## Department of Electronics and Communication Engineering A Report on "Research Methodology and Technical Writing"

Date: 01-07-2018

Department of Electronics and Communication Engineering conducted seminar on – "Research Methodology and Technical Writing", on 29-06-2018 for Faculty and Researchers.

Speaker Dr.Vankdoth Krishna Naik, Professor, Brilliant Grammar School Educational Society group of Institution, Hyderabad.

A total of 18 members participated in the seminar. This seminar session provided an excellent opportunity to learn about Research Methodology and Technical Writing.

**Date & Time:** The seminar was conducted on 29-06-2018 at 12:00 PM–01:00 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. P. Sudhakar Rao and Dr A. Narmada, HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent feedback.

The speaker gave a brief explanation about research methodology by first defining in simple terms that methodology is a clear-cut idea on what methods or process the researcher is going to use in his or her research to achieve research objectives. To plan for the whole research process at the right point of time and to advance the research work in the right direction, carefully chosen research methodology is very critical. In other words, what is Research methodology can be answered as it maps out the whole research work and gives credibility to whole effort of the researcher. The speaker then discussed the following topics in detailed:

  
PRINCIPAL  
Vignan's Institute of Management & Technology For Women  
Kondapur (V), Ghatkesar (M), Medchal-Malkajiri (Dt)-501301  
Telangana State

- Introduction To Research Methodology
- Research Definition
- Definitions Of Research Methodology
- Objectives Of Research
- Types Of Research
- Qualities Of a Researcher
- Research Process
- Features Of Research Methodology
- Advantages Of Research Methodology
- Disadvantages Of Research Methodology

The speaker then discussed that the essence of engineering is the application of theory to produce tangible results. If a technical paper contains both theory and measured results, and clearly shows how the theory and results can be broadly applied, generally it can be submitted for a publication.

## Programme Report

Name of the Program : **Workshop on "Research Design and Measurement"**  
Organized by : Department of CSE  
Schedule dates : 13/08/2018  
Resource Person : Mr.P.Jithendra Kumar,  
Teamleader, Accenture, IT  
Email-id: [jithendra@yahoo.com](mailto:jithendra@yahoo.com)

### **Objective of the Program**

- The main objective this **Workshop on "Research Design and Measurement"** is to make the faculty to get familiarizes about the Research Design.
- He told about Research is conducted with a purpose to: Identify potential and new customers
- Understand existing customers
- Set pragmatic goal

  
**PRINCIPAL**

Email: info@vmtw.in

- Develop productive market strategies
- Address business challenges
- Put together a business expansion plan
- Identify new business opportunities
- He also mentioned that Exploratory, Descriptive and Explanatory are the three main purposes of Research. Apart from this, He explained that the Research can be classified into Fundamental and decisional Research on the basis of Application, Descriptive and co-relational on the basis of Objectives, Structural and unstructured on the basis of inquiry mode, and Analytical, Fundamental, Qualitative, Quantitative, Empirical Research are other Researches.
- first step in any research project is to write a research proposal. The research proposal indicates the research problem that you will study, and shows the road map to undertaking the research project. A research proposal is intended convince others that you have a worthwhile research project and that you have the competence and the work plan to complete it. Generally, a research proposal should contain all the key elements involved in the research process, and include sufficient information for the readers to evaluate the proposed study. He explained firstly the researcher has to identify a problem that he aims to study. The logical next step is to find an answer or solution to the problem through a systematic step by step approach. good proposal increases the chances of getting funding, and is also necessary for efficient research and valid results. He also said a good proposal contains a clear statement of the problem to be studied, a review of relevant literature, objectives of the study, methodology, time, budget, and references.

## Outcomes of the Workshop:

After completion of the **Workshop on Research Design and Measurement** the faculty are expected to:

- Faculty will be able to Know about the Research measurements and design

## DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Date: 28/12/2018

### Program Report

Name of the Program : **Workshop on "How to be a good Researcher"**

Schedule dates : 27/12/2018

Resource Person : Dr. Atchutha Rao

Professor

Sreyaas Institute of Engg & Technology, Hyderabad, Telangana

Email: [atchutharaosreyas@gmail.com](mailto:atchutharaosreyas@gmail.com)

### Objective of the Program

- The main objective this **Workshop on "How to be a good Researcher"** is to make the faculty to get familiarizes about the How the researcher will be.. as discussed on
- How to choose a particular methodological approach, and what are specific arguments that are important to consider with when choosing the research design in e-Learning contexts?
- How to do identify and qualify criteria for the construction of research designs according to

  
**PRINCIPAL**  
Vignan's Institute of Management & Technology For Women

current themes in e-Learning? • How do we achieve reliability and validity in e-Learning research - and how do we manage blind spots and links between research objectives and relevant findings?

