of Workshop, participants will be able to

- Develop a high-level specification for the design. What functions will it perform? What are the performance, power, and area (i.e., cost) targets for the design?
- Develop a top-level design to achieve the required results using macro-functions such as filters, comparators, and amplifiers.

Conclusion report on "Analog VLSI Chip Design"

**Sub:** conclusion Report of "Analog VLSI Chip Design" conducted on 11<sup>th</sup> & 12<sup>th</sup> November, 2021—reg.

The workshop was aimed to provide knowledge about Analog VLSI Chip Design. Mr. P. Hari Prasad, DEEKSHA TECHNOLOGIES HYD, executed 2-days Workshop on "Analog VLSI Chip Design". After attending this workshop students have expressed about their capability of Designing Analog VLSI Chip and applications in any Electronics Project. This workshop will be helpful for students for circuit development of their final year project. Total 80 students have participated in this workshop. The workshop was an informative and interesting. All the students of ECE had a practical exposure about Analog VLSI Chip Design.

On behalf of the students I request you to arrange more workshops for students to improve the knowledge of students and enhance the career opportunities.

## ABOUT THE COURSE

Designing power amplifiers with low power consumption, high efficiency and integration is an important topic with significant impact on communication and circuit research area.

## COURSE OBJECTIVES

The Internet of Things (IoT) promises the tremendous potential to improve resource management, increase productivity, and enable new business models across business and consumer markets. The basic concept of IoT is to construct an information network architecture that connects many 'things' in the world together.

## EXPECTED OUTCOMES

At the end of Workshop, participants will be able to

Conclusion report on “low Power CMOS Power amplifier”

**Sub:** conclusion Report of “low Power CMOS Power amplifier”

Conducted on 13& 14 August, 19—reg.

The workshop was aimed to provide knowledge about application design using IOT and cloud services.

Mr. P.HariPrasad low Power CMOS Power amplifier, HYD, executed 2-days Workshop on “Application low Power CMOS Power amplifier” and applications workshop. After attending this workshop students have expressed about their capability of Designing Special purpose IOT Devices Design and applications in any Electronics Project. This workshop will be helpful for students for circuit development of their final year project. Total 80 students have participated in this workshop. The workshop was an informative and interesting. All the students of ECE had a practical exposure about IOT Devices Design and its applications.

On behalf of the students I request you to arrange more workshops for students to improve the knowledge of students and enhance the career opportunities

Organized by: Department of CSE

Schedule dates: 30-09-2019.

Resource Person: **Dr. T.PRABAKARAN, HOD & Associate Professor, Joginpally, BR Engineering College**

**Objective of the Program:** When working with deep learning models using Python, the objectives can vary depending on the specific task or problem you are trying to solve. These objectives provide a broad overview of the tasks and goals involved in working with deep learning models using Python.

**Outcomes of the Seminar:** There are several potential outcomes that are Improved Predictive Performance , Enhanced Accuracy and Generalization,Real-World Applications.These outcomes highlight the potential impact and benefits of using deep learning models in Python, ranging from predictive performance to solving complex real-world problems across diverse domains.

Sub: Permission for an Industrial Visit - Reg.

Dear Sir,

We are one of the 8 well reputed engineering institutions under Vignans Group of Institutions, situated in Kondapur about 15kms from city of Hyderabad. We are always ranked within first 10 ranks in JNTU(H). We have B.Tech. and M.Tech. courses in many branches of engineering, including Electronics and Communication Engineering and Computer Science Engineering. We would like our students to get exposed to Industrial environment and more importantly industry practices, which would help them, upon their entry into any industry, to get set in the industry environment faster and deliver their jobs efficiently.

We wish to organize an Industrial visit to NFC, for about 120 students in sequential slots, on your convenient dates, during the 3<sup>rd</sup> week of September, 2018. We understand that NFC is on the forefront to nurture the students of the nation and would play a vital role in contributing to their knowledge. We wish to get an opportunity for our Women engineers to visit your organization and understand real-time entrepreneurial activities. We wish to arrange this visit for our III B.Tech., CSE students.

We assure you that we would not disturb your regular work / production and conduct our students with utmost discipline. We anticipate a positive response for the visit.

Thanking You,

Yours Sincerely

**Objective of the Program:** The objectives of neural networks and deep learning are to develop and train artificial neural networks to perform complex tasks by learning from data.

**Outcomes of the Seminar:** Neural networks and deep learning have had a significant impact on various fields and have led to several notable outcomes. Image Recognition and Computer Vision, Natural Language Processing (NLP), Speech Recognition, Healthcare and Biomedicine. These outcomes highlight the wide-ranging impact of neural networks and deep learning, transforming industries, and driving innovations in various domains.

### Report on "Natural Language Processing Using AI Techniques"

Date: 18-12-2018

**Event Type** : Workshop  
**Total No. of Participants** : 93  
**Resource Person** : Ratnesh Ranjan  
Technical Manager,  
Brain O Vision.  
**Name of Coordinator** : Mrs. K. Helini

#### **Objective of the Event:**

The Objective of this Workshop focuses on Natural Language Processing (NLP). NLP is a tract of Artificial Intelligence and Linguistics, devoted to make computers understand the statements or words written in human languages.

#### **Outcomes of the Event:**

After completion of the Workshop on "Natural Language Processing using AI Techniques", the students are expected to: Natural language processing provides a way in which human interacts with computer / machines by means of voice.

To furnish the participants to analyze sentences in terms of parts of speech (POS) and constituent structure, including the use of tree diagrams, Natural language processing is an area of research and application that explores how computers can be used to understand and manipulates natural language text or speech to do useful things.

### About the Course:

The concept, of course, is this project is to develop a home automation system using an Arduino board with Bluetooth to be remotely controlled by any Android OS smartphone. As technology is advancing so houses are also getting smarter. Modern houses gradually shift from conventional switches to centralized control systems, involving remote-controlled switches. Presently, conventional wall switches in different parts of the house make it difficult for the user to go near them to operate. Even more, it becomes more difficult for the elderly or physically handicapped people to do so. The remote-controlled home automation system provides a most modern solution with smartphones. In order to achieve this, a Bluetooth module is interfaced to the Arduino board at the receiver end while on the transmitter end, a GUI application on the cell phone sends ON/OFF commands to the receiver where loads are connected. By touching the specified location on the GUI, the loads can be turned ON/OFF remotely through this technology. The loads are operated by Arduino board through optoisolators and thyristors using triacs.

### Course Objectives:

- Automation
- Remote Control
- Integration and Customization

- Energy Monitoring and Conservation
- Learning and Experimentation

### Expected Outcomes:

At the end of Workshop, participants will be able to

- Automation
- Remote Control
- Energy efficiency
- Safety enhancements
- Data logging and analysis
- Integration with other systems

### PROGRAM REPORT

Name of the Add on Course: Controlling of Electrical appliances through Arduino

Day/Duration: 35 Hours

Time: 4pm to 5pm

Resource Person: Mr. K. JAGDEESHWAR REDDY, Sr. Engineer in Elegant Embedded Solutions Pvt. Ltd. Hyderabad

Name of the Coordinator: Mr. M. Karthikpal, Assistant Professor Dept. of ECE, VMTW, Hyderabad

Number of the Participants: 4

**Topics covered:** The following topics covered in this program

1. Home automation system using an Arduino
2. Integration with other systems

**Course Outcomes:**

COs	At the end of the course, students will have the ability to:	Pos Mapped	Strength of mapping
CO1	Recall the basics of sensors, its functioning.	PO1,PO2	2
CO2	Execute basic and advanced assembly language programs	PO3,PO5	3
CO3	Learn the ways to interface I/O devices with processor for task sharing.	PO3,PO4	3
CO4	Recall the basics of co-processor and its ways to handle float values by its instruction set	PO2,PO5	2
CO5	Recognize the functionality of micro controller, latest version processors and its applications	PO3,PO4	3

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

### CIRCULAR

This is to inform all the III B.Tech ECE students that there will be a Value Added course on "Design of Smart Antenna Systems and Its Importance " in association with Elegant Embedded Solutions Pvt. Ltd from 17-09-2021 to 02-11-2021 All students are invited to take part in this course. The participating students will be honored with certificates of participation. During the course you will be encouraged to interact with the speaker and the other participants through the case study discussions. Hence those who are interested can sign in registration form.

