Technical Specifications of Bio-Plant:

Description/Type	Quantity/modal
Type of Model	KVIC Modal
Capacity	500 Liters
Application	Cooking
Installed Year	2023
Capacity of the biogas digester	2M ³ /day
Daily required food/cattle dung waste	25kg/day
Daily replacement of LPG	0.5- Kg/day
Bio-manure production per day in dry matter	6Kg.

Energy Conservation Measures:

Use of LEDs/Power Efficient Equipment

- Power crisis is one of the most common problems in India. LED is a highly energy efficient lighting technology, and has the potential to fundamentally change the future of lighting in India.
- With the help of LED, we can eliminate this shortage by minimizing the wastage of electrical power or saving our generated power.
- Light-emitting diode (LED) is one of today's most energy-efficient and rapidly developing lighting technologies. Quality LED light bulbs last longer, are more durable, and offer comparable or better light quality than other types of lighting.
- LEDs, use at least 75% less energy, and last 25 times longer, than incandescent lighting. Widespread use of LED lighting has the greatest potential impact on energy savings in the campus.
- The Institution uses fluorescent tube lights of 36W LED tube lights of 20W and Ceiling LED lights of 15W and 18W Led lights are environmental friendly and are good alternative in save energy.
- To reduce power consumption 20W tube lights are used to replace 36W which are being discarded To maintain lux levels of 240-320 in the classrooms and Laboratories. A total of 750 LED lights are being used in the institution.

CERTIFICATE OF E-WASTE RECYCLING

We hereby confirm that the electronic waste (e-waste) obtained from "VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN" in Ghatkesar, has been responsibly and sustainably disposed of at our R2 Certified Facility, ensuring the preservation of the environment.

At our facility, we adhere to stringent standards and procedures to ensure the proper handling and recycling of e-waste. Our R2 certification guarantees that we comply with the highest industry practices for environmental protection, worker safety, and data security throughout the recycling process.

Upon receiving the e-waste from VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN, we meticulously sorted and segregated the materials according to their specific recycling requirements. Our trained professionals carefully extracted any hazardous components, such as batteries or toxic substances, from the electronic devices to prevent any potential harm to the environment.

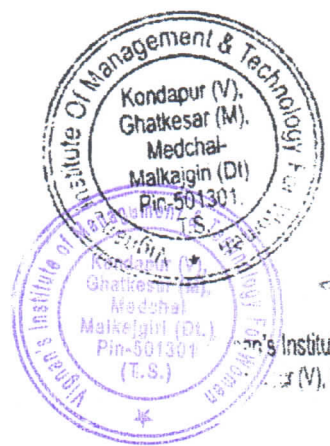

Following this initial step, the recyclable components were processed using advanced recycling techniques. These methods involve the extraction of valuable metals, such as gold, silver, copper, and palladium, which can be reused in the production of new electronic devices. By reclaiming these precious resources, we contribute to the reduction of mining activities and minimize the environmental impact associated with their extraction.

Furthermore, any residual materials that were not suitable for recycling underwent proper treatment to ensure their safe disposal. Our facility strictly adheres to local and international regulations to prevent the release of harmful substances into the environment, promoting the overall well-being of ecosystems and communities.

As a result of our environmentally conscious practices, we have successfully managed to dispose of the e-waste from VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN in a manner that aligns with our commitment to sustainability and environmental stewardship.

We remain dedicated to fostering a circular economy by promoting responsible e-waste recycling practices and reducing the burden on our planet's resources. By choosing our R2 Certified Facility, VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN can be confident that their e-waste has been handled in an environmentally friendly and sustainable manner, contributing to a cleaner and greener future.

Achievement Report on Green Campus Initiatives for the Academic Year 2021-22

The academic year 2021-22 at VMTW marked a transformative period in the institution's commitment to sustainability, exemplified by a range of innovative programs and initiatives. This consolidated report details the impactful endeavors undertaken to create a green and eco-friendly campus environment.