- What are the options for the generalisation of findings and are there special concerns in e-Learning research?
- How are the criteria for research design and research findings negotiated in the various research communities (paradigms) and our field of e-Learning?
- Are there new instances and new uses of e-Learning
- Workshops as a research methodology aim to produce reliable and valid data about the domain in question regarding forward-oriented processes, such as organisational change and design. The findings feed back into the domain theory, the methodology, and/or the practices regarding future agency. E-learning conducted in the third room over VC constitutes both a phenomenon and practice of organisational change (implementation and use) and relates to e-learning design. That is, using workshops as research methodology is an especially useful approach in studies that are emerging and unpredictable..

## Outcomes of the Workshop:

In relation to the workshop-as-research-methodology perspective, the five studies' various workshops brought different knowledge and factor types into play, including some in areas that we could not have predicted beforehand. As the literature review shows, the existing research dominantly focuses on how to conduct workshops and present findings. Meanwhile, articulation of how to produce and analyse data is practically absent. provided details on roles and formats, reflecting upon their meaning when workshops are applied to creative processes. Similar, but they did not show how this analysis was conducted. In our approach, the workshops' frame and intentions were produced through collaboration and written down. Though we adopted a semi-anthropological approach that relied on event recall, we also used recordings and note-taking to support our retrospective inferences. When possible, the note-taking and video-recordings were produced by a researcher or assistant. As part of the research design, we applied small, in-the-background discussions while participants were busy preparing, for example, a role-play. These small discussions provided an overview and helped us stay proactive during the workshop and continuously interpret the factors at play. In our analysis, we contemplated our formal reflections

on the five studies, both individually and together. When evaluating workshops as a research approach, we also placed value on our own immediate experiences, as noted in our discussions following each workshop. It is clear from this analysis that one of the research method benefits is that the workshop form helps uncover participants' unrecognised or unacknowledged blind spots. We also have a clear sense that the same findings would not have emerged in other research designs. For example, in the RDAM case and with regard to the issue of lacking both formal and informal knowledgesharing spaces, it was not only the researchers who saw and understood the problem; it became an openly debated issue among the teachers as well. This debate moved the RDAM organisation and participants towards a mutual recognition and equipped them to act on this issue in the future. The debate also provided us as researchers with greater insight into the problem definition and the involved factors.

**Total Participation: 25**

## Feedback:

- It would be really a fabulous session that I have attended so far.
- Nice delivery of content made me to stick to entire session to listen. Nice one.
- For the first time I got to know about how a good researchers will be.
- Presenter very accomplished experienced and genuine – great teaching/sharing style. clear, concise, good examples. Content: excellent.

## Programme Report

Name of the Program : **Seminar on Big Data Analytics with R-Programming in Research**

Organized by : Department of CSE

Schedule dates : 29/09/2018

Resource Person : B. Phijik

Asst prof

VITAE Deshmukhi

Email: [phijik@gmail.com](mailto:phijik@gmail.com)

## Objective of the Program

- The main objective this “**Seminar on Big Data Analytics with R-Programming**” is to make the students to get familiarizes about the Big Data and R programming methods. R is a powerful statistical programming language for data science. It consists of powerful packages to deal with Big Data analytics, which is a complex process of examining large and varied data sets in order to reveal hidden, useful, novel and interesting trends and patterns. The R programming language comprises packages and environments for statistical computing with Big Data, making analytics easier. The R programming language is the right choice for Big Data analytics as it provides capabilities such as access to parallel and distributed machine learning algorithms as well as parallel data and task execution. R programming supports both explicit and implicit parallelism to handle Big Data effortlessly. This language has a rich set of packages for Big Data analytics.