## ABOUT THE COURSE

In this course, introduce about Antenna Theory: Antennas, Radiation concept, Types of Antennas, Antenna parameters, Friis Transmission equation Aperture Antenna: Introduction Microstrip Radiators: Introduction, Rectangular Microstrip Antenna analysis and Design, Circular Microstrip Antenna Analysis and Design, Microstrip Slot Antennas: Wave guide fed slots, Radiation mechanism, Microstrip slot antennas, Introduction to rectangular slot antennas, narrow, wide, tapered and circularly polarized slot antennas, Annular slot antennas, Comparison of microstrip slot antennas with patch antennas. Micro Strip Antenna Arrays: Introduction, Micro strip array antennas, Characteristics of fixed beam linear antenna arrays, Linear microstrip arrays, Characteristics of planar arrays, Microstrip planar arrays, Microstrip scanned array antennas, Phase scanned microstrip arrays, Time delay scanning, Electronic feed switching, Frequency scanned microstrip arrays.

## COURSE OBJECTIVES

To familiarize the basic concepts of antenna parameters and radiation mechanism. To

analyze aperture antennas with the knowledge of various theorems. To study the principles of frequency independent antenna design. To understand, analyze and synthesize array antennas and also know the concepts of smart antennas.

## EXPECTED OUTCOMES

The student will be able to Analyze the different types of antennas with the help of basic antenna fundamentals. Utilize the various microwave antennas by understanding the principle of working of it. Apply the knowledge in the design of various microwave aperture antennas. Acquire basic knowledge of smart antenna design.

Date: 04-11-2021

**PROGRAM REPORT**

**Name of the Add on Course:** Design of Smart Antenna Systems and its Importance

**Day/Duration:** 32 hours

**Time:** 4:00pm to 5:00pm

**Resource Person:** Mr.A.Venkat Reddy, Elegant Embedded Solutions Pvt.Ltd, Hyderabad.

**Name of the Coordinator:** Mr.G.Ganesh Reddy,Assistant professor,VMTW, Hyderabad.

**Number of the Participants:** 90

**Topics covered:** The following topics covered in this program

- Smart Antennas
- Simulation of Smart Antennas

**Course Outcomes:**

COs	At the end of the course, students will have the ability to:	POs Mapped	Strength of mapping
CO1	Introduction of Smart Antennas	PO2,PO5	3
CO2	Integration and Simulation of Smart Antennas	PO4,PO3	2
CO3	Study the principles of frequency independent antenna design	PO2,PO4,PO6	3
CO4	Analyze and synthesize array antennas and also know the concepts of Smart antennas	PO4,PO7	1

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

## ABOUT THE COURSE

This course is devoted to address the need to enhance the knowledge about the Antenna design and the latest development pertaining to RF and Microwave circuits. This Program is designed for all engineering disciplines. This niche program particularly aims to impart these quintessential skills to the participants. Antenna engineering is a fast-growing field of communication concerned with the study and design of different type of antennas for various applications. The participants will be trained with hands-on approach to have an in-depth insight into the domain of communication and expose them to Feasibility & future scope.

## COURSE OBJECTIVES

- Microwave devices and circuits
- Satellite communications
- Microstrip & CPW antennas
- Implantable Antennas
- MW antennas by using SIW technology
- Reconfigurable planar antenna design and simulation methodology
- Wearable UWB Antennas for body area network
- Metamaterial
- Millimetre wave and sub millimetre-wave technologies
- Smart & MIMO antenna design
- Antenna parameters and design considerations
- MM Wave/THz Integrated Circuits
- EMI/EMC

## EXPECTED OUTCOMES

At the end of Workshop, participants will be able to

- Have an in-depth knowledge on Microwave devices and circuits & Satellite communications.
- Have an in-depth knowledge on Micro strip & CPW antennas, Implantable Antennas.
- Have an in-depth knowledge on Reconfigurable planar antenna design and simulation methodology.
- Working with Wearable UWB Antennas for body area network, Millimeter wave and sub millimeter-wave technologies.
- Working with Smart & MIMO antenna design, Antenna parameters and design considerations.

**DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

Date: 14-11-2019

**PROGRAM REPORT**

**Name of the Add on Course:** Latest developments in microwave antenna design and its Applications.

**Day/Duration:** 35 Hours.

**Time:** 4:00PM to 5:00PM.

**Resource Person:** Mr. A.Venkat Reddy, Sr. Senior Engineer, Elegant Embedded Solutions.

**Name of the Coordinator:** Mr. J. Sunil Kumar, Assistant Professor, VMTW.

**Number of the Participants:** 83.

**Course objectives:**

1. Microwave devices and circuits.
2. Satellite communications.

**Topics covered:** The following topics covered in this program

- Smart & MIMO antenna design
- Antenna parameters and design considerations
- MM Wave/THz Integrated Circuits.
- Have an in-depth knowledge on Microwave devices and circuits & Satellite communications.
- Have an in-depth knowledge on Micro strip & CPW antennas, Implantable Antennas.

**Course Outcomes:**

COs	At the end of the course, students will have the ability to:	POs Mapped	Strength of mapping
CO1	Able to Working with Smart & MIMO antenna design.	PO3,PO4	3
CO2	Able to understand the Micro wave device VTC	PO2,PO3	4
CO3	Able to Working with Wearable UWB Antennas for body area network	PO2,PO4	2
CO4	Able to understand the characteristics of Micro strip & CPW antennas.	PO2,PO3	2

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

### CIRCULAR

This is to inform all the II B. Tech ECE students that there will be an Add on course on "MATLAB for beginners" in association with Elegant Embedded Solutions PVT LTD., Hyderabad, from 20-07-2018 to 30-08-2018 All students are invited to take part in this course. The participating students will be honored with certificates of participation. During the course you will be encouraged to interact with the speaker and the other participants through the case study discussions. Hence those who are interested can sign in registration form.

### About the Course:

The course provides a gentle introduction to the MATLAB computing environment and is intended for beginning users and those looking for a review. It is designed to give students a basic understanding of MATLAB, including popular toolboxes. The course consists of interactive lectures and sample MATLAB problems that generally they face. The hands-on session helped students with the syntaxes and functions for use in programming. The tool helps at various stages in studying subjects related to processing and analysis during regular subjects throughout courses. No prior programming experience or knowledge of MATLAB is assumed. Concepts covered include basic use, graphical representations and tips for designing and implementing MATLAB code.

### Course Objectives:

- Understanding the MATLAB environment.
- Being able to do simple calculations using MATLAB.
- Being able to carry out simple numerical computations, analyses and graphics using MATLAB.

### Expected Outcomes:

At the end of Workshop, participants will be able to

- Understand the main features of the MATLAB

development environment.

