**A Report on
"A Seminar on Converting a Research Idea into Publication"**

Date: 23-08-2020

Department of Computer Science & Engineering conducted "seminar on Converting a Research Idea into Publication", on 21-08-2020 for Faculty

Speaker: Dr.A.Nirmal kumar, Associate Professor From CSE Dept CMR institute of Technology as the resource person for this Seminar. The main objective of this program is to inculcate the knowledge on Converting a Research Idea into Publication, to motivate Faculty, to do and participate in effective research activities.

Dr.A.Nirmal Kumar

The purpose of the Seminar was to look into the essentials and basics of publishing a research paper in high index journals. The resource person of the Seminar was Dr.A.Nirmal Kumar. The session started with a broad discussion of the research process and the steps involved in going from having a research idea to publishing it. The speaker covered a wide range of topics, including how to choose a decent journal and how to produce a research concept. The speaker also discussed how to choose a publication based on its number of citations and how to comprehend a researcher's methodology, which may be qualitative or quantitative.

A detailed outline of a manuscript was provided and discussed with the participants to achieve a ground understanding of the different components of a good research paper. Finally, the process

Date: 15/02/2020

Programme Report

Name of the Programme : A Workshop on "Analysis of Graphs in Research Papers"

Organized by : Department of CSE

Schedule dates : 14-02-2020

Resource Person : Mrs. Aruna

Assist prof, SNIST, Hyderabad

Email: aruna@snist.in

Objective of the Program

- The main objective this workshop on "Analysis of Graphs in Research Papers" is to make the faculty to get familiarize, This workshop aims at bringing together researchers and practitioners from different fields (including, but not limited to, Digital Libraries, Information Extraction, Machine Learning, Semantic Web, Knowledge Engineering, Natural Language Processing, Scholarly Communication, and Bibliometrics) in order to explore innovative solutions and ideas for the production and consumption of Scientific Knowledge Graphs (SKGs). She explained for the submission of papers covering, but not limited to, one or more of the following topics:
- Methods for extracting entities (methods, research topics, technologies, tasks, materials, metrics, research contributions) and relationships from research publications
- Methods for extracting metadata about authors, documents, datasets, grants, affiliations and others.
- Data models (e.g., ontologies, vocabularies, schemas) for the description of scholarly data and the linking between scholarly data/software and academic papers that report or cite them
- Description of citations for scholarly articles, data and software and their interrelationships

ASH
PRINCIPAL
Vignans Institute of Management & Technology For Women
Kondapur(V), Ghatkesar(M), Medchal-Malkajgiri(D)-501301
Telangana State

- Applications for the (semi-)automatic annotation of scholarly papers
- Theoretical models describing the rhetorical and argumentative structure of scholarly papers and their application in practice
- Methods for quality assessment of scientific knowledge graphs
- Description and use of provenance information of scholarly data
- Methods for the exploration, retrieval and visualization of scientific knowledge graphs
- Scientific claims identification from textual contents
- Automatic or semi-automatic approaches to making sense of research dynamics
- Content- and data-based analysis on scholarly papers
- Automatic semantic enhancement of existing scholarly libraries and papers
- Reconstruction, forecasting and monitoring of scholarly data
- Novel user interfaces for interaction with paper, metadata, content, software and data
- Visualisation of related papers or data according to multiple dimensions (semantic similarity of abstracts, keywords, etc.)

Mrs. Aruna is delivering her Content on Research papers

Objective of the Event

The Objective of this seminar is to make use of Artificial Intelligence and to make the students to get familiarize, how AI ruling the world. With an intent to tell the students about the scope of AI in the current day technological advancements. It's a behaviour of machines which is apparently intelligent. It is also known as study of intelligent agents: any device that perceives its environment and takes actions that maximize its chance of success at some goal. "Learning" & "Problem solving" are the capability of an artificially intelligent machine. The whole study related to Artificial intelligence concern about the beneficiary and safety features of the system associated. While developing an algorithm for AI the risk management is mandatory. With our AI workshop program one can easily get a kick start in this particular field of technology.