In this session , topics covered are :

- The basics of statistical computing and data analysis
- How to use R for analytical programming
- How to implement data structure in R
- R loop functions and debugging tools
- Object-oriented programming concepts in R
- Data visualization in R
- How to perform error handling
- Writing custom R functions

## Outcomes of the Workshop:

Big Data becoming huge attention in the recent technological advancements due to electronic data and processing. Enormous data are collected or generated and stored in the electronic repository every day. Almost all the domains like Engineering, Technology, Science, Health, Commerce and Finance are emerged as huge data contributors and which includes variety of data sources. Big data offers a new space of opportunities from research and development to online transactions and services in many sectors. Analyzing this data can find unanticipated uses of data, correlations, new patterns and can be used for decision making and other related processes. Analyzing big data is a complex task. R programming is a tool used for analyzing the big data in efficient manner. This article introduces the R programming tool and a real world data set is analyzed and results are discussed.

The main objective of this course is to make students comfortable with tools and techniques required in handling large amounts of datasets. They will also uncover various terminologies and techniques used in Big Data. Several tools publicly available will be used to illustrate the application of these techniques. This will help students in developing skills required to gain experience of doing independent research and study

Email: info@vmtw.in

- Explain critical R programming concepts
- Demonstrate how to install and configure RStudio
- Apply OOP concepts in R programming
- Explain the use of data structure and loop functions
- Analyse data and generate reports based on the data
- Apply various concepts to write programs in R

## Feedback:

- It would be really a fabulous session that I have attended so far.
- Requesting for Pdf and Ppts.
- Need more relevancy topic seminar further.
- Nice delivery of content made me to stick to entire session to listen. Nice one.

Organized by : Department of CSE

Schedule dates : 5-02-2019 To 6-02-2019

Resource Person : Dr. G Vinoda Reddy

Professor

CMR Technical Campus

### **Objective of the Program**

- Data science is pivotal in all the industries running in the modern-day digital world. From making effective business decisions to planning and forecasting future complications, data science technologies have been amazingly resourceful for different purposes. Data science aims to apply statistical and analytical approaches to studying real-world occurrences. The term "data" describes any collection of information or body of knowledge that has been represented or coded in a way that makes it more usable for a specific purpose or processing in general. A Data Scientist's job is to take raw data and turn it into useful information through extraction, manipulation, preprocessing, and prediction. Learning about additional technologies is essential if you want to work in data science. Here in this article, we will

Kondapur (V), Ghatkesar (M), Medchal - Malkajgiri (D) - 501 301 TS INDIA  
Phone: +08615 200006/07/08 Email: info@vmtw.in

discuss the top 13 data science tools and technologies that will help you to have a successful carrier in data science. It is now recognized as one of the most promising fields of study of the 21st century. The likes of Facebook, Google, IBM, Microsoft, and countless others, both large and small businesses, are investing substantial resources in the study of data and the field of data science. Typically, businesses hire data scientists to assist them in learning more about their customers and how to enhance their goods based on that information.

- According to LinkedIn's emerging jobs report, the demand for data scientists has increased by more than 650% since 2012. The market's rising trajectory from 2019's USD 37.9 billion to 2026's USD 230.80 billion is clear

## Outcomes of the Workshop:

After completion of the Workshop on **"Two Day Workshop on "Emerging Technology in Data Science"** the students are expected to:

Students will become proficient in the statistical analysis of data and the use of computation tools for data analysis. Students will apply statistical and computational tools to applied problems, and clearly communicate the results in both written reports and oral presentations

The Data Science future is studded with career opportunities. Future of Data Science 2030 is estimated to bring opportunities in various areas of banking, finance, insurance, entertainment, telecommunication, automobile, etc. A data scientist will help grow an organization by assisting them in making better decisions

Data science aims at collecting, processing, analyzing, and presenting this data in a visual format to help companies or organizations in making crucial business decisions.

Data Science is one of the fastest-growing fields in India. Data Science job opportunities in India are increasing as organizations seek to harness the power of data to drive decision-making. Some of the most common job roles in data science include data analysts, data scientists, and big data engineers

## Department of Electronics and Communication Engineering A Report on

### “Time and Effort Management for Research”

Date: 12-04-2019

Department of Electronics and Communication Engineering conducted seminar on – “Time and Effort Management for Research”, on 08-04-2019 for Faculty and Researchers.