- Use the MATLAB GUI effectively.
- Basic syntax, Looping, 2D & 3D Plotting.
- Design simple algorithms to solve problems.
- Write simple programs in MATLAB to solve scientific and mathematical problems.
  - a) Solution of simultaneous linear equation.
  - b) Solution of simultaneous non-linear equation.
  - c) Regression, splines and polynomial interpolation.
  - d) Solution of ordinary differential equation.
  - e) Numerical Integration.
  - f) Basics optimization procedure.

## ABOUT THE INSTITUTION

Vignan's Institute of Management and Technology for Women (VMTW) is the brainchild of Dr. L. Rathalah, Chairman, Vignan Group of Institutions, which was founded in August 2008, with four branches of Engineering.

VMTW is an exemplary institution of higher learning with a mission of pursuing excellence in education and research. The institution, with its diverse and dynamic community of about 2000 students offers a distinctive combination of some of the finest facilities for 7 different graduate, and undergraduate programs, accomplished faculty, world-class facilities with a hostel set on a sprawling area of 22 acres sylvan surroundings of mango groves and greenery.

While students at VMTW immerse themselves in academics, the college has a lot in store for them outside the classroom. Student life includes participation in sports, recreational & co-curricular, and cultural activities. In short, at VMTW students will find an academic and social environment where everyone from faculty members to peers helps shape their future.

VMTW is a home to aesthetically designed buildings with state-of-the-art computer and internet facilities, modern laboratories, workshops, seminar halls, auditoriums, and well-stocked libraries, sports, and games fields.

The Institution boasts of a strong alumni network with alumni events held every year serving as a platform for past students to give back to VMTW and share their experiences with its present fellow students. With so much to offer, it is only natural that students of VMTW get a unique opportunity to carve a niche for themselves in their chosen field of study that enables them to become well-rounded and discerning citizens, fully qualified for their chosen professions in the workplace. Institute also brings out its creativity in students by imparting engineering knowledge imbuing interpersonal skills to promote innovation, research, and entrepreneurship.

## ABOUT THE DEPARTMENT

Department of Electronics and Communication Engineering was initiated since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. Its strength was enhanced to 120 during 2010. The Department added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 2x7.30 MBPS internet facility.

## ABOUT THE COURSE

The Internet of Things (IoT) makes available a large variety of assets (e.g., data, devices, and services) that are used in a number of ways that were once unthinkable. Similarly, foreseeing the future use of IoT assets is difficult if not impossible. The rapidly increasing number of intelligent, cloud-connected things that are embedded in our daily lives raises legitimate concerns about the privacy costs paid for the benefits these technologies provide.

## COURSE OBJECTIVES

- The Internet of Things (IoT) concept has attracted a lot of attention in recent years and it is foreseen as one of the technologies that will leverage the Future Internet. It is seen as a major enabler of novel applications and services that will foster efficiency and will ease everyday life.
- However, current IoT solutions are mainly focusing on the development of centralized solutions that do not promote the democratization of the IoT but rather concentrate the IoT around a set of cloud-based platforms which pretend to be open but limit the capacity of the people to tailor their Personal and Communal IoT.

## EXPECTED OUTCOMES

- At the end of Workshop, participants will be able to
  - IoT Cloud Computing provides many connectivity options, implying large network access. People use a wide range of devices to gain access to cloud computing resources: mobile devices, tablets, and laptops. This is convenient for users but creates the problem of the need for network access points. Developers can use IoT cloud computing on-demand. In other words, it is a web service accessed without special permission or any help. The only requirement is Internet access.
  - Based on the request, users can scale the service according to their needs. Fast and flexible means you can expand storage space, edit software settings, and work with the number of users. Due to this characteristic, it is possible to provide deep computing power and storage.

Conclusion report on “Application Design Using IOT and Cloud Services”

**Sub:** conclusion Report of “Application Design Using IOT and Cloud Services”

conducted on 29& 30 April, 22 reg.

The workshop was aimed to provide knowledge about application design using iot and cloud services.

Mr. K.Jagadeswar reddy *Elegant Embedded solutions PVT LTD, HYD*, executed 2-days Workshop on “Application Design Using IOT and Cloud Services” workshop. After attending this workshop students have expressed about their capability of Designing Special purpose IOT Devices Design and applications in any Electronics Project. This workshop will be helpful for students for circuit development of their final year project. Total 84 students have participated in this workshop. The workshop was an informative and interesting. All the students of ECE had a practical exposure about IOT and Cloud services and its applications.

On behalf of the students I request you to arrange more workshops for students to improve the knowledge of students and enhance the career opportunities.

### ABOUT THE DEPARTMENT

The Department of Electronics and Communication Engineering was started since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. The strength was enhanced to 120 during 2010. The Department had added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 24x7, 30 MBPS internet facility.

### ABOUT THE COURSE

A spread spectrum communications system is one that is built upon the principle of transmitting information signals over a much wider bandwidth than is strictly necessary for transferring the information. By transmitting over a larger bandwidth, robustness against external narrowband interference is increased, since the wider the bandwidth of any transmitted signal the lower will be the relative influence of interference over a small part of the bandwidth.

### COURSE OBJECTIVES

The spreading sequence may in principle be a sequence of random chips. If this is the case, then transmissions to/from different users may be assigned different random sequences. In order to detect a sequence transmitted to or from a particular user, the total received signal, which will consist of aggregation of all users' sequences, can be correlated with the users' spreading code at the receiver side. In this case, the target user's signal will experience a combining gain across the M chips, whereas the other users' signals will not and hence appear as uncorrelated noise. This combining gain is referred to as spreading gain.

### EXPECTED OUTCOMES

- At the end of Workshop, participants will be able to
- Code Division Multiple Access (CDMA)
  - Quartz-based piezoelectric materials.
  - Direct Sequence Spread Spectrum Communications.

## REPORT ON INDUSTRIAL VISIT TO ELEGANT EMBEDDED SOLUTIONS

D:30-04-2022,

TO  
The H.O.D

Department of ECE,  
VMTW, HYDERABAD.

Sub: Visit Report on one-day industrial visit to **ELEGANT EMBEDDED SOLUTIONS**

Respected SIR,

The visit was organized with prior permission from **ELEGANT EMBEDDED SOLUTIONS**, up on receiving the letter of permission **ELEGANT EMBEDDED SOLUTIONS**, 100 students with four faculty members myself Mr.SUNIL KUMAR and Mr.ASHOK ,Mr.KARTIK went on an industrial visit to the **ELEGANT EMBEDDED SOLUTIONS** on 28-04-22. We visited all the major facilities and infrastructure of **ELEGANT EMBEDDED SOLUTIONS**. I am sure that this visit will help the students in their future Professional life and bring a positive change in their thinking and practical behavior regarding Education and especially Engineering.

We reached **ELEGANT EMBEDDED SOLUTIONS** at around 9.30 am and after several security checks and administrative formalities, we were taken to a central building.

### The following technical details were given during the visit

- Home Monitoring And Alerts For The Blind PEOPLE

This project is to help the Sighted Challenged to be able to navigate and be alerted to open doors, windows status of their home and surroundings. With the Walabot talking to the Raspberry Pi

The students had an opportunity of visiting main sections of to ELEGANT EMBEDDED SOLUTIONS,AND THEY WERE INTERACTED WITH THE MD OF THE COMPANY AND THEY HAVE TAKEN SOME SUGGESTIONS.