Outcomes of the Event:

After completion of the Seminar on "**Artificial Intelligence in Research and development**", the students are expected to: Researchers use AI-based algorithms to search databases of molecules and find effective molecules with desired properties. Such an algorithm may be able to search databases of millions of molecules in a fraction of the time it would take an expert scientist

Creating a technological foundation for trustworthy AI technologies, especially trustworthy machine learning (ML) technologies. Modern AI and ML systems are currently brittle, can have unexpected behaviors that are unsafe, and present new software security risks. Despite these challenges, modern ML capabilities will be increasingly woven into our society, economy, and global military systems in the years ahead. We can look to past decades for a powerful lesson on what happens when security is not sufficiently prioritized: security was not a leading concern during the creation of information technology infrastructure, and today we face recurring cybersecurity challenges as a result. We must approach AI technologies differently, focusing on security early and broadly. To that end, we will grow our work substantially in AI security, safety, and resilience – and invest to mature AI engineering as a discipline. Our focus will particularly include trustworthy AI decision-making, basic research in machine understanding, secure use of AI technologies as part of larger integrated systems, and robust ML methods. This work will also provide a

CSE & ECE

foundation for AI applications that continue to preserve human accountability in military operations.

- Understand Artificial Intelligence in broader range
- Understand how AI Applications are solving the current day problems
- Analyze the real world problems where AI could be applied.
- This workshop will be give an overview of many concepts, techniques, and algorithms in machine learning, beginning with topics such as classification and linear regression and ending up with more recent topics such as working with neural network, network training and adaptive training etc.

Feedback/Suggestions:

- More number of Seminars on similar advanced technologies
- Nice delivery of content made me to stick to entire session to listen. Nice one.
- One day is insufficient to learn both the complete concepts

Programme Report

Name of the Program : **Seminar on Research Publication And API**

Organized by : Department of CSE

Schedule dates : 02-12-2019

Resource Person : Dr K Srinivas , srinivasakatakam@gcet.edu.in
Professor, Dept: Information Technology
Geethanjali college of Engineering and Technology

Resource Person Dr. K. Srinivas

Objective of the Program:

The purpose is to perform a synthesis of API research. The study took stock of literature from academic journals on APIs with their associated themes, frameworks, methodologies, publication outlets and level of analysis. The authors draw on a total of 104 articles from academic journals and conferences published from 2010 to 2018. A systematic literature review was conducted on the selected articles. The findings suggest that API research is primarily atheoretical and largely focuses on the technological dimensions such as design and usage; thus,

- Opposing viewpoints are included and rebutted, showing why the author's argument is more valid
- The paper shows the author's understanding of the topic and the material being used
- The work is original, not plagiarized
- Every source is correctly documented and credited in a recognized citation style
- The paper is written in clear language in a style suitable for college research

Total Participation: 95

Feedback:

- It would be really a fabulous session that I have attended so far.
- Nice delivery of content made me to stick to entire session to listen. Nice one.

Schedule dates : 24/10/2019

Resource Person : Mr. N. Bhaskar,

Associate Professor,

CMR Technical Campus

Email: bhaskarrese@cmrtec.in

N. Bhaskar

Objective of the Program :

He speaks about What is a research paper?

A research paper is a type of academic writing that provides an in-depth analysis, evaluation, or interpretation of a single topic, based on empirical evidence. Research papers are similar to analytical essays, except that research papers emphasize the use of statistical data and preexisting research, along with a strict code for citations.

PRINCIPAL

Vignan's Institute of Management & Technology For Women
Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (D)
Telangana State

Research papers are bedrock of modern science and the most effective way to share information across a wide network. However, most people are familiar with research papers from school; college courses often use them to test a student's knowledge of a particular area or their research skills in general.

Considering their gravity, research papers favor formal, even bland language that strips the writing of any bias. Researchers state their findings plainly and with corresponding evidence so that other researchers can consequently use the paper in their own research.

