A Report on
“Research Methodology and Tools”

Date: 12-09-2020

Department of Electronics and Communication Engineering conducted **webinar on** – “Research Methodology and Tools”, on 10th September 2020 for Faculty and Researchers.

Speaker Mr.R.Krishna Naik, Assistant Professor, VMTW, Hyderabad.

A total of 20 members participated in the Webinar. This webinar session had provided an excellent opportunity to learn about Research methodology and Tools.

Date & Time: The webinar was conducted on 10-09-2020 at 10:00 AM–3:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shraavan, Principal Dr. G. Apparao Naidu and Mr. Vijay Kumar R. Urkude, HOD of ECE for their support for successful completion of webinar.

All the participants felt very happy for attending the program and most of them given excellent in feedback.

The speaker explained that **Research** is "creative and systematic work undertaken to increase the stock of knowledge". It involves the collection, organization, and analysis of evidence to increase understanding of a topic, characterized by a particular attentiveness to controlling sources of bias and error. These activities are characterized by accounting and controlling biases. A research project may be an expansion of past work in the field. To test the validity of instruments, procedures, or experiments, research may replicate elements of prior projects or the project.

He briefed about the primary purposes of basic research (as opposed to applied research) are documentation, discovery, interpretation, and the research and development (R&D) of methods and systems for the advancement of human knowledge.

Approaches to research depend on epistemologies, which vary considerably both within and between humanities and sciences.

There are several forms of research: scientific, humanities, artistic, economic, social, business, marketing, practitioner research, life, technological, etc. The scientific study of research practices is known as meta-research.

He explained that "methodology" is sometimes used as a synonym for the term "method". A method is a way of reaching some predefined goal. It is a planned and structured procedure for solving a theoretical or practical problem. In this regard, methods stand in contrast to free and unstructured approaches to problem-solving. For example, descriptive statistics is a method of data analysis, radiocarbon dating is a method of determining the age of organic objects, sautéing is a method of cooking, and project-based learning is an educational method. The term "technique" is often used as a synonym both in academic and everyday discourse. Methods usually involve a clearly defined series of decisions and actions to be used under certain circumstances. The goal of following the steps of a method is to bring about the result promised by it. In the context of inquiry, methods may be defined as systems of rules and procedures to discover regularities of nature, society, and thought. In this sense, methodology can refer to procedures used to arrive at new knowledge or to techniques of verifying and falsifying pre-existing knowledge claims. This encompasses various issues pertaining both to the collection of data and their analysis. Concerning the collection, it involves the problem of sampling and of how to go about the data collection itself, like surveys, interviews, or observation. There are also numerous methods of how the collected data can be analyzed using statistics or other ways of interpreting it to extract interesting conclusions. He also briefed about how tools must be used based on the research field.

REPORT ON ONLINE SEMINAR

Name of the Program: **Data Analytics: Innovative Research Methods and Data**

Analysis

Organized by : Department of IT
Resource Person: Dr.Khaja Masthan.
Associate Professor,(CSE)
Spoorthy Engineering college,Hyderabad.
Email.Id: kmasthan@spoorthyengg.ac.in
Coordinator : Mr.K.Bharath Reddy
Assistant Professor of IT
Date & Time : 23-09-2020 at 10:00AM to 12:00PM

Objective of the Seminar:

The objective of data analytics: innovative research methods and data analysis is to extract meaningful insights and knowledge from large and complex datasets. By employing advanced analytical techniques, organizations and researchers can uncover patterns, trends, and correlations that can inform decision-making, drive innovation, and enhance understanding of various phenomena.

Outcome of the Seminar:

The outcomes of data analytics in innovative research methods and data analysis contribute to improved decision-making, increased research insights, efficiency gains, innovation, resource optimization, effective communication, and evidence-based policy development. These outcomes have the potential to drive positive impacts in academia, industry, and society as a whole.

Total 32 Number of students and 6 number of faculty had participated in the online Seminar. This Seminar session had provided an excellent opportunity to learn about **Innovative Research Methods and Data Analysis** to all the participants.