### • Attendance Tracking using RFID

- The project presented in this paper is designed to use a single board computer – Raspberry Pi . On powering ON the RFID reader becomes active and reads RFID UHF tags within a range of one to twelve meters Every card contains a unique number that identifies a student or any other employee of the institution. Every log of attendance is identified using the data of the real time clock. The software program stored in RPi compares the read number with similar data stored in database. If a match is found it checks whether it is the right time, day and venue the student wishes to enter and if found true the green led blinks ratifying the marking of attendance and recording the attendance to the database. Otherwise the red led blinks and a message is shown in the LCD display indicating denial of service. The push button is used to manually reset the system in the event of any error. The program checks for late arrivals and automatically denies recording of attendance. However, for valid reasons which governed and overruled by the lecturer, the system allows to enter attendance using the membrane keypad.
- Other facilities included in the software program are to send SMS message showing the percentage of absence and a reminder of the scheduled classes. In the event of a

and the Amazon Alexa, that enables the hard of sight to be able to be even more aware of their surroundings.

This project is going to be an evolving animal as I go because I am trying to integrate many different technologies into one product. Integrating the Raspi with walabot is pretty straight forward as is the Alexa .

- LED Display Using Embedded System

This project comprises a circular display of a string of LEDs. Using a high speed motor and some mechanical assembly, LED strings mounted on a printed circuit board are duly interfaced to a microcontroller. An appropriate program while executed drives a pair of single line LEDs in space multiplexing mode. This displays some message and or a clock timing taking advantage of persistence of vision of the human eye. Without the single line of LEDs in space multiplexing mode, if one would have to display a message, a number of LEDs as high as around 525 would have been used. Here the project uses only 8 LEDs. Thus material count, hardware requirement, brings the overall cost to a very affordable price. The synchronization is being implemented through software.

workshop or seminar, the system can be set with details like date, time and venue. The workshop can be associated to groups where the system allows marking of attendance only for students or lecturers of the assigned group.

**Report on GRE Training Program Conducted by Bheri Overseas**

**Name of the Program:** Training Program for "GRE Coaching"

**Syllabus:** Analytical Writing Assessment (AWA) skills, Quantitative Reasoning skills, Verbal Reasoning skills, Analyze an Issue task and Analyze an Argument task, Reading Comprehension, Text Completion and Sentence Equivalence, Quantitative Comparison Questions, Multiple-choice Questions and Numeric Entry Questions.

**Objective:** Familiarizing Students with the GRE Format, Reviewing Content Knowledge, Enhancing Test-Taking Strategies, Practicing with Mock Tests

**Name of the Organization:** BHERI Overseas

**Course Instructor:** Anusha Beri

**Dates of the program:** 10-09-2017 to 31-10-2017

**Number of students attended:** 35

**Outcome:** Improved Understanding of GRE Format and Content, Enhanced Test-Taking Skills, Increased Subject Matter Proficiency, Improved Performance in Practice Tests, Higher GRE Scores, Boosted Confidence and Reduced Test Anxiety, Enhanced Application for Graduate Programs.

The undersigned thanked the respective department coordinators and BHERI Overseas, for their able support in completing the program successfully.

### CIRCULAR

This is to inform all the IV B. Tech ECE students that there will be an Add on course on "Design and FPGA Implementation of DSP Processor using Verilog" in association with AMTRONICS PVT LTD., Hyderabad, on 11-09-2018 to 29-10-2018 All students are invited to take part in this course. The participating students will be honored with certificates of participation. During the course you will be encouraged to interact with the speaker and the other participants through the case study discussions. Hence those who are interested can sign in registration form.

### About the Course:

The digital signal processing (DSP) applications are in numerous infotainments, Medical diagnostics and advanced communication and radar systems. Always the advancements in VLSI technology will have an impact on the performance of these systems. VLSI DSP deals with such architectural and algorithmic optimization techniques to design high-performance DSP systems. As VLSI DSP needs inter-domain expertise of both DSP and VLSI domain, there is a huge necessity to impart the necessary concepts and hands-on skills to research scholars and faculty.

### Course Objectives:

- Introduction to DSP VLSI
- Architectural transformation techniques (Retiming, Folding)
- Architectural transformation techniques (Unfolding)
- Numerical Strength reduction techniques
- Hands-on MATLAB for VLSI DSP
- Introduction to INTEL FPGA Design flow
- Introduction to DSP Builder
- Design flow using DSP Builder
- Industry practice and trends in DSP VLSI system Design flow

### Expected Outcomes:

- At the end of Workshop, participants will be able to
- Simulate and verify a design.
  - Work with real time projects using Architectural transformation techniques (Retiming, Folding).
  - Work with real time projects using Architectural transformation techniques (Unfolding).
  - Work with real time projects using Numerical Strength reduction techniques.
  - Work with real time projects using DSP Builder.

## DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Date: 31-10-2018.

### PROGRAM REPORT

**Name of the Add on Course:** Design and FPGA Implementation of DSP Processor using Verilog

**Day/Duration:** 35 HOURS

**Time:** 4:00PM TO 5:00PM

**Resource Person:** Mr. ArjunModi, Sr.Engineer, Amtronics PVT, LTD, Hyderabad.

**Name of the Coordinator:** Mr. J. Sunil Kumar, Assistant Professor, VMTW

**Number of the Participants:** 79

**Topics covered:** The following topics covered in this program

**Course Outcomes:** Work with real time projects using Architectural transformation techniques

COs	At the end of the course, students will have the ability to:	POs Mapped	Strength of mapping
CO1	Understand the LTI system characteristics and Multi-rate signal processing.	PO1,PO3	3
CO2	Understand the significance of various filter structures and effects of round off errors	PO1,PO3	2
CO3	Understand the inter-relationship between DFT and various transforms	PO1,PO2	2
CO4	Understand different types of faults that can occur in a system and learn the concept of testing and adding extra hardware to improve testability of system	PO1,PO2	3
CO5	Design building blocks of data path systems, memories and simple logic circuits using PLA, PAL, FPGA and CPLD	PO1,PO2	2

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

### CIRCULAR

This is to inform all the III B. Tech ECE students that there will be an Add on course on "Latest trends in chip design for Area and Power Optimization "in association with AMTRONICS PVT LTD. Hyderabad, from 18-08-2017 to 27-09-2017.All students are invited to take part in this course. The participating students will be honored with certificates of participation. During the course you will be encouraged to interact with the speaker and the other participants through the case study discussions.

### About the Department:

Department of Electronics and Communication Engineering was started since the inception of Vignan's Institute of Management and Technology for Women during 2008 with an initial intake of 90. The strength was enhanced to 120 during 2010. The Department had added Post graduate programme in VLSI during the year 2011 and Embedded Systems during 2014 with an intake of 18 each.

The Department has state-of-art laboratories equipped with advanced and well maintained equipment, continuously updated application software packages, more than adequate computing systems with 24x7, 30 MBPS internet facility.

### About the Course:

VLSI Stands for Very-large-scale integration (VLSI), which creates an integrated circuit (IC) by combining millions of MOS (Metal Oxide Silicon transistor) transistors over a single chip. The microprocessor and memory chips are VLSI (Very-large-scale integration) devices. Before the intro of VLSI technology, most ICs had a limited set of roles they could perform. IC (Integrated Circuits) are used in various types of electronic devices. Our mobile phone consists of IC. IC is a circuit where all or some of the circuit elements are inseparably linked and electrically interconnected, so it's considered indivisible for construction and commerce. Before VLSI, IC size used to be much larger than it is now. Because of VLSI, designers can now add millions of transistors and other components on a tiny chip.