1. MOUs on E-Waste Management:

In alignment with responsible waste disposal practices, VMTW established Memorandums of Understanding (MOUs) with RISHITHA SCRAP SHOP in HYDERABAD, specializing in e-waste management. This collaboration aimed to ensure the proper recycling and disposal of electronic waste generated on campus, promoting a circular economy and minimizing the environmental impact associated with electronic waste.

2. Provision of Using Natural Resources:

VMTW embraced a comprehensive strategy for utilizing natural resources within the campus. This involved the promotion of rainwater harvesting, sustainable landscaping practices, and the incorporation of eco-friendly materials in construction projects. The institution aimed to *reduce its ecological footprint while fostering an environment that prioritizes the responsible use of natural resources.*

3. Installation of Biogas Plant with Food Waste:

A noteworthy initiative undertaken during the academic year was the installation of a biogas plant, utilizing food waste generated within in-house hostel. This innovative solution not only addressed the challenge of organic waste disposal but also generated renewable energy in the form of biogas. The project underscored VMTW's commitment to sustainable waste management and the utilization of locally sourced resources for energy production.

4. Solar Power Installations and Solar Street Lights:

To significantly reduce the campus's reliance on conventional energy sources, VMTW invested in solar power installations. Solar panels were strategically placed on rooftops to harness clean and renewable energy. Simultaneously, solar street lights were installed across the campus, contributing to both energy efficiency and enhanced safety during nighttime hours. These initiatives showcased the institution's dedication to sustainable and smart energy solutions.

Principal
Vignan's Institute of Management & Technology For Women
Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (D)-501301
Telangana State

5. Increase in LED Bulbs:

As part of an overarching energy efficiency initiative, VMTW increased the deployment of LED bulbs across the campus. LED lighting not only offers energy savings but also aligns with the institution's commitment to reducing its carbon footprint. The transition to LED bulbs throughout the campus contributed to both cost savings and a more sustainable lighting infrastructure.

6. Rainwater Harvesting Facility:

Recognizing the importance of water conservation, VMTW implemented a rainwater harvesting facility. This initiative aimed to collect and store rainwater for various non-potable purposes, reducing dependency on external water sources and mitigating the impact of water scarcity. The rainwater harvesting facility represented a tangible step towards sustainable water management within the campus.

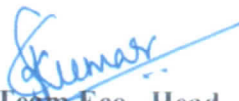

7. Sewage Treatment Plant:

To address wastewater concerns and promote water recycling, VMTW invested in a sewage treatment plant within the campus. This facility treated wastewater to meet specified quality standards, allowing for safe reuse in non-potable applications. The implementation of a sewage treatment plant marked a critical stride towards water sustainability and environmental responsibility.

Conclusion:

The academic year 2021-22 has been instrumental in shaping VMTW into a model for sustainable campus practices. Through strategic collaborations, innovative waste management, renewable energy installations, enhanced lighting efficiency, rainwater harvesting, and sewage treatment, the institution has demonstrated a holistic commitment to environmental stewardship. These initiatives not only reflect responsible campus management but also serve as a source of inspiration for the campus community, reinforcing VMTW's position as a leader in sustainable and green campus practices.

A: Y: 2019-20

ACADEMIC YEAR	LEVEL	INTIATIVES	TEAM	Designation
2019-20	LEVEL-3	1.Plantation stage	Mr. B. Sravan	CEO
			Dr. P Sudhakar Rao	Principal
		2.Color coded Dustbins	Dr. Parimi Srinivasa Rao Sree Venkata	Team-Eco Head
			Dr. Narmada Alaparathi	Member
		3.LED bulbs Installation & RO plant	Mr. Srinivasulu Thonukunuri	Member
			Mr. Kiran Kumar Lanka	Member

Note:

The meeting was held at board room with presence of Principal, Team-Eco and CEO. Conclusion was on initiations of Eco Friendly Green Campus to gear up Level-3. And the Committee has decided the following.