Coordinator : Mrs.K.Helini

Assistant Professor of IT

Date & Time : 04/03/2021 at 10:00AM to 12:00PM

Objective of the Seminar:

The objective of identifying a research gap is to contribute to knowledge expansion, address research needs, advance the field, identify opportunities, provide a foundation for future research, inform decision-making, and enhance research quality. By focusing on areas where gaps exist, researchers can make meaningful contributions and have a significant impact within their respective fields.

Outcome of the Seminar:

The outcomes of identifying a research gap and addressing it through a research study can lead to original contributions, knowledge advancement, research impact, practical implications, shaping future research directions, academic recognition, personal and professional growth, and critical evaluation.

Total 31 Number of students and 6 number of faculty had participated in the Seminar. This Seminar session had provided an excellent opportunity to learn about **Identification of GAP for Writing a Research Proposal** to all the participants.

Students appreciate research proposals that have a clear and well-defined problem statement. They value proposals that effectively communicate the gap or research problem that needs to be addressed, providing a compelling rationale for its significance.

Faculty participants provide feedback on the relevance and personal interest in the proposed research. They appreciate proposals that align with their own interests, offer opportunities for intellectual growth, or have broader implications for society.

We would like to thank our honourable Chairman Sri Dr. L Rathaiah garu, CEO Sri B. Shraavan garu, Principal Dr. G. Apparao Naidu garu and Mr.B.Phijik, HOD of IT for their support for successful completion of one day seminar.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

A Report on Two Day workshop on

20/03/2021

Python Programming in Research Design

Type of Program: Workshop

Date: 17-03-2021 and 18-03-2021

No. of students Participated: 42

Faculty Coordinator: Mrs.V.Rupa

Resource Person: Dr.K.Ruben Raju
Department of CSE
CMR Institute of Technology (Autonomous)
Mobile No 9959555554
Institutional Email-ID – rubenraj@cmritonline.ac.in

Event Report:

Day-1(17-03-2021):

Speaker covered basics of python like installation, data types, variables, operators, Control statements in Forenoon session.

In the afternoon session speaker covered Vectors, Lists, Tuples, Dictionaries.

In the last 15 mins of time interaction session taken by speaker to clear the doubts. In the forenoon session of second day speaker covered some advanced topics like functions, modules, file handling, object creation etc

In the afternoon session students were given a problem statement to solve.

Day-2(18-03-2021)

Speaker covered How python is used in Scientific research Design

Telangana State

Which programming language is used in scientific research?

- In a wide sense, a scientific programming language is a programming language that is used widely for computational science and computational mathematics. In this sense, C/C++ and Python can be considered scientific programming languages. There is a great deal of extending capabilities found in Python. NumPy, a popular Python library for scientific computing, now includes F2Py, a package that converts Fortran subroutines to Python. Python also offers excellent input/output options, in particular for scientific computing, which entails handling large datasets.
- A number of scientific computing functions are built into Python. SciPy ecosystems, consisting of the SciPy library and several independent 'Scikit-learn' toolkits, are included in most Python distributions. In addition to classification, regression, clustering and matrix reduction, the sklearn library provides a variety of efficient statistical tools.
- **Graphical** visualization is made easy with Python's dynamic libraries. Matplotlib is a MATLAB-based plotting library for Python that most users will already be accustomed to working with. An open-source graphing library, Plotly, uses Plotly.js to create high-level, interactive graphs.
- Several task automation features are available in Python. There are a number of Python packages that facilitate automation well thanks to its built-in scripting features. A small amount of effort is required to automate time-consuming tasks and log data.
- New researchers often miscalculate how much time they will allocate to manipulating, remodeling, and processing their data. Data munging is Python's strong suit. For new researchers, this is a very good resource. Duplicate entries in SQL databases can be identified and deleted using Python.
- Python is also capable of performing numerous types of statistics. The pandas package, for example, allows you to perform a quick Pearson correlation calculation between columns of data. Adding pandas and stats models as well as Scikit-learn, Python's data analysis abilities have grown significantly