### Course Objectives:

- Overview of IC Design
- Aspects of IC Design
- Introduction and Device Characteristics
- Analog IC Design
- Digital IC Design
- Semicustom IC Design/PLD
- Introduction to cadence EDA
- Op Amp Design and Compensation
- VLSI Signal Processing
- VLSI Communication System Design

- Mixed Signal Design /RF IC Design
- FDGA/VHDL

### Expected Outcomes:

At the end of Workshop, participants will be able to

- Model digital systems in VHDL and SystemC at different levels of abstraction.
- Partition a digital system into different subsystems.
- Simulate and verify a design.
- Transfer a design from a version possible to simulate to a version possible to synthesize.
- Use computer-aided design tools to synthesize, map, place, routing, and download the digital designs on the FPGAboard.
- Apply knowledge of mathematics, science, and engineering to design and analysis of analog integrated circuits.
- Identify, formulates, and solves engineering problems in the area of analog integrated circuits.
- Use the techniques, skills, and modern programming tools such as Mentor Graphics, necessary for engineering practice.

## DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Date: 29-09-2017

### PROGRAM REPORT

Name of the Add on Course: Latest trends in chip design for Area and Power Optimization

Day/Duration: 35 Hours

Time: 4pm to 5pm

Resource Person: Mr. ARJUN MODI, Technical Manager in AMTRONICS, Hyderabad

Name of the Coordinator: G. Narendra, Assistant Professor Dept. of ECE VMTW, Hyderabad

Number of the Participants: 71

**Topics covered:** The following topics covered in this program

1. Analog IC Design
2. Digital IC Design

### **Course Outcomes:**

COs	At the end of the course, students will have the ability to:	Pos Mapped	Strength of mapping
CO1	Develop mathematical models for modern MOS devices.	PO2,PO3	2
CO2	Develop solution to overcome short channel issues	PO3,PO4	3
CO3	Develop various compact models appropriate for industry.	PO3,PO4	2
CO4	Analyse current distribution in the devices like transistors, MOS devices.	PO2,PO4	2
CO5	Construct the circuit layout using the design rules	PO2,PO4	3

**Assessment Procedure:** The assessment of the Add on course is conducted in Multiple Choice Questions through offline Mode.

## Report on Orientation Programme on Research Tools

**Speaker :** Dr. L. Sridhara Rao, Associate Professor and Head, Department of IT, J B I E T, HYD.

**Venue:** ASF-2, A-BLOCK

An Orientation programme on research tools was organised by IQAC at Vignan's Institute of Management and Technology for Women on 13/07/2018 at 10:00 AM.

This Orientation on Research Tools aimed to provide faculty with practical knowledge and skills related to various tools and resources available for conducting research effectively. This orientation covered a range of research tools, including software, databases, and online platforms that enhance productivity, data analysis, collaboration, and literature review. This report summarizes the key highlights and outcomes of the workshop.

### Orientation Agenda:

- Introduction to Research Tools
- Reference Management Tools
- Data Analysis and Visualization Tools
- Collaboration and Communication Tools
- Literature Review Tools.

### Introduction to Research Tools:

This program began with an overview of the importance of research tools in the research process. Participants gained insights into how utilizing appropriate tools can streamline their work, save time, and improve the quality of their research.

### Reference Management Tools:

*ASH*

Speaker focused on popular reference management tools such as EndNote, Mendeley, and Zotero. Participants learned how to organize and manage references, generate citations and bibliographies, and collaborate on reference lists with other researchers.

**Data Analysis and Visualization Tools:**

In this segment, participants were introduced to statistical analysis software like SPSS, R, and Python. They learned how to import, clean, and analyze research data using these tools. Additionally, participants explored visualization tools like Tableau and Excel for effective data representation.

**Collaboration and Communication Tools:**

This session highlighted tools that facilitate collaboration and communication among researchers. Participants discovered the features of tools such as Google Docs, which enable real-time collaboration, file sharing, and effective communication within research teams.

**Literature Review Tools:**

It also included a session on literature review tools such as PubMed, Google Scholar, and Scopus. Participants learned advanced search techniques, citation tracking, and alerting features to stay updated with the latest research in their respective fields.

**Outcomes and Benefits:**

- Enhanced Research Productivity
- Improved Data Analysis and Visualization
- Efficient Collaboration and Communication
- Streamlined Literature Review Process

**Conclusion:**

A special word of thanks given by IQAC, Co-ordinator to the speaker Dr. L. Sridhara Rao, for his expertise, insights, and thought-provoking presentation have captivated the minds and broadened participants perspectives.

This Orientation program on research tools provided faculty with valuable insights and practical skills to leverage various tools for their research endeavours. By incorporating these tools into their workflows, researchers can optimize their research process, enhance productivity, and produce high-quality research outputs.

Respected Sir,

I am writing to formally request your permission and support to organize an orientation program on Effective Implementation of Outcome-Based Education (OBE) for the faculty and staff of our institution. This program aims to familiarize the entire team with the concepts, benefits, and implementation strategies of OBE.

I kindly request your permission to allocate a suitable date and time for the orientation program, allowing all teachers and staff members to attend without any disruption to their regular duties.

Thank you for your attention to this matter.

**Orientation Programme on Effective implementation of Outcome Based Education**

**Speaker: Dr.Ch.Srinivasulu. Professor CSE,IARE,HYD**

**Venue: Seminar Hall**

**Time: 11:00 am**

This program aimed to equip participants with the knowledge, skills, and strategies necessary for successful implementation of OBE in educational institutions.

It provides an overview and evaluation of an Orientation Programme focused on the effective implementation of Outcome-Based Education (OBE). The programme aimed to orient faculty members and administrators, to the principles and strategies of OBE and provide them with the necessary knowledge and skills to implement it successfully in educational institution.

The programme aimed to familiarize participants with the principles, concepts, and benefits of Outcome-Based Education and highlight its relevance to contemporary educational practices. Participants were expected to develop a clear understanding of the key components of OBE, including defining measurable learning outcomes, aligning assessments and teaching strategies with outcomes, and utilizing effective evaluation methods.

Speaker also explained briefly about the required knowledge and skills necessary to design and align curriculum components, ensuring that they support the achievement of desired learning outcomes.

Participants were encouraged to engage in collaborative discussions and activities, promoting the exchange of ideas, sharing of best practices, and building a supportive network for ongoing implementation of OBE. Programme aimed to offer guidance and resources to participants, enabling them to develop action plans and implement OBE effectively within their educational context.

Participants received an overview of the principles and rationale behind OBE, including the shift from content-driven to competency-based education.

Speaker also focused on helping participants develop the skills to define clear, measurable, and observable learning outcomes that align with institutional goals and student needs.

Participants engaged in workshops and discussions to understand how to design curriculum components, such as courses and modules, that align with the defined learning outcomes. He explored various assessment strategies and techniques to ensure that assessments align with learning outcomes and provide meaningful feedback on student achievement. Participants were introduced to student-centered teaching and learning approaches that promote active engagement, critical thinking, and the development of key competencies and skills.