How to write a research paper in 9 steps

1. Understand the assignment
2. Choose your topic
3. Gather preliminary research
4. Write a thesis statement
5. Determine supporting evidence
6. Write a research paper outline
7. Write the first draft
8. Cite your sources correctly
9. Edit and proofread

Outcomes of the Workshop:

Make sure you know the requirements of your specific assignment. But in general, a good research paper will have the following qualities:

- A strong and focused thesis statement
- Logically organized arguments and main points
- Each main point is supported by persuasive facts and examples

neglecting most of the social issues such as the business and managerial applications of APIs, which are equally important. Future research directions are provided concerning the gaps identified.

Outcomes of the program:

Furthermore, big data analytics (BDA) assists a company in making productive and efficient decisions and provides new insights and influences on the results of efficiency improvements. Application programming interface (API) is an automation, data accessibility, and risk mitigation tool that builds automation work, establishes data resource connections, controls data access, and creates value by connecting different software to exchange information between and within organizations. Robotic process automation (RPA) is a technology that reduces costs and improves performance in routine tasks. The API's Lubricants Group is working to redefine "base stock slate". API's slate definition dates from the early 1990's when it was included in the early version of API 1509. However, this definition is inadequate because it did not fully anticipate future base stock complexity, and API 1509 does not explain what problems can occur if a slate contains different base stocks at the same viscosity. A discussion covers the importance of slate; approved base oil interchange within the slate; properly designing a slate; Europe's own definition of base stock slate; and new definition of slate that API is considering.

Telangana State

Outcomes of the Workshop:

- The young researchers will get a glimpse and idea of various graphical techniques available at their disposal and they can identify which graphical technique is to be used for which purpose.
- The work performed in research paper will bring conceptual clarity to the researchers about graphs and their usage areas.

Total Participation: 60

Feedback:

- It was really appreciated hearing about your creative process and it has helped me to feel more confident in jumping into doing more elaborate visualizations and helped me to consider how to tweak my graphic design process slightly to serve data visualization.
- such a great session, really comprehensive and appropriate for lots of experience levels.
- I learned a lot, and as a budding scientist am excited to implement these concepts to my own research

Department of Electronics and Communication Engineering
A Report on
“Basics of IPR& Indian Patent filing Procedure”

Date: 15-12-2019

Department of Electronics and Communication Engineering conducted seminar on – “Basics of IPR& Indian Patent filing Procedure”, on 13th December 2019 for Faculty, students, and Researchers.

Speaker Dr.Samiran Chatterjee, Professor, ECE Dept., VMTW, Hyderabad.

A total of 91 members participated in the seminar. This seminar session provided an excellent opportunity to learn about IPR, Patents and the patent filling procedure.

Date & Time: The seminar was conducted on 13-12-2019 at 10:00 AM–3:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shravan, Principal Dr. P. Sudhakar Rao and Mr. Vijay Kumar R. Urkude, HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent in feedback.

The speaker explained that **patent** is a type of intellectual property that gives its owner the legal right to exclude others from making, using, or selling an invention for a limited period of time in exchange for publishing an enabling disclosure of the invention. In most countries, patent rights fall under private law and the patent holder must sue someone infringing the patent in order to enforce their rights. In some industries patents are an essential form of competitive advantage; in others they are irrelevant.

The procedure for granting patents, requirements placed on the patentee, and the extent of the exclusive rights vary widely between countries according to national laws and international agreements. Typically, however, a patent application must include one or more claims that define the scope of protection that is being sought. A patent may include many claims, each of which defines a specific property right.

The word *patent* originates from the Latin *patere*, which means "to lay open" (i.e., to make available for public inspection). It is a shortened version of the term *letters patent*, which was an

PRINCIPAL
Vignan's Institute of Management & Technology For Women
Kondapur (V), Ghatkesar (M), Medchal-Malkajgiri (D)-501301
Telangana State

open document or instrument issued by a monarch or government granting exclusive rights to a person, predating the modern patent system. In modern usage, the term *patent* usually refers to the right granted to anyone who invents something new, useful, and non-obvious. A patent is often referred to as a form of intellectual property right, an expression which is also used to refer to trademarks and copyrights, and which has proponents and detractors.

The speaker explained how to file the patent in detail in the following steps :

Procedure for obtaining a patent in India has steps of capturing your idea for creating complete invention disclosure, conducting a patentability search, drafting a patent application, filing the application, publication of application, filing a request for examination, examination, responding to objections, and grant of the patent.”