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Report on "Research Methodology" Seminar

Event Type : Seminar
Date/Duration : 6-04-2021
Resource Person : Dr. Vinit Kumar, Dean of Academics, Associate Professor,
Department of Computer Science & Engineering.
Email : vinit.gunjan@cmritonline.ac.in
Name of Coordinator : Mrs.B.Geetha
Target Audience : IV B Tech Students, Faculty
Total No. of Participants : 59

Objective of the Event:

The purpose of the seminar is to introduce students to the most important conceptual approaches of research as well as to explore and formulate the theoretical framework for the analysis of the topic that is examined in the context of their Postgraduate Dissertation.

The main objective of the seminar is to support the students to use rationally alternative research methods when preparing their dissertation.

Outcomes of the Event:

After completion of the Seminar on "Research Methodology"

- Understand the design of scientific research, methodology and research methods.
Developing the knowledge and understanding sub-research objects offers at the same time the opportunity to expand their scientific horizons.
- Acquire knowledge about the use of different statistical techniques and methods.
- Develops their ability to critically analyze, evaluate and synthesize complex and multi-dimensional concepts

Feedback/Suggestions:

- More number of Seminars on similar applications & advanced technologies
- Nice delivery of content made students to stick to entire session to listen.
- One day is insufficient to learn the complete concepts

SEMINAR REPORT

Name of the Program : **Best Practices of High Quality Research**
Organized by : Department of CSE (AI&ML)
Resource Person : Dr.A.Mallikarjuna Reddy,
Anurag University, Greater Hyderabad.
Email Id: mallikarjunreddycse@anurag.edu.in
Coordinator : Ms.P.Shilpa Sree
Assistant Professor of CSE (AI&ML)
Date & Time : 22-09-2021 at 9:00AM to 4:00PM

Objective of the Seminar:

The objective of the "Best Practices of High-Quality Research" is to provide students with a set of guidelines, principles, and techniques to conduct rigorous and reliable research. The course aims to enhance the quality, credibility, and impact of research outputs by promoting adherence to recognized standards and best practices in the research process.

Outcome of the Seminar:

The outcomes of a "Best Practices of High-Quality Research" course are designed to equip participants with the knowledge, skills, and tools necessary to conduct research of the highest quality. Here are some common course outcomes you can expect from such a course: Understanding of Research Ethics, Proficiency in Research Design, Mastery of Research Methodology, Competence in Data Analysis, Critical Evaluation of Research Literature, Effective Research Reporting and Communication, Promotion of Research, Reproducibility and Transparency.

Total 42 Number of students and 5 number of faculty had participated in the Seminar. This Seminar session had provided an excellent opportunity to learn about **Best Practices of High Quality Research** to all the participants.

Students appreciated the seminar because it has well-defined and specific objectives. They value clarity on what the research aims to achieve, as it helps them stay focused throughout the process, understanding of existing knowledge in the field and build upon it.

The Faculty participants felt very happy for attending the program and most of them given excellent in feedback.

We would like to thank our honourable Chairman Sri Dr. L Rathaiah garu , CEO Sri B. Shraavan garu, Principal Dr. G. Apparao Naidu garu and Dr.S.Ranga Swamy, Assoc.Prof and HOD of CSE(AI&ML) for their support for successful completion of one day seminar.

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

WEBINAR TOPIC – INNOVATIONS TOWARDS STARTUP INCORPORATION & IPR GENERATION

DETAILED REPORT

DATE: 05-08-2020

Department of Electronics & Communication Engineering conducted a one day National Webinar on “Innovation Towards Startup Incorporation & IPR Generation” on 17-07-2020 for Faculty, Researchers and students in association with IETE Student’s Forum (ISF), Hyderabad Chapter.