**Speaker:** Dr.N. Shyam Sunder Sagar, Assistant Professor, Dept. of ECE, GITAM University, Hyderabad.Telangana

A total of 20 members participated in the seminar. This seminar session provided an excellent opportunity to learn about Time management for research.

**Date & Time:** The seminar was conducted on 08-04-2019 at 01:00 PM–3:00 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. P. Sudhakar Rao and Dr. A. Narmada, HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent feedback.

The speaker explained how Researchers function in a complex environment and carry multiple role responsibilities. This environment is prone to various distractions that can derail productivity and decrease efficiency. Effective time management allows researchers to maintain focus on their work, contributing to research productivity. Thus, improving time management skills is essential to developing and sustaining a successful program of research. This article presents time management strategies addressing behaviors surrounding time assessment, planning, and monitoring. Many researchers face the challenges of competing demands, interruptions, and internal and external distractions while working to build and maintain a successful program of research. Time management, defined as deliberate actions aimed at the effective use of time to achieve specific, goal-directed activities, is a skill necessary to maintaining scholarly.

  
PRINCIPAL  
Vignan's Institute of Management & Technology For Women  
Kondapur (V), Ghatkesar (M), Medchal-Malkajiri (Dt)-501301  
Telangana State

Strategies for time management fall into three broad categories: time assessment behaviors, planning behaviors, and monitoring behaviors. There are a variety of approaches to time management that minimize procrastination, minimize interruptions, and enhance discipline particularly when engaging in research activities. Time management involves allocating time to activities that will help achieve goals. Approaches to time management include monitoring, setting goals, prioritizing, planning, delegating, and analysis of time spent. Specific examples of these approaches are listed below:

### **Monitoring**

- During the time you have allocated to work on a task, keep a log to identify how you use your time (be honest)
- Identify common examples of your habits of procrastination, attending to interruptions, and a lack of discipline.

### **Setting Goals**

- Identify and record all the objectives you wish to achieve. Each of these objectives needs to include a measurable component for the outcome and a time limit within which the objective will be obtained.
- Once you have recorded these goals, determine which are under your direct control and are realistically attainable within the time limit you have determined. For example, the goal of having a coauthor revise a section of a manuscript in 2 weeks is not something a researcher has direct control over.

### **Prioritizing**

- Once all the goals to be achieved within a unit of time have been identified, arrange them in order of priority.
- Work on the highest priority goal first and consistently until you have achieved the goal or have temporarily exhausted the available resources to achieve the goal.
- Avoid “dual tasking” or working toward two or more goals simultaneously.

### **Planning**

- Make daily “to do” lists each day and cross off items you have completed.
- Break tasks into components you can handle within the time available.

  
PRINCIPAL  
Vignan's Institute of Management & Technology For Women  
Kondapur (V), Ghatkesar (M), Medchal-Malkajiri (Dt)-501301  
Telangana State

- Effectively use all your time. Always have something to read with you. Other examples include reading on the bus or while waiting for your teenage daughter or son.
- Amass resources prior to beginning a task.
- Minimize opportunities for interruptions. Work is an activity but is often thought of as a place. Some of your best work may not be completed in your office. Pay attention as to where you are most creative and where you can best focus. Your office may not be the most efficient place to work (e.g., work in the library or an abandoned office, turn off your cell phone, disable the Internet, place a sign on your office door indicating you are unavailable for a specific time).
- Plan rewards for achieving “to do” items on your list, including planned unproductive activities (e.g., Facebook for 10 min, reply to nonurgent emails for 10 min, walk around the building for 10 min)

### Delegating

- Handle snail mail and email items only once.
- Update your curriculum vita as you make achievements.
- With each request for a different role at work, ask yourself “Will my participation in this activity contribute to my prioritized goals?” Cultivate the ability to say “no” to opportunities that don’t directly contribute to your prioritized goals.
- Identify tasks that only you can complete and tasks that could be accomplished by support staff. Learn to delegate all or part of the tasks that don’t require your exclusive input.