### Program Outcomes

- **Increased Understanding of OBE:** Participants demonstrated an improved understanding of the principles, concepts, and benefits of OBE, recognizing its potential for enhancing student learning and educational quality.
- **Enhanced Curriculum Design and Alignment Skills:** Participants developed the skills to design curriculum components that align with defined learning outcomes, ensuring coherence and alignment throughout the educational system.
- **Improved Assessment and Evaluation Practices:** Participants acquired the ability to develop assessments that effectively measure student achievement of learning outcomes and utilize appropriate evaluation methods.
- **Adoption of Student-Centered Approaches:** Participants embraced student-centered teaching and learning approaches, integrating active learning strategies and promoting student engagement and critical thinking.
- **Collaboration and Best Practice Sharing:** The orientation programme fostered collaboration and networking among participants, creating a supportive community for ongoing sharing of best practices and collective problem-solving.
- **Action Plans for OBE Implementation:** Participants developed action plans to implement OBE within their educational context, setting clear goals, timelines, and strategies for successful implementation.

The primary objectives of the orientation program were as follows:

- To create awareness about the importance of continuous quality improvement in higher education institutions.
- To familiarize faculty with the key principles and concepts of continuous quality improvement.
- To equip faculty with the necessary knowledge and tools to actively contribute to the quality improvement processes.
- To encourage a collaborative approach towards identifying areas for improvement and implementing effective strategies.
- To foster a culture of self-reflection, evaluation, and innovation for continuous growth and development.

The program began with an introduction to the concept of continuous quality improvement, emphasizing its significance in enhancing educational outcomes and institutional effectiveness.

Faculty were provided with examples and case studies of successful quality improvement initiatives implemented in other institutions.

The orientation program focused on providing faculty with an understanding of quality assurance systems and their role in fostering continuous improvement.

The key components of quality assurance, such as setting benchmarks, data collection, analysis, and feedback mechanisms, were discussed in detail.

## Report on "Orientation Programme on Creating a Culture of Continuous Quality Improvement"

**Speaker:** Dr.P.Vijaya Pal Reddy,Professor and HOD,CSE,Matrusri Engineering College.

**Venue:** Seminar Hall, VMTW

**Time :**11:00 am

Program commenced with inaugural session by Dr.G.Apparao Naidu, Principal ,VMTW.

Dr. G Apparao Naidu sir delivered an engaging and inspiring opening address. The address focused on the significance of creating a culture of continuous quality improvement in educational institutions and its impact on student learning outcomes, institutional effectiveness, and overall excellence. He also emphasized the role of every participant in driving this culture and encouraged active engagement and collaboration throughout the program.

After the inaugural session IQAC,Co-ordinator welcomed the speaker to start his session on today's topic. Speaker of the day Dr. P.Vijaya Pal Reddy, ,Professor and HOD,CSE,Matrusri Engineering College started the session by explaining the steps to promote a culture of continuous improvement among faculty, students, and other stakeholders, with the aim of enhancing the overall quality of institution.

### **Tools and Techniques for Continuous Quality Improvement:**

Faculty were introduced to various tools and techniques commonly used in continuous quality improvement, such as SWOT analysis, PDCA (Plan-Do-Check-Act) cycle, and root cause analysis.

Practical exercises and group discussions were conducted to enable faculty to apply these tools and techniques to real-life scenarios.

The orientation program emphasized the importance of developing and implementing effective quality improvement strategies.

Faculty were provided with guidance on developing action plans, setting measurable goals, and monitoring progress towards achieving quality improvement objectives.

### **Promoting a Culture of Collaboration and Innovation:**

The program emphasized the need for collaboration and shared responsibility in fostering a culture of continuous improvement.

Faculty were encouraged to actively engage in cross-functional teams, share best practices, and explore innovative approaches to address quality improvement challenges.

Towards the end of the program, faculty were given the opportunity to reflect on their learnings and develop personal action plans to contribute to continuous quality improvement in their respective roles.

### **Conclusion:**

A Quality Initiative Orientation Program conducted by IQAC was highly successful in promoting a culture of continuous improvement among the faculty. The program provided valuable insights, tools, and techniques to actively contribute to quality improvement initiatives in our institution. It fostered a sense of collaboration, innovation, and shared responsibility for enhancing the overall quality of education.

Program concluded with the vote of thanks by IQAC Co-ordinator extending his gratitude to the IQAC team, resource person, and the entire faculty for their active involvement and valuable contributions throughout the orientation program. Their enthusiasm and commitment to continuous quality improvement will undoubtedly have a positive impact on our institution's growth and development.

## Report on One Day Workshop on Outcome based Education

IQAC of VMTW conducted One Day Workshop on Outcome based Education on 18/05/2019. A total of 47 faculty participated in Workshop which covered various key aspects of OBE & NBA,

Workshop sessions consists of

- Vision, Mission & Outcome Based Education ,
- Implementation of OBE, Mapping & Attainment of COs and POs,
- Mapping & Attainment of COs and Pos,
- OBE based Teaching Learning
- Continuous Improvement based on PO/PSO Attainment

Mr.Harikrishna Co-ordinator,IQAC extended his warm welcome to the guest and all the participants to the workshop on "Outcome Based Education". He gave some insights of the workshop and handed over the session to the Speaker of this Workshop Mr.Roshan Kavuri,HOD in Electronics and Computer Engineering, JBIET,HYDERABAD.

Speaker started the programme by focusing on higher education which includes World class research with high quality teaching with special focus on research. He spoke about Vision which tell you where you want to go and mission which tell you where you are right now and what is the direction of moving towards the vision and how you are going to achieve it. Also, vision defines the end game and mission is roadmap that will take you to there. PEOs (Programme educational outcomes) should be derived from mission.

### **Implementation of OBE, Mapping & Attainment of COs and POs,**

Speaker briefed on key terms in OBE which are Vision, Mission, Goal, Objective, Outcome, PEO's, Graduate Attributes(GA), POs, COs, and COBs. Objective is teacher centered and Outcome is student centered. PEOs describe what graduates are expected to gain in his graduation. Skill, knowledge and attitude together form OBE. Employers expect life skills, employability skills, management skills, technical skills and discipline skills from the students

## Mapping & Attainment of COs and Pos.

Discussions continued on Programme Educational Objectives, Programme Outcomes, Course Outcomes and Blooms Taxonomy. PEOs are the expected achievements of graduates in their career that are expected to achieve during after few years of their graduation. PEOs must be quantifiable, suitable, realistic and attainable. Graduate Attributes (GAs) are prescribed by NBA and programme outcomes should be defined from these GAs. Mapping of PEO & PO and PO & CO is enlightened. Also, about Course Outcomes for each course using action verbs from blooms taxonomy.

## OBE based Teaching Learning

He also covered on teacher perspective and student perspective. These are best seen as specific intentions that include the steps to be taken to achieve our aims as teacher. Outcome describes what learners will be able to do when they have completed the course. For every course 5 to 7 course outcomes should be defined. Course Register should contain the following items; Syllabus, Session plan, attendance, Internal Assessment, Lecture Diary, Weekly Self Appraisal, Student performance and time table. One can use different Teaching Learning Methods depending upon the subject. Various Teaching Learning Methods are: Traditional method, lesson or session, Discussions, Seminars, Problem based, ICT, MOODLE, SWAYAM etc.

Speaker stated that OBE starts with a clear statement of knowledge, skill and attitude the graduate engineer will be able to demonstrate after successful completion of the course. The course or subject CO describes "What is the knowledge student has gained at the end of the course". Speaker suggested to follow Blooms taxonomy while preparing question papers.

Blooms taxonomy has 6 levels. Level-1: Understand, Level-2: Remember, Level-3: Apply, Level-4: Analyze, Level-5: Evaluate, Level-6: Create.

## LEARNING OUTCOME

In conclusion, the One-Day Workshop on Outcome-Based Education (OBE) conducted at VMTW has been a success. The workshop aimed to provide faculty members with valuable insights and practical knowledge regarding the implementation of outcome-based approaches in their teaching and assessment practices.