EMINENT SPEAKER: Dr. Biswarup Neogi, Associate Professor & HOD, Department of ECE, JIS College of Engineering, Kalyani, Nadia, West Bengal acted as a resource person for this webinar. He also holds the Convener position for Institutional Innovation Council – JISCE and Coordinator, CII Centre for Innovation – JISCE. He also becomes Coordinator for Centre of Excellence (In association Russian Federation). The speaker has more than 30 patents on his name.

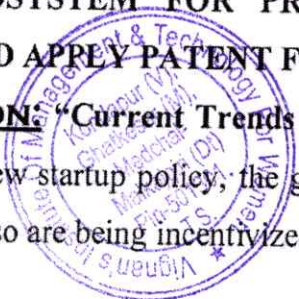

OBJECTIVE: Ministry of Human Resource Development (MHRD), Govt. of India has established ‘MHRD’s Innovation Cell (MIC)’ to systematically foster the culture of Innovation amongst all Higher Education Institutions (HEIs). The primary mandate of MIC is to encourage, inspire and nurture young students by supporting them to work with new ideas and transform them into prototypes while they are informative years.

MIC has envisioned encouraging creation of ‘Institution’s Innovation Council (IICs)’ across selected HEIs. A network of these IICs will be established to promote innovation in the Institution through multitudinous modes leading to an innovation promotion eco-system in the campus.

“To protect and to foster the protection among the startup, a patent for an invention is a must”- With this goal and an objective of upliftment of the research and development in the country, the government has launched the SIPP scheme in 2016 and increasingly more and more startup is now being a part of this scheme. Currently, there are more than 5000 startups have registered themselves under SIPP scheme and availed the patent protection.

The main objective of the webinar is “STARTUP INDIA SCHEME WAS TO BUILD A STRONG ECOSYSTEM FOR PROMOTING INNOVATION AND STARTUPS IN THE COUNTRY AND APPEY PATENT FOR THAT INNOVATION”.

INTRODUCTION: “Current Trends in Patenting Industry for Protecting Startup Innovations in India”- Under new startup policy, the government provides various facilities like lower fees, expedited examination and so are being incentivized for patent and IP matters.

VIGNAN'S INSTITUTE OF MANAGEMENT AND TECHNOLOGY FOR WOMEN

(Sponsored by Lavu Educational Society)

[Affiliated to JNTUH, Hyderabad & Approved by AICTE, New Delhi]

Kondapur (V), Ghatkesar (M), Medchal - Malkajgiri (D) - 501 301. Phone: 96529 10002/3

Having a patent is now of utmost importance for an inventor. When any startup who worked in the field of research and innovation development is more prone to the risk of infringement and if their novel invention got infringed, may cause a huge loss. In a recent move, the government has introduced another platform with Israel where startups, research teams, etc. can share their innovation in the areas of agriculture, water, and digital health. The most promising proposals will have the chance to cash prizes, a bilateral market access seminar in Israel and an opportunity to pilot with leading partners in India.

Startup India was launched by the Government of India on January 16, 2016, to build a strong ecosystem for nurturing innovation and Startups in the country to drive economic growth and generate large scale employment opportunities. In order to promote entrepreneurship in the country, the Government of India has amended the definition of a Startup. Significant changes Made to the definition of Startups

a) Age of Startup increased: Taking into account the long gestation period by Startups to establish, an entity shall be considered as a Start-up up to seven years from the date of its incorporation/ registration (from earlier 5 years). However, in the case of Startups in the Biotechnology sector, the period shall be up to ten years from the date of incorporation/registration.

b) No Letter of Recommendation required: No letter of recommendation from an incubator/industry association shall be required for either recognition or tax benefits.

c) Potential of Job and Wealth Creation: The scope of definition has been broadened to include scalability of business model with the potential of employment generation or wealth creation.