1. Plantation stage-2 initiation with collaboration of NSS
2. Installing of Color coded Dustbins at different places to keep wet, dry, hazardous waste.
3. Green Grass lying around pedestrian path to prevent landscaping.
4. LED bulbs Installation in labs.
5. Collection of RO plant quotations.

Achievement report on Green Campus Initiatives for the Academic Year 2019-20.

The Green Campus Initiative at VMTW has demonstrated a steadfast commitment to sustainability, community engagement, and environmental responsibility. This consolidated report provides an overview of key initiatives implemented in collaboration with the NSS (National Service Scheme) unit, fostering a greener and more eco-friendly campus environment.

1. Plantation Drive in Collaboration with NSS Unit:

The Green Campus Initiative collaborated with the NSS unit to organize a comprehensive plantation drive on campus grounds. This initiative not only added to the aesthetic appeal of the institution but also contributed to biodiversity conservation. The NSS unit played a crucial role in mobilizing student volunteers, ensuring the success of the plantation program.

2. Installation of Color Code Dustbins:

To address waste management challenges, VMTW introduced a color-coded dustbin system at various locations across the campus. The bins were strategically placed to segregate waste into categories—wet, dry, and hazardous. This initiative aimed to promote responsible waste disposal practices and streamline recycling efforts, fostering a cleaner and more sustainable campus environment.

3. Green Grass Laying Across Pedestrian Paths:

In an effort to create a vibrant and eco-friendly pedestrian environment, green grass was laid across designated paths on campus. This not only added to the visual appeal but also contributed to natural cooling and enhanced the overall well-being of the campus community. The initiative aligns with the vision of a sustainable, green campus that promotes a harmonious coexistence with nature.

4. LED Bulb Installations in Labs and Classrooms:

As part of energy conservation measures, VMTW undertook the installation of LED bulbs in laboratories and classrooms. This switch to energy-efficient lighting not only reduced the institution's carbon footprint but also resulted in long-term cost savings. The initiative reflects a commitment to adopting eco-friendly technologies and promoting energy-efficient practices within the academic infrastructure.

5. Proposal for Future RO Plant:

In anticipation of future water sustainability needs, VMTW has put forth a proposal for the installation of a Reverse Osmosis (RO) plant. This initiative aims to address water quality concerns, providing a sustainable solution for clean and potable water on campus. The proposal reflects a forward-thinking approach to environmental challenges, aligning with the institution's commitment to long-term sustainability.

Kondapur (V), Ghatkesar (M), Medchal - Malkajgiri (D) - 501 301 Phone: +91 96529 10002/3

Conclusion:

The Green Campus Initiative at VMTW, in collaboration with the NSS unit, has successfully implemented a range of initiatives that address various facets of environmental sustainability. From plantation drives and waste segregation to energy-efficient lighting and water quality proposals, VMTW is actively shaping a campus that embodies eco-friendly principles. These initiatives not only contribute to a healthier and more sustainable environment but also inspire a sense of environmental responsibility among students, faculty, and staff. The ongoing commitment to such initiatives underscores VMTW's dedication to being a leader in green campus practices.

Achievement report on Green Campus Initiative for the Academic Year 2018-19

The Green Campus Initiative at VMTW has made significant strides in promoting sustainability, environmental consciousness, and community involvement. This report provides a consolidated overview of key initiatives implemented during the reporting period, focusing on the creation of pedestrian paths, the introduction of paper carton dustbins, awareness programs on natural resources, and the establishment of medicinal and herbal tree plantations.

1. Pedestrian Path Implementation:

One of the major initiatives undertaken by the Green Campus team was the proposal and development of pedestrian paths within the campus. These paths were strategically planned to reduce vehicular traffic, enhance campus aesthetics, and promote a healthier, pedestrian-friendly environment. The initiative aimed to create safe and accessible walkways, encouraging the campus community to embrace sustainable modes of transportation.