Throughout the workshop, a total of 47 faculty members actively engaged in interactive sessions, discussions, and hands-on activities focused on understanding and applying the principles of outcome-based education. The workshop provided a comprehensive overview of the key concepts, methodologies, and tools associated with OBE, enabling participants to align their teaching strategies with defined learning outcomes.

## Seminar On Quality Research Publications

This Seminar was addressed by Mr.Manoranjan Dash, who has extensive expertise in research publication and has made significant contributions to his field. The program was attended by faculty members from various departments within our institution.

These sessions covered a wide range of topics related to quality research publication, including:

- Identifying appropriate journals and conferences for publication.
- Enhancing research writing skills, including clarity, structure, and language.
- Ensuring ethical practices and avoiding plagiarism in research publications.
- Navigating the peer review process and effectively responding to reviewer comments.
- Promoting interdisciplinary research collaborations for enhanced publication opportunities.
- Increasing research visibility and impact through effective dissemination strategies.
- Exploring funding opportunities and grants for research publication.

  
PRINCIPAL

Vignans Institute of Management & Technology For Women  
Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (D)-501301  
Telangana State

The sessions were highly interactive, allowing participants to engage in discussions, ask questions, and share their experiences and challenges related to research publication.

The feedback from the participants was positive. They expressed their gratitude for the opportunity to attend such a beneficial and informative program. Many participants mentioned that they gained valuable insights into the research publication process and felt more confident in their ability to produce high-quality research papers.

## LEARNING OUTCOMES

1. Understanding the importance of quality research publications.
2. Enhancing research methodology skills.
3. Developing academic writing skills.
4. Understanding the publication process.
5. Learning about ethical considerations.
6. Exploring publication strategies and outlets.
7. Overcoming challenges and improving publication success.

In conclusion, the Quality Research Publication Faculty Development Program was a success. A Total of 50 faculty members from various departments participated in FDP. It provided our faculty members with valuable insights, practical skills, and the motivation to enhance the quality and impact of their research publications. We are confident that the knowledge gained from this FDP will positively influence the research culture at our institution and contribute to its academic growth.

## Seminar on "Research and Innovation"

The seminar aimed to create an environment that promotes research excellence and encourages innovation among faculty members. The sessions conducted covered a wide range of topics related to research methodologies, emerging trends, ethical considerations, and the dissemination of research findings. The seminar attracted a diverse audience, including faculty members from various disciplines.

### The key highlights of the seminar include:

**Inaugural Session:** The seminar began with an inaugural session where Dr.G.Apparao Naidu,Principal sir,VMTW delivered a keynote address emphasizing the importance of research and innovation in academic growth and societal development. The session further handed over to the guest Dr. C. Udaya Kiran ,Principal,Bhaskar Engineering college. The session provided an overview of the seminar's objectives and set the tone for the subsequent sessions.

Sub: Request for Permission to Conduct Workshop on NAAC Accreditation & Assessment

Respected Sir,

IQAC is planning to conduct a workshop on NAAC Accreditation & Assessment on 22/10/22 in our campus. The workshop aims to provide faculty members with valuable insights into the accreditation process and help them understand the requirements for achieving and maintaining accreditation.

So we request you to give Approval for conducting this FDP and sanction the required amount to organize the FDP.

We eagerly anticipate your favorable response, and we remain committed to upholding the highest standards of quality.

Thank you Sir

Yours Faithfully

### Workshop on Overview of NAAC Accreditation and Assessment Process

Workshop on NAAC was held on 22/10/22 in Seminar Hall of our Institution at 9:30 am. This Workshop on NAAC Accreditation and Assessment was organized by IQAC of our college with the aim of providing faculty members, with a comprehensive understanding of the NAAC accreditation process and guidelines.

**Speaker :** Dr.Mallikarjuna Reddy,Associate Professor,Anurag University.

Program was formally inaugurated by our beloved Principal Dr.Apparao Naidu and briefed about the importance of this Workshop.Later IQAC Co-ordinator welcomed the Speaker and handed over the Session.

Dr.Mallikarjuna Reddy,Associate Professor,Anurag University. Speaker of this programme commenced the session and Covered the following.

Overview of the NAAC accreditation process and its importance in quality assurance.

Benefits of accreditation for institutions, faculty, students, and othis stakeholders.

Detailed explanation of the NAAC criteria and the specific metrics used for assessment.

Guidelines for compiling a comprehensive SSR, including data collection, analysis, and documentation procedures.

Effective presentation techniques and strategies for organizing information in the SSR. Addressing the key aspects required by NAAC, such as curricular aspects, teaching-learning processes, student support systems, and governance.

Session ended with vote of thanks by IQAC Co-ordinator. He expressed his sincere appreciation to our keynote speaker for his thought-provoking presentations and for shedding light on the significance of NAAC accreditation in promoting quality assurance and continuous improvement in higher education institutions.

The Workshop on NAAC Accreditation and Assessment provided an excellent platform for participants to enhance their understanding of the accreditation process and acquire the necessary knowledge and skills to pursue accreditation successfully. The workshop enabled participants to familiarize themselves with the NAAC criteria, prepare a comprehensive SSR, and implement quality enhancement strategies in the institution.

File No. 11-306-2018-NBA

Date 26.08.2022

To,

The Principal  
Vignan's Institute of Management & Technology for Women,  
Kondapur (V), Ghatkesar (M), Medichal (D)  
Telangana- 501301

**Subject:** Further accreditation status on the basis of Compliance Report of the programs in Tier II offered by Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301.

Sir,

This is regarding Compliance Report submitted by Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301 for the UG Engineering programs which were accredited by NBA in Tier-II for academic years 2019-20 to 2021-22 whose validity of accreditation has expired on 30.06.2022.

2. An Expert Team conducted data verification of the programs on 05<sup>th</sup> June, 2022. The report submitted by the Expert Team was considered by the concerned Committees constituted for the purpose in NBA. The Competent Authority in NBA has approved the following accreditation status to the programs as given in the table below:

Sl. No	Name of the Program(s) (UG)	Basis of Evaluation	Accreditation Status	Period of validity	Remarks
(1)	(2)	(3)	(4)	(5)	(6)
1.	Computer Science & Engineering	Tier-II June, 2015 Document	Accredited	Academic Years 2022-2023 to 2024-2025 i.e. Up to 30-06-2025	Accreditation status granted is valid for the period indicated in Col.5 or till the program has the approval of the Competent Authority, whichever is earlier
2.	Electronics & Communication Engineering		Accredited		

3. It may be noted that only students who graduate during the validity period of accreditation, will be deemed to have graduated with an NBA accredited degree.

4. The programs have been granted accreditation for further 3 years. Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301 should submit fresh online application under First Cycle SAR through e-NBA portal at least five months before the expiry of validity of accreditation mentioned above.

5. The accreditation status awarded to the programs as indicated in the above table does not imply that the accreditation has been granted to Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301 as a whole. As such the Institution should nowhere along with its name including on its letter head etc. write that it is accredited by NBA because it is program accreditation and not Institution accreditation. If such an instance comes to NBA's notice, this will be viewed seriously. Complete name of the program(s) accredited, level of program(s) and the period of validity of accreditation, as well as the Academic Year from which the accreditation is effective should be mentioned unambiguously whenever and wherever it is required to indicate the status of accreditation by NBA.