The topic gains new meaning and importance every day with AI, ML, Block-chain and many other new technologies. Also, with new trade disputes over IP between countries and companies, there are new political and competitive realities for startups to catch up on now. This is a topic of extreme importance for new and existing startups. If managed correctly, IP could lead to huge monetary gains. On the other hand, if IP is not properly handled, Startup's survival itself could be compromised. This was undertaken in order to support entrepreneurs, create vigorous startup ecosystem as well as shift India towards creating jobs rather than seeking them. Further, such a drive would encourage sustainable economic growth and create large scale employment opportunities. Thus, through this type of webinar, the government intended to empower startups to grow through innovation and design.

SESSION TOPICS COVERED BY THE SPEAKER:

- Introduction to Startup & IPR
- Types of IPR Policy
- Meaning of Innovation
- Process of file a patent for any innovation

REPORT ON WORKSHOP

Name of the Program: **Innovation towards Start-up Incorporation & IPR Generation**

Organized by : Department of IT

Resource Person: Dr. Piyush Kumar Pareek, (AIML and IPR CELL)
Nitte Meenakshi Institute of Technology, Bengaluru
Email.Id: piyush.kumar@nmit.ac.in

Coordinator : Mr.K.Bharath Reddy
Assistant Professor of IT

Date & Time : 18/08/2021-20/08/2021 at 9:00AM to 5:00AM

Objective of the Workshop:

The objective is to create an enabling environment that supports the growth and success of start-ups. This, in turn, can drive economic growth, promote innovation, attract investment, and contribute to sustainable development.

Outcome of the Workshop:

The outcomes of innovation towards start-up incorporation and IPR generation encompass economic growth, competitive advantage, intellectual property protection, investment attraction, knowledge creation, industry transformation, enhanced entrepreneurial ecosystems, and socio-economic impact. These outcomes collectively contribute to the success and sustainability of start-ups and have far-reaching implications for the economy, society, and technological advancement.

Total 35 Number of students and 7 number of faculty had participated in the Workshop. This Workshop session had provided an excellent opportunity to learn about **Innovation towards Start up Incorporation & IPR Generation** to all the participants.

NATIONAL BOARD OF ACCREDITATION

CSE & ECE

Students appreciate programs or initiatives that foster an entrepreneurial mindset. They value opportunities to develop skills such as creativity, problem-solving, risk-taking, and resilience, which are essential for start up incorporation and innovation.

Faculty members also appreciated the programs because it provided mentorship, guidance, access to resources, and networking opportunities to help them navigate the challenges of starting a business.

We would like to thank our honourable Chairman Sri Dr. L Rathaiah garu, CEO Sri B. Shraavan garu, Principal Dr. G. Apparao Naidu garu and Mr.B.Phijik, HOD of IT for their support for successful completion of one week FDP.

Entrepreneur : What it means to you?

Understanding :

- ◆ Key to Innovation | Productivity | Healthy Competition
- ◆ Realizes Ability | Makes it Practical | Establishes New Units

Innovation can be one of those tasks that everyone wants to do more of but insists they don't have the time for. Devoid of deadlines and any sense of pressing urgency, innovation can get pushed to the bottom of your 'to do' list pile. However, this is dangerous. Make time for innovation by setting aside regular hours each week. Schedule a weekly brainstorming session or allocate a certain number of weekly hours for employees to spend on innovation. As a company, you'll be better at finding creative solutions to any problems and will be able to move the business forward as a result.

Feedback/Suggestions:

- This workshop has been very inspiring and really feeling delighted to have been able to be a part of this.
- A very informative workshop.
- Content was relevant and well presented.
- Expecting more number of workshops like this.

Department of Electronics and Communication Engineering A Report on “Developing Female Entrepreneurs”

Date: 30-09-2020

Department of Electronics and Communication Engineering conducted **webinar on** – “Developing Female Entrepreneurs”, on 28th September 2020 for faculty and students.

Speaker: D. Vanitha, Vice Chairperson, ELICO Ltd. Managing Director, Elico Healthcare Services Ltd., Hyderabad

A total of 102 members participated in the Webinar. This webinar session had provided an excellent opportunity to learn about how Female Entrepreneurs can be developed.