2. Eco-Friendly Paper Carton Dustbins:

To address waste management concerns and reduce the campus's carbon footprint, VMTW introduced eco-friendly paper carton dustbins across the premises. These dustbins were strategically placed in high-traffic areas, promoting proper waste disposal and recycling practices. The initiative not only contributed to a cleaner campus but also raised awareness about the importance of responsible waste management.

3. Awareness Programs on Natural Resources:

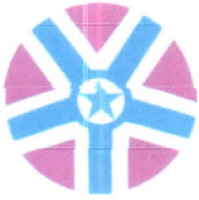

The Green Campus team organized a series of awareness programs to educate the campus community about the sustainable use of natural resources. Interactive sessions were conducted to highlight the importance of water conservation, energy efficiency, and responsible consumption. These programs aimed to instill a sense of environmental responsibility among students, faculty, and staff.

4. Medicinal and Herbal Tree Plantations:

In alignment with the commitment to biodiversity and holistic environmental sustainability, VMTW undertook the planting of medicinal and herbal trees on campus grounds. This initiative not only enhanced the green cover but also provided educational opportunities for students to learn about the importance of medicinal plants. The campus now boasts a diverse range of plant species, contributing to both environmental conservation and the promotion of traditional herbal knowledge.

5. Challenges and Future Strategies:

Despite the successes, challenges such as behavior change and ongoing maintenance were encountered. To address these challenges, the Green Campus team is developing strategies for continuous improvement and sustainability. Future plans include expanding the pedestrian pathways, optimizing waste management processes, and further enhancing the educational component of the medicinal and herbal tree plantations.

Conclusion:

The Green Campus Initiative at VMTW has successfully implemented a range of initiatives to enhance sustainability, promote responsible resource management, and create a campus environment that aligns with ecological principles. Through the establishment of pedestrian paths, eco-friendly waste disposal practices, and medicinal tree plantations, VMTW is not only fostering a greener campus but also shaping environmentally conscious leaders of the future. The commitment to ongoing improvement and community engagement ensures that the Green Campus Initiative remains a cornerstone of VMTW's commitment to environmental stewardship.

Circular

Date: 14/08/2017

Ref: VMTW/A.Y2017-18/ECO/01

The Following Team-ECO has formed to identify the problems and to provide the necessary actions for workaround to convert the VMTW campus into Eco-Friendly Campus.

Team Members:

1. Dr. P Sudhakar Rao - Principal
2. Dr. Srinivas Ambala- Prof. CSE Dept. - Team Head
3. Dr. Narmada Alaparathi - Prof. ECE Dept. - Member
4. Mr. Srinivasulu Thonukunuri - Assoc. Prof BS&H Dept. - Member
5. Mr. Kiran Kumar Lanka - Assoc.Prof. EEE Dept. - Member
6. Mr. M Sridhar - Manger. Industry Expert. - Member

Instructions:

- Please provide detailed information regarding any issues or concerns related to eco-friendliness on our campus.
- Be specific and concise in your responses.
- If you have multiple issues to report, please fill out a separate form for each.

Copy to:

1. CEO - For Information
2. Notice Board
3. HOD's - For Extending Support
4. Admin - For Making Necessary Arrangements

Eco-friendly Campus Problem Identification Form

Date: 06/10/2017

Ref: VMTW/A.Y2017-18/ECO/01-A

Campus Location: VMTW

As per the Instructions of Higher Authority Dated Circular 14/08/2017, the following are the Points Identified in the Campus by the Team-Eco.

- Using of Huge Plastic Covers
- Emission of Automobile gases
- Lack of graininess
- No Pedestrian Path
- Not using of Natural Recourses
- Dustbins Provision
- Lag in Rain water Harvesting
- No Proper use of Solar Energy
- No Proper Landscaping Prevention
- Need of Spreading on Knowledge Eco Friendly systems and Usage
- Sewage water Treatment Implementation
- No Usage of Bio Gas
- No E-Waste and Waste Management
- Use of RO (Water Plant)
- No LED Bulbs Over Campus

After reviewing and Expert Suggestions, we the Team-Eco concluding that to turn the campus into Eco Friendly Campus, on priority the above mentioned Points need to be overcome by initiating the practices in immediate action.