- Steps and Procedure for Obtaining a Patent in India
- Step 1: Going from idea to complete invention disclosure
 - Step 2: Patentability search (optional step)
 - Step 3: Patent drafting/writing.
 - Step 4: Filing patent application
 - Step 5: Publication of application
 - Step 6: Request for examination (RFE)
 - Step 7: Response to objections
 - Step 8: Grant of patent

The speaker concluded by giving suggestions to the faculty and research scholar that if they follow the above step carefully, they can file the patent very easily.

Email: narsimhaG@gmail.com

Dr.G.Narsimha

Objective of the Program

- The main objective this Seminar on "Enforcement of Intellectual Property Rights" is to make the faculty to get familiarizes about the IPR methods. This workshop will familiarize students with Social Entrepreneurship, Swachhta and Rural Engagement and will help them plan and implement SESREC activities. They will also be eligible to participate in the National SESREC Action Plan Competition 2020-21.

Outcomes of the Workshop:

Faculty will get insights about the following:

Department of Electronics and Communication Engineering
A Report on

**” HOW TO START SMALL SCALE INDUSTRY UNIT BY AN
ENTERPRENUER”**

Date: 20-10-2019

Department of Electronics and Communication Engineering conducted **seminar on** – “One day seminar on **”HOW TO START SMALL SCALE INDUSTRY UNIT BY AN ENTERPRENUER”**, on 17-10-2019 for Faculty and students,

Speaker:Mr. GADDAM SUDARSHAN, Faculty Member, National Institute for Micro, Small and Medium Enterprises (ni-msme)

A total of 100 members participated in the seminar. This seminar session provided an excellent opportunity to learn how to start a Small Scale Industry unit by an entrepreneur.

Date & Time: The seminar was conducted on 17-10-2019 at 11:00 AM–12:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. P. Sudhakar Rao, Mr. Vijaykumar R. Urkude HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent feedback.

The speaker explained that the Small Industries Development Organization was established in 1954 on the basis of the recommendations of the Ford Foundation. It has over 60 offices and 21 autonomous bodies under its management. These autonomous bodies include Tool Rooms, Training Institutions and Project-cum-Process Development Centers.

Services provided include:

- Facilities for testing, toolmenting, training for entrepreneurship development
- Preparation of project and product profiles
- Technical and managerial consultancy
- Assistance for exports
- Pollution and energy audits

Government of India to promote small and budding entrepreneurs of post independent India, decided to establish a government agency which can mediate and provide help to small scale industries (SSI). As such they established the National Small Industries Corporation with objectives to provide machinery on hire purchase basis and assisting and marketing in exports. Further, SSIs registered with NSIC were exempted from paying Earnest money and provided facility of free participation in government tendered purchases. Also, for training persons the training facilities centers and for aiding in modernizing the small industries several branches of NSIC were opened up by government over the years in several big and small towns, where small industries were growing Relevant queries were arising from the side of students and faculty delegates. They got justified answers from the speaker.

NSIC also helps in organizing supply of raw materials like coal, iron, steel and other materials and even machines needed by small scale private industries by mediating with other government companies like Coal India Limited, Steel Authority of India Limited, Hindustan Copper Limited and many others, who produce this materials to provide same at concessional rates to SSIs. Further, it also aids small scale industries by taking orders from Government of India owned enterprises and procures these machineries from SSI units registered with them, thus providing a complete assistance right from financing, training, providing raw materials for manufacturing and marketing of finished products of small-scale industries, which would otherwise not be able to survive in face of competition from large and big business conglomerates. It also helps SSI by mediating with government owned banks to provide cheap finance and loans to budding small private industries of India.

Nowadays, it is also aiding by setting up incubation centers in other continents and international technology fairs to provide aspiring entrepreneurs and emerging small enterprises a platform to develop skills, identify appropriate technology, provide hands-on experience on the working projects, manage funds through banks, and practical knowledge on how to set up an enterprise.

The speaker concluded by briefing the above points and accepted the queries from the audience and given qualification.