Date & Time: The webinar was conducted on 28-09-2020 at 10:00 AM–11:30 PM

We would like to thank our honorable Chairman Sri Dr. L Rathaiah Garu, CEO Sri B. Shravan, Principal Dr. G. Apparao Naidu, and Mr. Vijay Kumar R. Urkude, HOD of ECE for their support for successful completion of webinar.

All the participants felt very happy for attending the program and most of them given excellent feedback.

The speaker explained 7 challenges women entrepreneurs face and how to overcome them.

1. Defying social expectations

Most female business owners who have attended networking events can relate to this scenario: You walk into a crowded seminar and can count the number of women there on one hand. When women entrepreneurs talk business with primarily male executives, it can be unnerving.

In this sort of situation, women may feel as though they need to adopt a stereotypically “male” attitude toward business: competitive, aggressive, and sometimes harsh. But successful female CEOs believe that remaining true to yourself and finding your own voice are the keys to rising above preconceived expectations.

“Be yourself, and have confidence in who you are,” said Hilary Genga, founder, and CEO of Trunkettes. “You may not know where you are through hard work and perseverance, but most

PRINCIPAL
Vignans Institute of Management & Technology for Women
Kondapur (V), Ghatkesar (M), Medchal - Malkajgiri (D) - 501301
Telangana State

importantly, you're there. Don't conform yourself to a man's idea of what a leader should look like."

2. Accessing funding

Not all startup founders look for investors to help get their businesses off the ground, but those who do know how difficult the pitching process can be. Raising capital is even more difficult for women-owned businesses. A 2014 Babson College report found that less than 3% of companies with venture capital funding had female CEOs.

Another way to overcome this issue is to get more female investors to support one another, said Felena Hanson, founder of the Hera Hub coworking space for female entrepreneurs. According to Hanson, groups like hers are "looking to not only inspire and encourage female investors, but to grow and support other female entrepreneurs through both funding and strategic educational workshops."

Female entrepreneurs can raise the necessary capital for their business by learning to ask for exactly what they need, even if that means requesting more than what they want.

Kolb said that investors, who are usually men, tend to assume that the women entrepreneurs are operating just like the men and inflating their numbers. Therefore, they will provide funding at lower levels than requested. Women need to understand this dynamic and approach their pitches accordingly.

3. Struggling to be taken seriously

At one time or another, most women CEOs find themselves in a male-dominated industry or workplace that does not want to acknowledge their leadership role.

4. Owning your accomplishments

The communal, consensus-building qualities encouraged in young girls can leave women unintentionally downplaying their own worth.

5. Building a support network

A robust support network is essential for entrepreneurial success, so it's no surprise that 48% of female founders report that a lack of available advisors and mentors limits their professional growth, according to a 2014 Babson College report.

PRINCIPAL
Women's Institute of Management & Technology For Women
Kondapur (V), Ghatkesar (M), Medchal-Malkajiri (Dt.)-501301
Telangana State

“With the majority of the high-level business world still being dominated by men, it can be hard to blaze your own path and facilitate the introductions and connections into some of the more elite business networks,” said Hanson. “As most of business today still rings true with the philosophy that ‘it’s not what you know; it’s who you know,’ this can be a huge factor in your ultimate

Once you find your network of supporters, don’t be afraid to ask for what you really need from them.

6. Balancing business and family life

Parent entrepreneurs have dual responsibilities to their businesses and to their families; finding ways to devote time to both is key to achieving that elusive work-life balance, said Genga.

7. Coping with fear of failure

Failure is a very real possibility in any business venture, but Kristi Piehl, founder and CEO of Media Minefield, advises women not to let their insecurities keep them from dreaming big. She encourages women to work through the moments of self-doubt that every business owner faces and not wait for perfection before starting their business or taking a big promotion.

Failure should not be viewed as a negative or an excuse for relinquishing your goals, according to Swartz.

Relevant queries were arising from the side of students and faculty delegates. They got justified answers from the speaker.