### Analysis of Time Spent

1. If an objective is not achieved within the expected time frame, identify possible barriers and work to minimize the barriers in the future.
2. Periodically reevaluate your habits of procrastination, attending to interruptions, and a lack of discipline. Have you been able to change them?

The Speaker concluded that a productive research career is predicated upon effective time management. Effective use of a researcher’s time contributes directly to his or her research productivity and allows more time to pursue pleasant activities.

## DEPARTMENT OF COMPUTER SCIENCE ENGINEERING

Date: 21/06/2019

### Programme Report

Name of the Program: Emerging Trends in Research with Cognitive Technology and its Applications

Schedule dates: 19/06/2019

Resource Person: Dr.P.Vijaypal Reddy

Professor,GRIET

Email: [vijaypalreddy@gmail.com](mailto:vijaypalreddy@gmail.com)

### Objective of the Program

- The main objective this "Seminar on Emerging Trends in Cognitive Technology and its Applications" is to make the students to get familiarizes about the Research technologies methods. Cognitive computing is the amalgamation of cognitive science and is established on the basic premise of simulating the generic thought process. Cognitive computing trends are a consistent flow of learning techniques that combines many disruptive technologies like AI and machine learning wrapped with sentiment analysis and contextual awareness to fix day-to-day problems, just like humans. These techniques employ different processes such as data mining, recognition of patterns, and language processing. Today top cognitive computing trends are experiencing a dramatic change

Principal  
Vignans Institute of Management & Technology For Women

as companies are getting more engaged in developing Artificial Intelligence (AI) and are competing in the market to get a step ahead. Cognitive computing trends can help us in realizing the potential of AI as it helps in imitating the activity of the human brain. Emerging top cognitive computing trends can be useful in developing an automated system for solving complex problems by itself.

## Outcomes of the Workshop:

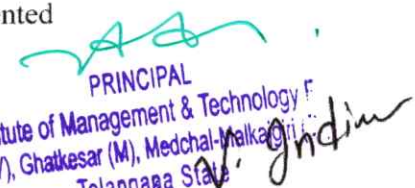

After completion of the Workshop on **"Seminar on Emerging Trends in Research with Cognitive Technology and its Applications"**. We found that applications of cognitive technologies fall into three main categories: product, process, or insight. Product applications embed the technology in a product or service to provide end-customer benefits. Process applications embed the technology in an organization's workflow to automate or improve operations. And insight applications use cognitive technologies—specifically advanced analytical capabilities such as machine learning—to uncover insights that can inform operational and strategic decisions across an organization. We explore each application type below. To increase the speed and reduce the cost of operations, we expect that organizations of all types will implement cognitive technologies to automate processes that could not be automated without them. A recent study in health care provides an example. The study, at the Cincinnati Children's Hospital Medical Center, demonstrated that the process of automatically identifying patients eligible for clinical trials, using natural language processing to read free-form clinical notes, and machine learning to refine the list of terms extracted from them, reduced the workload by 92 percent and increased efficiency by 450 percent. Total Participation: 95

## Feedback:

- It would be really a fabulous session that I have attended so far.
- Nice delivery of content made me to stick to entire session to listen. Nice one.
- Very clear about emerging trends and applications.
- A very informative and valuable 2 days. I really enjoyed the small group dynamics
- An awesome work. Content was relevant and well presented

## REPORT

### **Two day workshop on “General Introduction about IPR and its Emerging Trends”**

During 23-07-2018 & 24-07-2018 Vignan's Institute of Management and technology for women organized a two day workshop on “General Introduction about IPR and its Emerging Trends”.

The resource person Mr.K.Mahesh, Associate Professor, Tirumala Engineering college Bogaram. Has enlightened the participants in the area of General Introduction about IPR and its Emerging Trends.

Apart from Management of Intellectual Property Rights for Academicians he has emphasized on the importance of IPR and its benefits to the society. The core area of the seminar is Intellectual Property Rights in Business. To understand the significance of the components of the IPR and using it effectively as a main part of business strategy is vital to attainment in the market place. Businesses need the IPR to protect production secrets or other useful information and continue forward of the competition. Digital Economy rewards those enterprises that are creative, innovative and understand the importance of the market for ideas. The Intellectual Property Rights provides the formal framework for protecting their knowledge, creativity & innovation. To maximize the potential provided the IPR one has to think beyond exclusive rights to IP assets.” He also told about the

procedures to apply for registration of IP, the university scientists and students are required to observe confidentiality in relation to such information though as a university the purpose is to disseminate of information and the building of the research base. In the current scenario the aggressive and targeted creation of intellectual property is the need of the hour. Protection of IPR and its commercialization propagates innovative culture, profitability, market leadership and helps creation of wealth for the individual and eventually the Nation. For that IPR awareness is required which is significant for fruitful growth of the Intellectual property rights (IPRs).