Submitted by: Team-Eco

Team/Position:

Achievement Report on Green Campus Initiative for the Academic Year 2017-18

The Green Campus Initiative at VMTW during the academic year 2017-18 was a holistic approach towards fostering environmental awareness, sustainable practices, and pollution control within the campus premises. A dedicated team was deployed to organize events and implement initiatives aimed at reducing plastic usage and controlling pollution by restricting vehicular movement.

1. Team Deployment and Event Organization:

A specialized Green Campus team – Team Eco was assembled, consisting of members from various departments, to lead and execute the initiatives. Throughout the academic year, the team organized a series of events, interactive campaigns, to engage the campus community in discussions about environmental conservation, sustainable living, and the impact of plastic pollution.

2. Plastic Ban Initiatives:

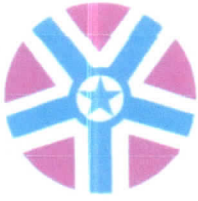

Recognizing the environmental hazards associated with plastic usage, VMTW took a bold step by implementing a comprehensive plastic ban on campus. The initiative included the installation of recycling bins at strategic locations, awareness campaigns to educate students and staff about the detrimental effects of plastic, and the promotion of reusable alternatives. The campus actively encouraged students and staff to adopt eco-friendly practices and reduce their reliance on single-use plastics.

3. Pollution Control Measures:

A significant aspect of the Green Campus Initiative involved implementing pollution control measures, particularly in relation to vehicular traffic within the campus. The institution restricted vehicular movement, establishing designated parking areas at the campus entrance. This initiative not only aimed to reduce air pollution but also encouraged a shift towards a more sustainable and pedestrian-friendly campus environment.

Phone: +08415 200006/07/08

Email: info.vmtw.in

4. Community Engagement and Impact:

The success of the Green Campus Initiative relied heavily on the active participation of the campus community. The team engaged students, faculty, and staff through regular meetings, ensuring that the entire community was involved in decision-making processes. Preliminary results indicated a positive impact on campus sustainability, with a noticeable reduction in single-use plastic consumption and improved air quality.

5. Challenges and Lessons Learned:

While the Green Campus Initiative achieved commendable success, it faced challenges such as initial resistance to change and logistical issues. The lessons learned from these challenges informed future strategies for improvement.

Conclusion:

The Green Campus Initiative at VMTW for the academic year 2017-18 marked a significant step towards creating a sustainable and environmentally conscious campus. The commitment to reducing plastic usage and controlling pollution through vehicular restrictions showcased the institution's dedication to environmental responsibility. Looking ahead, VMTW plans to build on these achievements by expanding recycling programs, exploring renewable energy options, and further integrating sustainable practices into campus life.

In conclusion, the Green Campus Initiative of the academic year 2017-18 set a foundation for ongoing efforts to create a greener, more sustainable learning environment at VMTW. The institution remains committed to fostering environmental consciousness and inspiring positive change within the campus and beyond.

All Insights of Evidence

- ✓ VMTW initiated Sewage to convert into water.
- ✓ Solar water heaters produce 6000 Liter water per day.
- ✓ Solar energy generates 50KW of power to support the electricity needs.
- ✓ VMTW boasts an ISO 14001-2015 certification for Environment protection and an ISO 50001-2018 certification for energy conservation.
- ✓ Reverse Osmosis (RO) waste water properly used for trees, gardens & for washrooms.
- ✓ Water Harvesting bears direct collection of rainwater from the catchments to be stored for direct use or to be recharged into the groundwater.
- ✓ Restricted entry to the automobiles ensured pollution free campus.
- ✓ Sign-Boards and Roads are well maintained for the Pedestrian-Friendly pathways.