*Principal*  
Vignan's Institute of Management & Technology for Women,  
Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301

6. The accreditation status of the above programs is subject to change on periodic review, if needed by the NBA. It is desired that the relevant information in respect of accredited programs as indicated in the table in paragraph 2, appears on the website and information bulletin of the Institute.

7. The accreditation status awarded to the programs as indicated in table in paragraph 2 above is subject to maintenance of the current standards during the period of accreditation. If there are any changes in the status (major changes of faculty strength, organizational structure etc.), the same are required to be communicated to the NBA, with an appropriate explanatory note.

8. A copy each of Report of the Visiting Team in respect of the above programs is enclosed.

Yours faithfully,

  
(Dr. Anil Kumar Nassa)  
Member Secretary

To  
The Principal  
Vignan's Institute of Management & Technology for Women,  
Kondapur (V), Ghatkesar (M), Medichal (D)  
Telangana- 501301

Subject: Accreditation status of programmes applied by Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301.

Sir/Madam,

This has reference to your application I.D. No. 3125-04/09/2018 seeking accreditation by National Board of Accreditation in Tier-II format to UG Engineering programs offered by Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana-501301.

2. An Expert Team conducted on-site evaluation of the programs from 04<sup>th</sup>- 06<sup>th</sup> January, 2019. The report submitted by the Expert Team was considered by the concerned Committees constituted for the purpose in NBA. The competent authority in NBA has approved the following accreditation status to the programs as given in the table below:

Sl. No	Name of the Program (UG)	Basis of Evaluation	Accreditation Status	Period of validity	Remarks

2.	Electronics & Communication Engineering		Accredited		

3. It may be noted that only students who graduate during the validity period of accreditation, will be deemed to have graduated with an NBA accredited degree.

4. The programs have been granted accreditation for 3 years. Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301 should submit the Compliance Report at least six months before the expiry of validity of accreditation mentioned above to be eligible for consideration by the concerned Committee in NBA for further processing of the accreditation status. This could entail further extension of accreditation or a revisit, as deemed appropriate by NBA Committees.

5. The accreditation status awarded to the programs as indicated in the above table does not imply that the accreditation has been granted to Vignan's Institute of Management & Technology for Women, Kondapur (V), Ghatkesar (M), Medichal (D) Telangana- 501301 as a whole. As such the Institution should nowhere along with its name including on its letter head etc. write that it is accredited by NBA because it is program accreditation and not Institution accreditation. If such an instance comes to NBA's notice, this will be viewed seriously. Complete name of the program(s) accredited, level of program(s) and the period of validity of accreditation, as well as the Academic Year from which the accreditation is effective should be mentioned unambiguously whenever and wherever it is required to indicate the status of accreditation by NBA.

**AUDIT FINDINGS**

**Nonconformities identified during last visit – (VMTW05015)**

There were no corrective actions required to be taken in response to the last audit.

There are no outstanding nonconformities from previous audits.

**Nonconformities identified during this visit – Aspect Impact register is not updated**

The assessment was based on sampling.

**ASSESSMENT COMMENTS & OPPORTUNITIES FOR IMPROVEMENT**

**ASSESSMENT COMMENTS**

From the sample selected for audit at this surveillance audit the VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN management & employees have demonstrated that they are maintaining their Energy Management System (EnMS) in line with Energy management processes and the policy objectives. As can be seen form the findings of this report there is evidence of compliance with both ISO 50001:2018 and the EnMS, Policy and Objectives. The EnMS was seen to have the capability to meet applicable requirements and expected outcomes.

EnPI's are identified and energy objectives have been set as part of the energy review process. From the representative sample taken as part of the audit the EnMS was seen to be capable of achieving Energy policy commitments, objectives and operational control needs. The EnMS was assessed and found to be managing internal monitoring processes & internal audits.

The assessment demonstrated a high level of implementation of the processes and monitoring and measurement activities, ensuring that the planned arrangements are achieved. Management review and internal audits continue to be carried out to a high standard, are effective and conform to the requirements of the standard

Monthly monitoring of energy is reviewed and the results are investigated as appropriate. There is an opportunity to improve the investigation reporting (OFI/02) Energy performance is known and performance is evaluated against the objectives and predicted energy use.

There have been significant improvement made to the detail and effectiveness of the individual site audits. The duration and detail of the audit has been increased, and there is a positive effect can be seen in the energy performance. The audits now include interrogating the BMS and other control systems on site, improving control of energy use and better reflecting the sites occupancy.

**Site Review**

The audit was completed on site. A tour of 1 locations was included in this initial audit . These sites were all academic locations.

The site tours included interviews with the facilities managers and Facility Assistants, a review of site energy monitoring and a tour of the buildings including academics areas as relevant.

All of the locations visited were seen to be managed in line with the energy management system with onsite teams demonstrating a good understanding of the significant energy uses and the variables that effect energy efficiency.

**AUDIT CONCLUSION**

**Summary and certification status**

During the assessment no nonconformities were raised.

Continued certification is recommended.

The audit plan & objectives have been achieved and the certificate scope remains appropriate.

ISO 50001: During this audit it has been demonstrated and confirmed that there has been continual energy performance improvement made across the business. Examples of which are detailed in this report.

**Follow up action required**

In response to any nonconformity raised you are required to prepare, document and implement a correction and corrective action plan. Each finding must be investigated to identify any root causes or underlying trends. Appropriate action must be taken to eliminate the cause of any nonconformity in order to prevent reoccurrence. The plan must define timely action, timescales and responsibilities.

There is no need to submit this plan to us as the actions detailed will be verified by the auditor during the next visit.

Failure to adequately implement the planned action may result in the raising of a major nonconformity putting your certification in jeopardy.

A response to any opportunity for improvement raised is optional.

The scope of the EnMS has been updated to include carbon emissions from scope 3 sources. This has been done in anticipation of changes to the legal compliance scheme 'PAT Perform Achieve and Trade'. This may include net zero in future. This has been seen as an opportunity to remain compliant with PAT via the ISO 50001:2018 Certification. The details are to be fully established following the issue of government guidance on the changes to the PAT scheme.

There are potential complications with the relationship between Carbon reduction and energy efficiency. This will be monitored at future audits and will become clearer how this will fit in to the ISO 50001 EnMS, once the Indian Government has published the new PAT guidance / Scheme documents.

Continual Improvement of energy performance and the EnMS was demonstrated during this audit and the 3 year cycle. There are processes in place to identify and manage continual improvement. There has been significant improvement in energy performance set against the baseline. PIOEATFW continues to make cycle significant investment in new buildings to replace the older stock. There is an established commitment to continual improvement with stretching future objectives in place

All of the employees and management interviewed during this assessment were positive and demonstrated an awareness of the EnMS. There was an open dialogue established which greatly assisted the auditor – Thank You.

#### OPPORTUNITIES FOR IMPROVEMENT

##### OFI/01 – LEADERSHIP:

Top Management - Energy Policy and Carbon Management Plan were drafted by the Associate Director (Sustainable Operations) and approved by the Director of Estates.

The Carbon & Environment Action Group (C&EAG), is no longer responsible for this. The leadership section of the Compliance manual, needs to be reviewed to reflect this recent change in authorities.

##### OFI/02 – INVESTIGATION OF SIGNIFICANT DEVIATIONS:

Significant deviations are identified as part of the monthly energy monitoring process, with sites identified as having significant deviations required to investigate and respond the energy team.

A number of the responses are limited in detail and slow. Significant deviation needs to be investigated and responded to, to ensure energy performance is maintained. There is an opportunity to improve the response detail and time.