During the workshop Mr.B.Shravan, CEO, Vignan group Institutions had emphasized the significant role of Intellectual Property Rights in present days.

**Participants:** Student participants and all the teaching staff representing various departments have taken active participation in the workshop.

### Learning Objectives:

1. To Create Awareness in the area of Intellectual Property Rights.
2. To Emphasize on importance of IPR and its benefits to the society.
3. To focus on the importance of IPRs.
4. To Explain the various types of IPRs.

### Learning Outcomes:

1. The participants have received valuable awareness regarding Intellectual Property Rights.
2. The participants have realized the IPR for Academics.
3. The participants have come to know about the importance and benefits of Intellectual Property Rights.
4. The participants have secured valuable information in the area of IPR.

## Department of Electronics and Communication Engineering A Report on ” Patent Awareness”

Date: 24-12-2018

Department of Electronics and Communication Engineering conducted seminar on – “Patent Awareness”, on 21-12-2018 for Faculty and Researchers.

Speaker Dr. A. Narmada, Professor, Brilliant Grammar School Educational Society group of Institution, Hyderabad.

A total of 91 members participated in the seminar. This seminar session provided an excellent opportunity to learn about patent awareness.

**Date & Time:** The seminar was conducted on 21-12-2018 at 10:00 AM–3:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. P. Sudhakar Rao and Dr A. Narmada, HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent in feedback.

The speaker explained that Intellectual Property Rights (IPR) protection plays a key role in gaining an advantageous position in the competitive technology world for achieving economic growth. Thus, information on various technological advancements should be disseminated to the users of technology for our country to develop faster. Thus, a culture to make aware of development of technology to pertinent users is essential. This has become more pronounced in the globalized economy with international agreements and obligations in the fields of IPR. A huge amount of information is to be provided while filing a patent application to ensure full disclosure of the invention.

Topics covered:

Introduction of Intellectual Property Rights, IP Evolution

**Patent:**

Introduction, Requirement of patentability, Example of some patent document, Pre filling requirement, Patent search, Prior art search, Free and paid patent search database, Fees, Patent office in India, Patent filling process.

**Copyright:**

Introduction, Categories of copyrightable works, Copyright registration workflow, Copyright forms, Fees, Copyright Case laws.

**Trademark:**

Introduction, Unregistered Trademark, Unregistered Service mark, Registered Trademark, Trademark forms, Examples, Trademark registration process, Trademark search, Important forms for Trademark, Fees, Renew trademark, Trademark Case laws.

**Industrial Design:**

Introduction, Examples of registered designs, Essential requirements of design, Design application, Design registration process, Design search, Information required for design application, Design representation sheet, IDC Class, Fees, Design publication extracts, Design Case laws. Trade Secrete: Introduction, Example of Coca-Cola.

Relevant queries were arising from the side of students and faculty delegates. They got justified answers from the speaker.

### **Department of Electronics and Communication Engineering** **A Report on** **” PRESENT SCENARIO IN ENTREPRENEURS”**

**Date: 22-08-2018**

Department of Electronics and Communication Engineering conducted **seminar on** – “One day seminar on **”PRESENT SCENARIO IN ENTREPRENEURS”**, on 20-08-2018 for Faculty, students, and Researchers.

**Speaker: Ms. Geeta Goti, Independent Director, National Small Industries Limited (NSIC).**

A total of 100 members participated in the seminar. This seminar session provided an excellent opportunity to learn about present scenarios in entrepreneurs.

**Date & Time:** The seminar was conducted on 20-08-2018 at 11:00 AM–12:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. P. Sudhakar Rao, Dr. A. Narmada HOD of ECE for their support for successful completion of seminar.

All the participants felt very happy for attending the program and most of them given excellent feedback.