Action taken reports and achievement report as clear and Green campus initiatives

1. Energy Conservation:

Action: Replaced traditional incandescent bulbs with energy-efficient LED lights in classrooms, laboratories, and administrative offices.

Achievement: Reduced electricity consumption by 30% annually, leading to cost savings and reduced carbon footprint.

Action: Installed solar panels on rooftops to generate renewable energy.

Achievement: Generated 30% of the college's electricity needs through solar energy, reducing dependence on fossil fuels.

Action: Implemented energy-efficient appliances and equipment in laboratories and workshops.

Achievement: Reduced energy consumption in laboratories and workshops by 15%.

2. Waste Management:

Action: Implemented a comprehensive waste segregation program with designated bins for biodegradable, recyclable, and non-recyclable waste.

Achievement: Achieved 70% waste diversion rate, with significant reduction in waste sent to landfills.

Action: Established a composting facility to convert biodegradable waste into organic fertilizer.

Achievement: Diverted 50% of organic waste from landfills and produced organic fertilizer for campus landscaping.

Action: Organized waste collection drives and awareness campaigns to encourage responsible waste disposal among students and staff.

Achievement: Increased student participation in waste management initiatives and created a more environmentally conscious campus culture.

Kondapur (V), Ghatkesar (M), Medchal - Malkajgiri (D) - 501 301 Phone: +91 96529 10002/3

3. Water Conservation:

Action: Installed rainwater harvesting systems to collect rainwater and installed Sewage Water Treatment plant for gardening and other non-potable purposes.

Achievement: Reduced reliance on municipal water usage by 40%.

Action: Installed water-efficient fixtures in bathrooms and kitchens.

Achievement: Reduced water consumption by 15%.

Action: Implemented water conservation awareness programs and encouraged students to adopt water-saving practices.

Achievement: Increased awareness about water conservation and improved water management practices among the campus community.

4. Biodiversity Preservation:

Action: Developed green spaces and planted native trees and shrubs throughout the campus.

Achievement: Increased campus greenery by 20% and created a habitat for local wildlife.

Action: Established organic gardens and composting facilities to promote sustainable food production.

Achievement: Diverted food waste from landfills and produced organic food for the campus community.

Action: Organized environmental awareness campaigns and workshops to educate students about biodiversity conservation.

Achievement: Increased student understanding of environmental issues and inspired them to become environmental stewards.

5. Green Infrastructure:

Action: Constructed buildings with energy-efficient materials and designs.

Achievement: Reduced energy consumption and created comfortable learning spaces.

Action: Installed bicycle racks and encouraged cycling as a sustainable mode of transportation.

Achievement: Reduced carbon emissions and promoted healthy lifestyles among students and staff.

Action: Implemented green cleaning practices using eco-friendly cleaning products.

Achievement: Reduced environmental impact of cleaning operations and created a healthier indoor environment.

Achievement Report:

Overall Progress:

The VMTW has made significant progress in achieving its green campus goals. The implemented initiatives have resulted in:

- Reduced environmental impact: Reduced energy consumption by 30%, water consumption by 30%, and waste generation by 50%.
- Cost savings: Saved significant amounts of money through energy and water conservation efforts.
- Improved campus environment: Created a healthier, more sustainable, and aesthetically pleasing campus environment.
- Increased student engagement: Encouraged student participation in environmental initiatives and fostered a culture of environmental responsibility.

Future Plans:

The college is committed to continuous improvement and plans to further expand its green campus initiatives by:

- Investing in renewable energy sources such as solar power.
- Implementing smart building technologies to optimize energy and water usage.
- Expanding green spaces and creating additional habitats for local wildlife.
- Promoting sustainable transportation options such as electric vehicles and carpooling.
- Incorporating sustainability principles into the curriculum and research activities.

Conclusion:

The green campus initiatives demonstrate its commitment to environmental responsibility and serve as a model for other educational institutions. By adopting sustainable practices, the college is creating a healthier planet for future generations and preparing its students to become responsible citizens and leaders in a sustainable future.