The speaker explained that Entrepreneurs are driven to achieve success in their business along with the qualities of a Leader, Manager, Dreamer, Innovator, risk taker, continues learner, decision maker & most important is to implement all these qualities into the work. There are a lot of examples of the entrepreneurs in India who are now called synonymous of ‘Success’. They saw the bigger picture but wisely started their business as a very small unit. Entrepreneurs set the example of turning their dream into reality. And the story behind making dreams into reality is to set massive goals for themselves and stay committed to achieving them regardless of the obstacles they get in the way, with ambition and the unmatched passion towards achieving the goal. It looks fascinating, attractive, and motivating after listening to stories of the entrepreneurs, but success is not as easy as it always looks.

There are some obstacles which we call the challenges to overcome by looking forward the prospects to be a successful entrepreneur. This research paper focuses on the challenges available in the Indian market by en-cashing the possibilities and prospects of the same to be a successful entrepreneur.

An **entrepreneur** is an individual who creates and/or invests in one or more businesses, bearing most of the risks and enjoying most of the rewards. The process of setting up a business is known as "entrepreneurship". The entrepreneur is commonly seen as an innovator, a source of new ideas, goods, services, and business/or procedures.

The speaker discussed about the exploitation of entrepreneurial opportunities may include:

- Developing a business plan
- Hiring human resources
- Acquiring financial and material resources
- Providing leadership
- Being responsible for both the venture's success and failure
- Risk aversion

The speaker discussed that Entrepreneurship may operate within an entrepreneurship ecosystem which often includes:

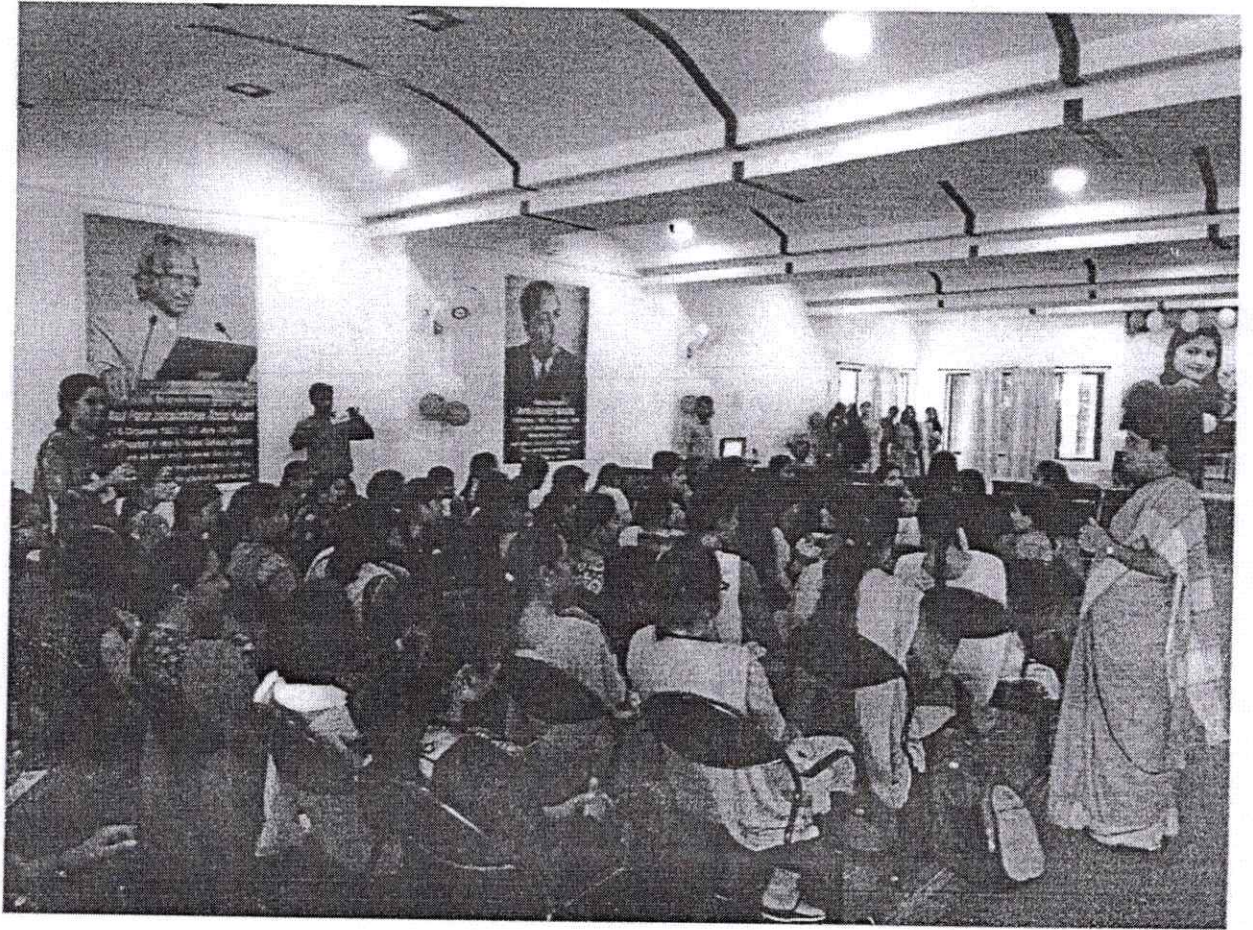

- Government programs and services that promote entrepreneurship and support entrepreneurs and start-ups.
- Non-governmental organizations such as small-business associations and organizations that offer advice and mentoring to entrepreneurs (e.g., through entrepreneurship centers or websites)
- Small-business advocacy organizations that lobby governments for increased support for entrepreneurship programs and more small business-friendly laws and regulations
- Entrepreneurship resources and facilities (e.g. business incubators and seed accelerators)
- Entrepreneurship education and training programs offered by schools, colleges, and universities.
- Financing (e.g. bank loans, venture capital financing, angel investing and government and private foundation grants).

Relevant queries were arising from the side of students and faculty delegates. They got justified answers from the speaker.

## Programme Report

Name of the Program : **"Knowledge management and Entrepreneurship "**  
Organized by : Department of CSE  
Schedule dates : 18/04/2019  
Resource Person : Dr.R.kanaka Durga  
Professor & Dean of Academics  
Malla Reddy College of Engineering for Women  
Email-id- [kanakadurga@mrec.in](mailto:kanakadurga@mrec.in)

## Objective of the Program

- The main objective this A Seminar on "Knowledge management and Entrepreneurship "is to make the faculty to get familiarizes about the Entrepreneurship. While research on knowledge management in entrepreneurial organizations has been the subject of much scholarly attention, it has mostly been considered independently rather than in institutional, geographical or industrial contexts. The purpose of this special issue is to integrate the role of context with knowledge management research, and to discuss the subsequent implications for entrepreneurship. This paper draws on the knowledge spillover theory of entrepreneurship, open innovation theory and the institutional perspective to

knowledge management in entrepreneurial organizations. It does so in order to measure returns to investment in knowledge and knowledge spillovers across various industries and levels of economic activity (individual, firm, industry, university, region). Future research suggestions from the papers included in the special journal issue are also discussed and explained

## Outcomes of the Workshop:

After completion of the **A Seminar on "Knowledge management and Entrepreneurship "**the faculties are expected to:

Despite numerous studies dedicated to business and entrepreneurship education, there is a lack of research dedicated to students studying creativity in entrepreneurial and business-related disciplines through knowledge management tools and practices. The objectives of the study were to determine the key factors of creative motivation for entrepreneurship among students, to build an appropriate universal practical model of learner creativeness motivation, and to create a knowledge management concept based on this model. By way of comparative, descriptive, qualitative, and quantitative analysis methods,

- To create the infrastructural and organizational requirements for a learning organization to ensure that the organizational knowledge base can be used,
- It is a collection of pioneering research on the methods of gaining organizational advantages based on knowledge innovation and management.

**Total Participation: 76**

## Feedback:

- It would be really a fabulous session that I have attended so far.
- Nice delivery of content made me to stick to entire session to listen. Nice one.
- I honestly think that I can take the ideas from this course out into the world and into my life
- A fantastic learning experience.

- Good presenter. Great visuals. Nice feel to the course
- The materials are outstanding. Your teaching is clear, beautifully illustrated naturally, and nicely idiosyncratic
